Keyword index (vol. 327)

A

Abpa gene – Bonhomme F., 501
acetic acid – Lachenal D., 911
acidolysis – Lachenal D., 911
adapter proteins – Beutler B., 571
adaptive immunity – Du Pasquier L., 591
ageing – Sorg O., 649
agent-based model – Muller G., 1
age-structured models – Angulo O., 293
aggregation methods – Poggiale J.-C., 1058
allostery – Di Cera E., 1065
amphiphiles – Gradwell S.E., 945
anaerobic degradation – Cravo-Laureau C., 687
anisotropy – Fleury V., 663
annual dynamic – Latour D., 105
antimicrobial peptides – Ganz T., 539
antioxidants – Sorg O., 649
antiserum – Joseleau J.-P., 809
ants – Richard F.-J., 509
apoptosis – Kohl A., 1077
Armadillidium pelagicum – Hamaied S., 335 – Hamaied S., 343
assembly dynamics – Portet S., 970
Atlantic – Borsa P., 1113
Atlantic littoral – Kaimoussi A., 361
Atriplex halimus – Abbad A., 371
autochthonous species – Roiron P., 125
autoimmunity – Pradeu T., 481

B

bacteria – Selosse M.-A., 639 – Leus K., 735
Baie des Veys – Timsit O., 51
bananas – Ganry J., 621 – Guedira A., 745
barley (*Hordeum vulgare* L.) – Sah-noune M., 389
basic reproduction number – Katri P., 1009
benthic distribution – Latour D., 753
bifurcations – Matzavinos A., 995
bill and hyoid apparatus – Korzun L.P., 319
biocontrol – Selosse M.-A., 639
biodegradation – Daniel G., 861
biodiversity – Lavelle P., 629
biological plywood – Reis D., 785
biomechanics – Pilate G., 889
Bipindi forest focus – Muller G., 1
biplot – Measey G.J., 65
birch – Daniel G., 861
birds – Korzun L.P., 319
blend – Pouteau C., 935
block copolymers – Gradwell S.E., 945
bloom – Latour D., 753
bootstrapping – Taib Z., 175
Brazil – Lourenço W.R., 1151
breeding – Paillisson J.-M., 493
brown-midrib – Barrière Y., 847

C

caffeic acid O-methyltransferase – Rolando C., 799

Cameroon – Muller G., 1
cancer dormancy – Matzavinos A., 995
cannibalism – Arino O., 245
Card15 – Viala J., 551
categorization – Guyader N., 313
cell cycle – Tyrcha J., 193 – Pujomenjouet L., 235
cell movement – Maini P.K., 225
cell wall – Grabber J.H., 455 – Ralph J., 467 – Reis D., 785 – Boudet A.-M., 837 – Barrière Y., 847 – Gril J., 881
cellular immunity – Irving P., 557
cellulose – Salmén L., 873
central Pyrenees – Aubert S., 381
Cervus elaphus – Janeau G., 1143
chaos – Medvinsky A.B., 277
chemical irritation – Jacquot L., 305
chemotaxis – Maini P.K., 225
cinnamate-4-hydroxylase – Sato T., 827
circadian periodicity – Pichon G., 1087
cleptobiosis – Richard F.-J., 509
climate gradient – Abbad A., 371
clinal differentiation – Abbad A., 371
coat markings – Maini P.K., 225
coevolution – Pichon G., 1087
co-immunoprecipitation – Garcia A., 93
colonial cyanobacteria – Latour D., 105
competition – Moawad H., 445
complexity – Kostova T., 261
computational molecular biology – Mackey M.C., 211

