

# COMPTES RENDUS GEOSCIENCE

Volume 351 (2019) – No. 6 – August–September

---

*Cover illustration:* Vietnamese spinels from Luc Yen and An Phu mining districts. Spinels (Spl) in a calcitic (Cal) marble, Cong Troi. Left: octahedral spinel associated with calcite (Cal). Right: gem crystals of pink spinel in a calcitic (Cal) marble. Photographs: Vincent Pardieu. From Fallick, A.E., et al., 2019. Remarkably uniform oxygen isotope systematics for co-existing pairs of gem-spinel and calcite in marble, with special reference to Vietnamese deposits. *C. R. Geoscience* 351 (1), 27–36.

---

## **Review paper (Applied Geophysics)**

- Geophysical methods for mapping Quaternary sediment thickness: Application to the Saint-Lary basin (French Pyrenees)  
**Pierre Bottelin, Grégory Dufrécho, Lucia Seoane, Muriel Llubes and Bernard Monod** ..... 407

## **Internal Geophysics**

- Phosphatic series under Plio-Quaternary cover of Tadla Plain, Morocco: Gravity and seismic data  
**Nadia El Kiram, Mohammed Jaffal, Azzouz Kchikach, Driss El Azzab, Mustapha El Ghorfi, Oussama Khadiri, Es-Said Jourani, Ahmed Manar and Mohamed Nahim** ..... 420
- Crustal structure beneath the Mount Cameroon region derived from recent gravity measurements  
**Severin Nguiya, Marcelin Mouzong Pemi, Alain Pierre Tokam, Évariste Ngatchou Heutchi and Willy Lemotio** ..... 430

## **Hydrology, Environment (Geomorphology)**

- Groundwater recharge study based on hydrological data and hydrological modelling in a South American volcanic aquifer  
**Maurício D. Melati, Fernando M. Fan and Gustavo B. Athayde**..... 441

## **Stratigraphy, Sedimentology**

- Holocene palaeogeographical reconstruction and relative sea-level changes in the southeastern part of the island of Samos (Greece)  
**Niki Evelpidou, Kosmas Pavlopoulos, Konstantinos Vouvalidis, George Syrides, Maria Triantaphyllou, Anna Karkani and Theodoros Paraschou** ..... 451
