

## Keyword index

### A

• Acidity .....	529
• Actinide biochemistry .....	1010
• Actinide chemistry .....	1010
• Actinides.....	859, 883, 929, 948, 978, 1001, 1092, 1128
• Active site .....	433
• Aerial oxidation .....	313
• Aggregation number .....	1034
• Air-based oxidations .....	305
• Alcohol oxidation .....	284
• Alcohols .....	721
• Aldehydes .....	721
• Alkane functionalization.....	305
• 1-Alkyl-1,10 <i>b</i> -dihydro[1,2,4]oxadiazolo4, 3- <i>c</i> -benzoxathiazin-3-ones 5,5-dioxides .....	827
• <i>Allium roseum</i> .....	820
• Allylic substitution reactions .....	188
• Allylic substitution .....	206
• Alumina.....	1162
• Am(III) .....	1020
• Americium .....	994
• Amine oxidases.....	313
• Amino acids .....	251
• $\beta$ -Aminoalcohols .....	652
• Aminyl radicals.....	721
• Ammonium .....	832
• Amphiphilic iron chelators .....	613
• Analcime.....	546
• <i>Ansa</i> -metallocene .....	883
• Anthryl-[1,2,5,6-tetrahydro-pyridyl] methanol.....	1180
• Antibacterial activity .....	820
• Antiferromagnetic interactions .....	473
• Antiferromagnetic order .....	37
• Antiferromagnetism .....	15
• Antiprismatic .....	583
• Antisymmetric exchange interaction .....	116
• Artificial hemoproteins.....	684
• Artificial metalloenzymes.....	678
• <i>N</i> -Arylsulfonyloxazolidin-2-ones .....	251
• Asymmetric catalysis .....	188, 213, 678
• Asymmetric heterogeneous hydrogenation .....	1180
• Asymmetric hydrogenation .....	178
• Asymmetric synthesis.....	220
• Asymmetry .....	138, 433
• ATP hydrolysis .....	742
• Au–Si binary .....	658

### B

• Baylis–Hillman reaction .....	630
• Benzene.....	637

• 2-(1 <i>H</i> -Benzimidazol-2-yl)-phenol .....	1200
• Benzoate .....	493
• Benzylidene derivatives .....	813
• Bimetallic complexes .....	421
• Binary .....	916
• Binding constant .....	1034
• Binuclear.....	482
• Biocatalysis .....	152
• Bioinorganic chemistry.....	355, 392, 421
• Biomimetic .....	341
• Biomimetic oxygenation.....	355
• Biomimetic systems .....	392
• Bioremediation .....	1067, 1092
• Biotin–avidin technology .....	678
• Bis-(trichloromethyl)carbonate.....	251
• Bis-macrocycles .....	832
• Bismuth .....	583
• Bleach .....	326
• Bonding.....	905
• Boron chemistry .....	622
• Britholites .....	1137

### C

• Caesium.....	1137
• Calcite .....	511
• Carbonate .....	978
• <i>O</i> -Carboxy anhydrides .....	775
• Carboxylate .....	341
• Carboxylic functions.....	529
• Catalase .....	341
• Catalysis .....	138, 178, 313, 326, 380, 721
• Catalyst recycling .....	152
• Catalytic antibodies .....	684
• Catalytic mechanism.....	271
• Catalytic oxidation .....	598
• Catechol oxidase .....	271
• Catechol-1,2-dioxygenases .....	366
• Ceramic tiles .....	502
• Characterizations .....	644
• Charge order .....	37
• Charge-density matching .....	897
• Charge-density wave.....	6
• Chelating agents .....	1010
• Chelation of iron.....	742
• Chemical components.....	820
• Chiral diboron reagents .....	138
• Chiral modifiers .....	1180
• Chiral thioether .....	188
• Chirality in Co(III) complexes .....	1170
• Chlorosulfonylisocyanate .....	827