condensation – Gellerstedt G., 817
coniferin – Rolando C., 799
conservation – Chouteau P., 37 – Chouteau P., 1157
conspecifics – Lecchini D., 159
content – Kaimoussi A., 361
continuity – Pradeu T., 481
convolution – Tyrcha J., 193
coo call – Ceugniet M., 149
cooperation – Vakanas G., 763
coordination – Vakanas G., 763
copepods – Molinero J.C., 1103
coral reef fish – Lecchini D., 159
cormorant – Paillisson J.-M., 493
corticotropic axis – Gharbi N., 12
costimulatory molecule expression – Beutler B., 571
Coua sp. – Chouteau P., 1157
couas – Chouteau P., 37
creep – Gril J., 881
Crematogaster limata parabiatica – Richard F.-J., 509
Crohn's disease – Viala J., 551
cross-linking – Grabber J.H., 455
Crustacea – Hamaied S., 335
cultivar mixture – de Vallavieille-Pope C., 611
cyanobacteria – Latour D., 753
cyclical neutropenia – Bernard S., 201
Cyprus – Bonhomme F., 501
cysteine – Ganz T., 539
cytoskeleton – Pizarro-Cerdá J., 115 – Pizarro-Cerdá J., 523

D

death-domain superfamily – Kohl A., 1077
defensins – Ganz T., 539
degradability – Grabber J.H., 455 – Barrière Y., 847
dehydration – Gharbi N., 12
delay – Pujo-Menjouet L., 235
delay differential equations – Bernard S., 201 – Bachar M., 983
dendrites – Fleury V., 663
dendritic cells – Castriconi R., 533 – Gordon S., 603
detection – Lecchini D., 159
deuterium labelling – Rolando C., 799

development – Fleury V., 663
DFRC method – Yamauchi K., 791
diarylpropane peroxidase – Daniel G., 861
diet – Measey G.J., 65
differential correction – Janeau G., 1143
differentiating xylem – Sato T., 827
digestibility – Ralph J., 467
digestion – Leus K., 735
diseases – Ganry J., 621
diversity – Ganry J., 621
Drosophila – Dupas S., 139
Drosophila melanogaster – Irving P., 557
dry forest – Chouteau P., 37
dynamics – Arino O., 961

E

early water deficit – Sahnoune M., 389
E-cadherin – Pizarro-Cerdá J., 115 – Pizarro-Cerdá J., 523
ecology – Measey G.J., 65
ecosystem – Nowicka A., 283
Ectatomma tuberculatum – Richard F.-J., 509
elastic properties – Salmén L., 873
electron microscopy – Terashima N., 903
electron transfer reactions – Gellerstedt G., 817
embryology – Weydert A., 421
endophytes – Selosse M.-A., 639
English Channel – Timsit O., 51
Engraulis spp. – Borsa P., 1113
enrichment – Arditi R., 1037
entropy production – Thellier M., 1017
enzyme kinetics – Thellier M., 1017
enzymes – Thellier M., 1017
epidemiology – Muller G., 1 – Valleron A.-J., 1125
epistemology – Weydert A., 421
estuary – Timsit O., 51
European eel – Lagardère J.-P., 353
evolution – Timsit O., 51 – Di Cera E., 1065 – Tourmen Y., 1095
extracellular slime – Daniel G., 861

F

fatty acids – Gellerstedt G., 817
fatty-acid composition – Cravo-Laureau C., 687
faunistic assemblages – Bady P., 29
favism – Wajcman H., 711
feeding adaptation – Korzun L.P., 319
feeding habitat – Paillisson J.-M., 493
feeding strategy – Paillisson J.-M., 493
ferulate – Grabber J.H., 455
ferulic acid – Barrière Y., 847
fibres – Fleury V., 663 – Pilate G., 889
fibroblasts – Fleury V., 663
fish sound – Lagardère J.-P., 353
fluorescent antibody – Moawad H., 445
football patterns – Renous S., 99
foraging behaviour – Thévenard L., 84
forest degradation – Chouteau P., 1157
forest disturbance – Chouteau P., 37
forestomach fermentation – Leus K., 735
formation of aggregates – Arino O., 961
Fourier transformations – Eisenstein M., 409
fragmentation – Banasiak J., 1025
France – Janeau G., 1143
free radicals – Sorg O., 649
French Guiana – Richard F.-J., 509
functional diversity – de Vallavieille-Pope C., 611
functional morphology – Korzun L.P., 319
functional response – Arditi R., 1037
fungi – Selosse M.-A., 639

