

**Annexe A.**

Tab. A.1: GPS Height rate and 1-sigma uncertainties estimates, relative to the ITRF2005 reference frame. Selected stations span more than five years with no discontinuities in their time series. HPT denotes the Helmert's Parameter Transformation (14-HPT : three translations, three rotations, and scale factor and their rates of change). 14-HPT and 07-HPT height rates are derived, respectively, from the GLOBK weekly combined solutions and the linear trend of the GLOBK daily height time series over the whole period (1998-2009).

Tableau A.1. Déplacements verticaux GPS et incertitudes suivant le repère de référence ITRF2005. Les séries temporelles des stations sont sélectionnées en fonction du critère de continuité, sur une période de cinq ans au moins. HPT sont les paramètres de transformation de Helmert (14-HPT : trois translations, trois rotations, un facteur d'échelle et leurs vitesses associées). 14-HPT et 07-HPT résultent, respectivement, de la combinaison des solutions hebdomadaires de GLOBK, et de la tendance linéaire des solutions journalières de GLOBK, pour la période entière de 1998 à 2009.