• Clay mineral .....	1050
• Clays .....	502
• <i>Clostridium acetobutylicum</i> .....	756
• [4Fe—4S] Cluster .....	742
• Cluster compounds .....	89
• Co(III) amine complexes .....	1170
• CO/olefin insertion .....	666
• Colorimetric Method .....	529
• Colossal magnetodielectricity .....	37
• Colour .....	1227
• Complex fluid .....	1034
• Complex fluids .....	1042
• Complexation .....	529
• Complexation thermodynamics .....	916
• Complexes .....	905
• Computational protein design .....	703
• Conducting polymers .....	558
• Conformational equilibrium .....	524
• Conglomerate crystallization of Co(III) complexes .....	1170
• Conjugated polymer .....	1234
• Co–NO <sub>2</sub> complexes .....	1170
• Coordination polymer .....	82
• Copper centers .....	731
• Copper(II) carboxylate complex .....	284
• Copper(II) dimer .....	473
• Copper(II) peroxo intermediate .....	284
• Copper .....	89, 101, 421
• Coumarine .....	1162
• Crown ethers .....	1020
• Crystal structure .....	101, 469, 590, 883, 897
• Crystallization .....	498
• Cu coordination polymer .....	109
• Cyclen .....	832
• Cyclic hydronium cations .....	232
• Cyclic voltammetry .....	482, 535
• Cyclisation .....	234
• Cyclohexane .....	637
• Cyclohexene .....	637
• Cytochrome P450 .....	684

**D**

• Database .....	948
• De novo protein design .....	703
• Decorporation .....	1010
• Density functional theory .....	82, 178, 1227
• DFT .....	888
• DFT calculations .....	573, 1078
• DFT magnetic anisotropy .....	65
• Diamine ligands .....	213
• Diarylethene .....	1227
• Diboration .....	138
• 1,2-Dibromocyclohexane .....	524
• Dickite .....	1050
• Dicyanamide .....	101
• Diiron protein .....	703
• 2,4-Dimethyl-cyclohex-3-ene carboxaldehyde .....	259
• 3,3-Dimethylglutarate .....	489
• 1,1-Dimethylguanidinium .....	466
• Dinuclear copper complex .....	295
• Dinuclear manganese .....	341
• Diorganotin .....	489
• 1,4-Dioxane-2,5-diones .....	775
• Dioxygen .....	284, 392
• Diphenyl-2,6 styryl-4 and diphenyl-4,6 styryl-2 pyrylium salts .....	535
• Disorder .....	79

• Dissolution .....	529
• Distributions .....	116
• DNA repair .....	756
• Dopamine $\beta$ -hydroxylase .....	731
• Drug metabolism .....	392
• DRX .....	1137
• Dry ashing .....	839
• DTPA .....	916
• DTPA+IDA .....	916

**E**

• Edge site .....	1050
• EDTA complexes .....	929
• Electrical conduction .....	96
• Electrochemical impedance spectroscopy .....	558
• Electrochemical polymerisation .....	1234
• Electron transfer .....	742
• Electronic phase transitions .....	6
• Electronic spectra .....	1227
• f-Element ions separation .....	1026
• Enantiopure aryl-tetrahydro methanols .....	1180
• Enantioselective hydrogenation .....	678
• Enantioselectivity .....	152
• Energy transfer .....	622
• Environment .....	1092
• Enzymatic catalysis .....	775
• Enzyme mimics .....	421
• Epibromhydrination .....	652
• Epoxide .....	652
• Equilibria .....	905
• Equilibrium constants .....	948
• Equivalent-electrical circuit .....	558
• ESI-MS .....	71
• Essential oil .....	820
• Esters .....	259
• Ethylene oligomerization .....	1200
• Etymology .....	850
• Europium .....	994, 1050
• EXAFS .....	859, 872
• Excess values .....	1157
• <i>Excoquere</i> .....	850
• Extraction .....	1001, 1020

**F**

• Fast-flow reactor .....	518
• Feldspar .....	502
• Ferromagnetism .....	52
• Ferrophites .....	206
• Fluorescence .....	622
• Fouling .....	803
• Fractal dimension .....	803
• FTIR .....	71
• Functional and structural models .....	366
• Functionalized cyclopentadienyl .....	883

**G**

• GC-MS .....	820
• GcpE .....	748
• GF-AAS .....	839
• Glass transition .....	498
• Glasses .....	498
• Glutarate .....	489
• Groundwaters .....	978