G

G6PD deficiency – Wajcman H., 711
gaits – Renous S., 99
gene expression – Taib Z., 175
gene flow – Borsa P., 1113
gene regulatory networks – Mackey M.C., 211
gene therapy – Pergolizzi R.G., 695
generalist predators – Lavelle P., 629
genetic evolution – Nowicka A., 283

genetic resources – Ralph J., 467
genetics – Pichon G., 1087
genomics – Boudet A.-M., 837 – Pilate G., 889
Ginkgo – Terashima N., 903
glass-ionomer – Couret H., 21
Global Positioning System – Janeau G., 1143
GPC – Gellerstedt G., 817
GPS – Janeau G., 1143
grass – Grabber J.H., 455 – Ralph J., 467 – Barrière Y., 847
growth – Arino O., 961

H

habitat use – Janeau G., 1143
haematopoiesis – Bernard S., 201
harvesting – Valleron A.-J., 1125
heat wave – Valleron A.-J., 1125
helicoïdal texture – Reis D., 785
hemicelluloses – Salmén L., 873 – Terashima N., 903 – Gradwell S.E., 945
hemocyte load – Dupas S., 139
hemolytic anemia – Wajcman H., 711
Hill function – Pujo-Menjouet L., 235
histology – Leus K., 735
history – Weydert A., 421
HIV – Bachar M., 983
HLA-E – Castriconi R., 533
Holocene – Aubert S., 381
Hopf bifurcation – Pujo-Menjouet L., 235 – Bachar M., 983
host cell – Pizarro-Cerdá J., 115 – Pizarro-Cerdá J., 523
HR-Cryo FE-SEM – Daniel G., 861
HTLV-I infection – Katri P., 1009
human African trypanosomiasis – Muller G., 1
human dentin – Couret H., 21
human genome – Beutler B., 571
humicolous – Lourenço W.R., 77
humoral immunity – Irving P., 557
hydrophobic cluster analysis – Chomilier J., 431
1-(4-hydroxy-3-methoxyphenyl)-2-(2'-methoxyphenoxy)-propanol-1 – Lachenal D., 911

I

image Fourier transform – Guyader N., 313
IMD – Irving P., 557
immune response – Akira S., 581
immune system – Pradeu T., 481
immunocompetence – Dupas S., 139
immunolabelling – Joseleau J.-P., 809
immunolocalization – Sato T., 827
individual-based modelling – Damgaard C., 255
individual-based models – Kostova T., 261
individual vocal differences – Ceugniet M., 149
inflammation – Kohl A., 1077
influenza – Valleron A.-J., 1125
information use – Thévenard L., 84
innate immune system – Beutler B., 571
innate immunity – Ganz T., 539 – Irving P., 557 – Du Pasquier L., 591
inoculation – Moawad H., 445
Integrated Pest Management – Lavelle P., 629
integrated production – Ganry J., 621
intercellular delay – Katri P., 1009
interfaces – Eisenstein M., 409
intermediate filaments – Portet S., 970
interspecific relationships – Richard F.-J., 509
iron superoxide dismutase – Rejeb I.B., 679
ischaemia – Sorg O., 649
Isopoda – Hamaied S., 335

K

karyotype – Bonnaud L., 133
kraft pulp – Lachenal D., 911
kraft pulping – Gellerstedt G., 817

