### Comptes Rendus Chimie

#### French/Nordic Special Issue on Materials and Coordination Chemistry

---

Dear Colleagues,

We are writing to you as Guest Editors of a Special Issue of the open-access diamond electronic journal *Comptes Rendus Chimie* highlighting French and Nordic research **on materials and coordination chemistry**. Both French-Nordic collaborative papers and papers from individual countries are welcome. These should lead to the identification of common scientific interests among researchers based in the Nordic countries (Denmark, Finland, Iceland, Norway, Sweden,) and France, which in turn **should foster future collaborations and exchange of ideas as well as mobility of young or senior researchers**.

We welcome short communications, full papers, and review articles. The deadline for the receipt of manuscripts is **September 1<sup>st</sup>, 2023** (no further extension), but early submissions would be much appreciated. Publication is provisionally scheduled for fall time.

All papers will be peer-reviewed according to the standard *Comptes Rendus Chimie* practice. There are no templates for the articles. **There are no publication charges and no charge for color graphics**. See: <https://comptes-rendus.academie-sciences.fr>

We would be grateful if you could let us know rapidly about your intention to contribute. Instructions for manuscript preparation and online submission can be found at:

[https://comptes-rendus.academie-sciences.fr/chimie/page/soumettre-votre-article\\_fr/](https://comptes-rendus.academie-sciences.fr/chimie/page/soumettre-votre-article_fr/)

Please indicate in your cover letter and upon submission (you will have to select the French/Nordic issue option) that your paper is intended for the:

**French/Nordic Special Issue on Materials and Coordination Chemistry.**

We hope you will be able to submit a manuscript to highlight (or initiate) collaborations between France and Nordic countries. **The website is OPEN**. Many thanks in advance for your precious collaboration.

Sincerely yours,

Prof. Abhik Ghosh, The Arctic University, UiT, Tromsø, Norway

Prof. Claude P. Gros, Université de Bourgogne, Dijon, France