**H**

- H-bonds.....466
- Half-sandwich.....1195
- Heisenberg model.....15, 60
- Heme peptide.....380
- Heme.....414
- Hemeproteins.....392
- Hexafluorophosphate.....1122
- History.....850
- Homogeneous catalysis.....152, 220
- Humic acid.....803
- Hybrid DFT.....766
- Hybrid material.....1001
- Hydrazide.....473
- Hydrazine.....1147
- Hydrogen peroxide.....284, 326
- Hydrogenation.....213
- Hydrolysis.....978, 1122
- Hydronium anions.....1209
- Hydronium cations with charge +2.....232
- Hydrothermal synthesis.....1216
- Hydroxides.....959
- $\alpha$ -Hydroxy acids.....775
- 2-Hydroxybenzylidenealkylamines.....827
- Hydroxylamine.....414

**I**

- Iminoester.....1147
- Immobilization.....1128
- In situ conductivity.....1234
- Indacene.....622
- Infrared.....466, 469, 489, 493, 552
- Infrared and Raman spectroscopies.....1137
- Inorganic ions.....1187
- Intrinsic colloids.....1060
- Ion transport.....1108
- Ionic liquid.....1131
- Ionic liquids.....152, 1117
- Ions at interfaces.....1042
- Iridium.....178, 721
- Iron.....850
- Iron chelation.....613
- Iron nutrition.....613
- Iron phthalocyanine.....598
- Iron porphyrins.....392
- Iron(II) complexes.....125
- Iron(III) complexes.....366, 590
- Iron–sulfur.....756
- Iron–sulphur proteins.....748
- Irreversible processes.....535
- Isoindole–isoindoline isomers.....813
- Isomerism in hydronium anions.....1209
- Isoprenoid biosynthesis.....748
- Isotopic chemistry.....1042
- Isotopic dilution.....994

**K**

- K10.....1162
- Kaolinite-rich clay.....511
- Kinetic.....637
- Kinetics.....1117
- Knoevenagel.....1162

**L**

- Langmuir isotherm.....1034
- Lanthanides.....573, 1020
- Late-transition metal–oxo complexes.....305
- Laundry.....326
- LD-LISC Effect.....125
- Ligand design.....220
- Ligand folding.....71
- Ligand synthesis.....178
- *Liquescere*.....850
- Liquid–liquid extraction.....1034
- Liquid–vapor interface.....1131
- Low-dimensional spin systems.....109
- LytB.....748

**M**

- Macroalgae.....839
- Magnetic circular dichroism.....125
- Magnetic field effects.....6, 60
- Magnetic measurement.....590
- Magnetic molecular conductors.....37
- Magnetic molecules.....15
- Magnetic properties.....71, 89
- Magnetic system.....60
- Magnetism.....125
- MALDI-TOF.....234
- Manganese.....71
- Matrices.....1128
- Mechanical properties.....502, 511
- Mechanism.....295
- Melting.....850
- Membrane permeability.....994
- Metal catalysis.....152
- Metalloenzyme.....433
- Metalloporphyrins.....684
- Metalloprotein.....703
- Metal–insulator transition.....37
- Metal–ligand bonding.....888
- Methane combustion.....1216
- Methylacrylate.....666
- Methylerythritol phosphate pathway.....748
- MFI-UF.....803
- Michael reaction.....630
- Microbial reduction.....1067
- Microorganisms.....1092
- Microperoxidase.....380
- Microporous materials.....284
- Microstructure.....502
- Microwaves.....234, 1216
- Mn(IV)-radical complex.....313
- Model complexes.....271, 433
- Modeling.....766
- Modified fouling index.....803
- Molecular dynamics.....859, 1131
- Molecular interaction.....1157
- Molecular magnetism.....65
- Molecular magnets.....21
- Molecular superconductors.....68
- Molten salt.....1131
- Monodentate phosphates.....206
- Montmorillonite.....1078
- Montmorillonite clay.....1108
- Montmorillonite K10.....1162

• Montmorillonite KSF .....	1162
• Morphological characteristics .....	511
• Mössbauer spectroscopy .....	466, 469, 489, 493, 552
• Multiscale .....	1108
• Myoglobin mutants .....	380
• Myoglobin reconstitution .....	380