L

laccase – Daniel G., 861
Lagrangian model – Molinero J.C., 1103
late glacial – Aubert S., 381
lattice simulation – Chomilier J., 431

leaf characteristics – Abbad A., 371
leaf imprints – Roiron P., 125
lectins – Gordon S., 603
life cycle – Hamaied S., 343
lignification – Yamauchi K., 791 – Sato T., 827 – Terashima N., 903
lignin – Grabber J.H., 455 – Ralph J., 467 – Rolando C., 799 – Joseleau J.-P., 809 – Boudet A.-M., 837 – Barrière Y., 847 – Salmén L., 873 – Pilate G., 889 – Terashima N., 903 – Lachenal D., 911 – Pouteau C., 935 – Gradwell S.E., 945
lignin module – Terashima N., 903
Ligurian Sea – Molinero J.C., 1103
linear responses – Thellier M., 1017
Listeria monocytogenes – Pizarro-Cerdá J., 115 – Pizarro-Cerdá J., 523
location of settlement – Lecchini D., 159
location success – Janeau G., 1143
locomotion – Renous S., 99
long oscillations – Pujo-Menjouet L., 235
Lotka-Volterra – Poggiale J.-C., 1058
Lotka-Volterra model – Nowicka A., 283 – El Ghordaf J., 977
Lyapunov function – El Ghordaf J., 977
Lycopersicon esculentum – Rejeb I.B., 679
lymphatic filariasis – Pichon G., 1087

M

Macaca fuscata – Ceugniet M., 149
macrophages – Gordon S., 603
macrozoobenthos – Timsit O., 51
Madagascar – Chouteau P., 37 – Lourenço W.R., 77 – Chouteau P., 1157
maize – Barrière Y., 847
malaria – Wajcman H., 711
management impact – Timsit O., 51
manganese peroxidase – Daniel G., 861
marine population model – Arino O., 245
mass distribution – Tyrcha J., 193
material – Pouteau C., 935

mathematical modelling – Matzavinos A., 995
maximum likelihood – Tyrcha J., 193
MDP – Viala J., 551
mechanical stimulation – Rejeb I.B., 679
Mediterranean – Borsa P., 1113
Meloidogyne spp. – Guedira A., 745
metabolic rate – Dupas S., 139
metals – Kaimoussi A., 361
methyl-branched monounsaturated fatty acids – Cravo-Laureau C., 687
microchip array – Taib Z., 175
Microcystis aeruginosa – Latour D., 105 – Latour D., 753
microfibrillar angle – Gril J., 881
microhabitat – Chouteau P., 1157
mitochondria – Tourmen Y., 1095
mitochondrial diseases – Tourmen Y., 1095
mixing ability – de Vallavieille-Pope C., 611
model-based expression index – Taib Z., 175
modelling – Salmén L., 873
modified composite – Couret H., 21
molecular recognition – Eisenstein M., 409
monkeys – Ceugniet M., 149
monodehydroascorbate reductase – Rejeb I.B., 679
monogont rotifera – Angulo O., 293
monolignol – Boudet A.-M., 837
monovalent-cation-activated enzymes – Di Cera E., 1065
monovalent cations – Di Cera E., 1065
Monte Carlo – Chomilier J., 431
Morocco – Kaimoussi A., 361
morphogenesis – Fleury V., 663
morphology – Pouteau C., 935
morphometrics – Borsa P., 1113
mortality – Valleron A.-J., 1125
mosquito vector – Pichon G., 1087
mtDNA – Bonhomme F., 501
multitable ordination – Bady P., 29
Mus – Bonhomme F., 501
Musa – Guedira A., 745
mycorrhizae – Selosse M.-A., 639

N

NADPH – Wajcman H., 711
n-alkene – Cravo-Laureau C., 687
nanocomposites – Gradwell S.E., 945
natural cytotoxicity receptors – Castriconi R., 533
natural killer cells – Castriconi R., 533
natural scenes – Guyader N., 313
Nautilus – Bonnaud L., 133
nematodes – Guedira A., 745
neurodegenerative diseases – Sorg O., 649
new genus and species – Lourenço W.R., 77 – Lourenço W.R., 1151
nitric oxide – Gharbi N., 12
NMR analysis – Gellerstedt G., 817
Nod1 – Viala J., 551
Nod2 – Viala J., 551
nonlinear dynamics – Mackey M.C., 211
non-vertebrate chordates – Du Pasquier L., 591
numerical simulation – Angulo O., 293

