Accepted after revision 3 June 2015

Available online 18 August 2015

The journal *Comptes rendus Biologies* has recently published an article devoted to DNA barcoding in amphibians (S. Grosjean et al., Improving biodiversity assessment of anuran amphibians using DNA barcoding of tadpoles. Case studies from Southeast Asia, C. R. Biologies 338 (2015) 351–361).

As supplementary data to this article, a table provided GenBank accession numbers, which were unfortunately incomplete for some sequences.

An updated and comprehensive table is now available, and we publish it online, as a supplementary material, on request of the author.