**N**

• Nano-SIMS .....	1060
• Nanofiltration .....	994
• Nanomagnets .....	65
• Nanosciences .....	1042
• Nanowhiskers .....	658
• $\beta$ -Naphthol .....	1187
• Naphtyl-1,2,5,6-tetrahydro-pyridyl methanol .....	1180
• Natural products .....	721
• Neodymium .....	1195
• Neptunium .....	1122
• Ni-A .....	766
• Ni-B .....	766
• Nickel complex .....	1200
• NiFe-hydrogenase .....	766
• Nitric oxide .....	414
• Nitroalkanes .....	355
• Nitrogenase .....	742
• Nitrones .....	827
• 2-Nitropropane dioxygenase .....	355
• NMR .....	493
• $^1\text{H}$ and $^{13}\text{C}$ NMR .....	916
• $^{19}\text{F}$ NMR .....	271
• NMR spectroscopy .....	469
• Nonlinear transport .....	37
• Np .....	1060
• Nuclear waste .....	1067, 1108
• Nuclear waste separation .....	1026

**O**

• Octamethylcyclotetrasiloxane .....	518
• Olfactory properties .....	259
• Optical absorption edge .....	498
• Optical gap .....	498
• Organic compounds .....	96
• Organic conductors .....	6
• Organic ligands .....	948
• Organic superconductors .....	68, 96
• Organic–inorganic composites .....	897
• Organoaluminium .....	206
• Organocatalysis .....	152, 775
• Organometallic chemistry .....	220
• Out-of-plane coordination .....	583
• Oxidation catalysis .....	341
• Oxidation .....	380, 421, 637, 721
• Oxides .....	959
• Oxidized states .....	766
• Oxygen mobility .....	1216

**P**

• Palladium .....	188
• Palladium complexes .....	666
• Partitioning .....	872
• Peptidylglycine $\alpha$ -hydroxylating monooxygenase .....	731

• Perovskites .....	1216
• Peroxidase .....	380, 684
• Phase transition .....	21, 52
• Phase-transfer catalysis .....	234, 652
• Phase-transfer catalyst .....	630
• Phenomenological theories .....	68
• Phenoxazinone synthase .....	313
• Phenoxonium .....	295
• Phenoxyl radical .....	295
• Phosphate .....	529
• Phosphine sulfide ligands .....	1026
• Phosphinine .....	573
• Phosphinooxazoline ligands .....	666
• Photocatalysis .....	1187
• Photochromism .....	1227
• Photomineralization .....	1187
• Phthalocyanine .....	482
• Pincer ligands .....	573
• Plackett–Burman design .....	839
• Plutonium(IV) complexes .....	929
• Plutonium .....	959, 1122, 1128
• Polar molecules .....	1157
• Poly(isosorbide-ether)s .....	234
• Polybithiophene .....	558
• Polyesters .....	775
• <i>Trans</i> -polyisoprene .....	1195
• Polymerisation catalysis .....	1195
• Polynuclear transition metal complexes .....	71
• Polyoxometallate .....	637
• Polyrotaxanes .....	1234
• Porphyrin .....	414, 583
• Potassium graphite .....	795
• Potentiometry .....	568, 929
• Pressure .....	21
• Protein interaction .....	742
• Proton-sponge .....	832
• Prussian blue analogues .....	21
• Pu(IV) colloids .....	959
• Pu .....	1060
• $\text{PuO}_{2+x}$ .....	959
• Pyridyl .....	883
• Pyrolytic graphite .....	414

**Q**

• Quantum chemistry .....	859, 905
• Quantum critical points .....	79
• Quinone–ketal .....	295
• Quinones .....	598

**R**

• Radioactive waste .....	948
• Radioactivity .....	1128
• Radionuclides .....	1092
• Reaction mechanism .....	630
• Reaction rate constant .....	518
• Redox properties .....	535
• Redox reactions .....	959
• Redox-active ligands .....	313
• Reduction .....	414, 568
• Research of new materials .....	604
• Resistance model .....	803
• $\text{Rh}/\text{Al}_2\text{O}_3$ .....	644
• Room-temperature ionic liquids .....	1122

• Rotamers .....	524
• Ruthenium(II,III) carboxylate complex .....	284
• Ruthenium .....	213