O

odours – Jacquot L., 305
olfactory sensitivity – Jacquot L., 305
omnivory – Korzun L.P., 319
Oniscidea – Hamaied S., 335 – Hamaied S., 343
orb-weaving spider – Thévenard L., 84
ordinary differential equations – Pujo-Menjouet L., 235
oscillation in blood cell – Bernard S., 201
oxidative stress – Sorg O., 649 – Rejeb I.B., 679 – Wajcman H., 711

P

palyndology – Aubert S., 381
parasite – Dupas S., 139 – Pichon G., 1087
partial differential equations – Matzavinos A., 995

passive bioacoustics – Lagardère J.-P., 353
pathogens – Gordon S., 603
pattern formation – Fleury V., 663
p-coumarate – Grabber J.H., 455
pecten – Lourenço W.R., 77
peg-shaped sensilla – Lourenço W.R., 77
Penna model – Nowicka A., 283
peptidoglycan – Viala J., 551
periodic chronic myelogenous leukemia – Pujo-Menjouet L., 235
pest control – Lavelle P., 629
pests – Ganry J., 621
Phalacrocorax carbo – Paillisson J.-M., 493
phaseolus bean – Moawad H., 445
phenolic – Boudet A.-M., 837
phenols – Gellerstedt G., 817
phenylalanine ammonia-lyase – Sato T., 827
philosophy of immunology – Pradeu T., 481
Phlebia radiata – Daniel G., 861
phylogeny – Bonnaud L., 133
phylogeography – Bonhomme F., 501
phytoplankton – Arino O., 961
plant breeding – de Vallavieille-Pope C., 611
plant cell wall – Joseleau J.-P., 809
plant growth – Damgaard C., 255
plant populations – Ganry J., 621
Pleistocene refugia – Bonhomme F., 501
polarity – Fleury V., 663
poplar – Sato T., 827
poplar plantlets – Rolando C., 799
population – Molinero J.C., 1103
population dynamics – Kostova T., 261 – Hamaied S., 343 – Arditi R., 1037
population growth modelurban dynamics – El Ghordaf J., 977
population waves – Kostova T., 261
Populus – Rolando C., 799
Populus alba – Roiron P., 125
positional information – Fleury V., 663
predation – Measey G.J., 65 – Vakanas G., 763
predator-dependence – Arditi R., 1037

predator-prey model – Poggiale J.-C., 1058
protein folding – Chomilier J., 431
protein phosphatase 1 – Garcia A., 93
protein-protein interactions – Eisenstein M., 409
proteome – Tourmen Y., 1095
pseudo-data – Thompson J.R., 181
psychophysical measurements – Jacquot L., 305
pyrin domain – Kohl A., 1077

R

Radopholus similis – Guedira A., 745
rat – Gharbi N., 12
ratio-dependence – Arditi R., 1037
reactive oxygen species – Sorg O., 649
receptors – Gordon S., 603
red deer – Janeau G., 1143
release of elements – Couret H., 21
REP-PCR fingerprinting – Moawad H., 445
reproductive isolation – Borsa P., 1113
reproductive period – Hamaied S., 335
reproductive phenology – Hamaied S., 335
resistance – Guedira A., 745
rhizobia – Moawad H., 445
rhizosphere – Selosse M.-A., 639
Richards growth model – Damgaard C., 255
robinia – Yamauchi K., 791