## S

• S-Adenosylmethionine .....	756
• Salen .....	326
• 2-Salicylichydrazono-1,3-dithiolane.....	590
• Sandwich complexes .....	89
• Schiff base .....	473, 568
• Screening .....	839
• Selective oxidation .....	684
• Selenium .....	1092
• Self-repairing catalysts .....	305
• Self-repairing materials .....	1042
• SEM/EDAX .....	546
• Separation chemistry .....	1042
• Separation .....	994, 1020
• Siderophores .....	613
• Silica .....	1001
• Silicon nanoparticles.....	795
• S-ligands .....	188
• Smelting .....	850
• SnCl <sub>4</sub> .....	552
• SnCl <sub>5</sub> <sup>-</sup> .....	552
• SnCl <sub>6</sub> <sup>2-</sup> .....	552
• Soft donor chelates .....	1026
• Soft matter .....	622
• Solid-state <sup>13</sup> C and <sup>117</sup> Sn NMR .....	466
• Sol-gel .....	1001
• Solubility.....	959
• Solution thermodynamics .....	929
• Solvent-free conditions .....	652
• Solvent effects.....	524
• Sorption.....	1050, 1078
• Sound velocity .....	1157
• Speciation .....	929, 1010, 1060, 1067
• Spectroelectrochemistry .....	482
• Spectrophotometry .....	929
• Spectroscopy.....	489, 493, 1050, 1078
• Spin crossover.....	21, 125
• Spin models .....	79
• SPL .....	756
• Spore photoproduct.....	756
• Stability .....	498
• Stability constants.....	568
• Stereochemistry .....	1209
• Stokes shifts .....	622
• Streaming potential.....	803
• Strontium.....	1137
• Structure .....	905
• Structure and function .....	703
• Structure optimization .....	82
• Sulfate .....	905
• Sulfite .....	978
• Sulphate .....	978
• Sulphur poisoning.....	1216
• Superconductivity.....	6, 37
• Superoxide anion .....	731
• Supported catalysts.....	598, 644
• Supports .....	644
• Supramolecular network, H-bond.....	590

• Supramolecular organization .....	1034
• Surface complexation modeling .....	1078
• Surface functions .....	795
• Sustainable nuclear energy .....	1042
• SVLS mechanism .....	658
• Symmetry .....	1157

## T

• Technetium .....	1092
• Template .....	1234
• Ternary .....	916
• Terpyridine .....	326
• Tetrachlorosilane.....	795
• Thermodynamics .....	658, 948, 959
• Thermolysis .....	518
• Thiazyl radical .....	52
• Thienopyrimidoisoindolone .....	813
• Thiophene .....	1234
• Thiosulphate .....	978
• Thorium.....	1122
• Three-leg ladder .....	15
• Tim Merso basin .....	546
• TiO <sub>2</sub> .....	1187
• Titania .....	1078
• Transition metals.....	573
• Transition states .....	766
• Transition-metal complexes .....	138
• Transmission electron microscopy .....	604
• Trapping of hydronium anions in crystalline lattices.....	1209
• Triazole .....	1147
• Triazolone .....	1147
• Triazolopyrimidine .....	1147
• Trichloroacetic acid .....	1020
• Trichlorodimethylstannate(IV) .....	469
• Tridentate ligands .....	473
• Triferric complexes.....	116
• Triphenoxymethane platform .....	1026
• Triphenyltin derivative .....	466
• Triphenyltin residues .....	493
• Trivalent actinides.....	872, 888
• Trivalent lanthanides.....	888
• TRLFS .....	872, 916
• TTA .....	1117

## U

• Ultrafiltration .....	803
• Uranium .....	883, 897, 1067
• Uranyl .....	905
• Uranyl ion.....	1078
• Uranyl selenate .....	897

## V

• Valence tautomerism.....	21
• Vitamin K <sub>3</sub> .....	598
• Voltammetry .....	414

## W

• Work index .....	502
--------------------	-----

**X**

- X-ray diffraction .....552
- X-ray diffraction studies of Co(III) complexes .....1170
- X-ray diffraction techniques .....604
- X-rays .....546
- XANES .....859, 1060
- Xanthine oxidase .....731

- XPS .....1060
- XRD .....1137

**Z**

- Zeolite .....546
- Zinc .....482