S

¹⁸S rDNA – Bonnaud L., 133
saddle-node and Hopf bifurcation – Bernard S., 201
saddle-point approximation – Tyrcha J., 193
sampling method – Latour D., 105
scavenger receptors – Gordon S., 603
scorpion – Lourenço W.R., 77 – Lourenço W.R., 1151
seasonal breeding – Hamaied S., 343

seasonal reproduction – Hamaied S., 335
seaweeds – Kaimoussi A., 361
secondary structure – Chomilier J., 431
selection model – Dupas S., 139
self – Miller J., 399 – Pradeu T., 481
self-assembly – Gradwell S.E., 945
self-organisation – Maini P.K., 225 – Kostova T., 261 – Vakanas G., 763
SEM – Lourenço W.R., 77
semigroup – Arino O., 245
seminal roots – Sahnoune M., 389
sensory abilities – Lecchini D., 159
serine proteases – Di Cera E., 1065
shattering – Banasiak J., 1025
sigmoidal curves – Thellier M., 1017
signaling pathway – Akira S., 581
signature – Garcia A., 93
SIMEST – Thompson J.R., 181
simulation – Muller G., 1 – Thompson J.R., 181
size-asymmetric competition – Damgaard C., 255
size spectrum – Arino O., 245
size-structured model – Arino O., 245
sleeping sickness – Muller G., 1
slime mold – Maini P.K., 225
softening – Salmén L., 873
soil depth – Sahnoune M., 389
soil-ecosystem engineers – Measey G.J., 65
soil macrofauna – Lavelle P., 629
spatial heterogeneity – Poggiale J.-C., 1058
spatio-temporal plankton dynamics – Medvinsky A.B., 277
speciation – Nowicka A., 283
specific dephosphorylation – Garcia A., 93
spider – Vakanas G., 763
SPR – Gradwell S.E., 945
stability – Katri P., 1009 – Poggiale J.-C., 1058
stress – Dupas S., 139
stress intensity – Sahnoune M., 389
structure prediction – Eisenstein M., 409
subperiodicity – Pichon G., 1087
substochastic semigroups – Banasiak J., 1025

sulphate-reducing bacterium – Cravo-Laureau C., 687
swine – Leus K., 735
Swissprot library – Garcia A., 93
symbiosis – Selosse M.-A., 639
synchrony – Bady P., 29
syringin – Rolando C., 799
syringyl lignin biosynthesis – Yamauchi K., 791
syringyl units – Joseleau J.-P., 809
systematics – Borsa P., 1113

T

TEM immunocytochemistry – Daniel G., 861
temperate forest – Janeau G., 1143
temporal structure – Bady P., 29
tension wood – Pilate G., 889
TGF β 1 – Castriconi R., 533
thioacidolysis – Gellerstedt G., 817
thrombin – Di Cera E., 1065
tidal flat – Timsit O., 51
time delay – Medvinsky A.B., 277 – Bachar M., 983
tissue structure – Fleury V., 663
TLR family – Beutler B., 571
T lymphocytes – Miller J., 399
tolerance – Pradeu T., 481
Toll – Irving P., 557
Toll-like receptors – Beutler B., 571 – Akira S., 581
tracer experiment – Yamauchi K., 791
transient protein associations – Thellier M., 1017
transport – Vakanas G., 763
trans-splicing – Pergolizzi R.G., 695
travelling wave – Matzavinos A., 995
travertine – Roiron P., 125
trigeminal stimulation – Jacquot L., 305
troglobitic – Lourenço W.R., 1151
trophic interactions – Arditi R., 1037
tumor growth – Thompson J.R., 181
tumour cells – Matzavinos A., 995
Tunisia – Hamaied S., 343
type I interferon – Beutler B., 571

U

Ulva lactuca – Kaimoussi A., 361

V

vasopressinergic axis – Gharbi N., 12

vegetation history – Aubert S., 381

vertebrates – Measey G.J., 65 – Renous S., 99

W

web building parameters – Thévenard L., 84

white rot – Daniel G., 861

wood – Gril J., 881

wood fibres – Salmén L., 873

X

xylans – Reis D., 785

Y

yield stability – de Vallavieille-Pope C., 611

Z

zinc chloride – Lachenal D., 911

Zygiella x-notata – Thévenard L., 84
