Editorial

Editor's note

We wish to draw the attention of the readers of *Comptes rendus Geoscience* to two thematic issues of our companion journals *Comptes rendus Physique* (volume 16, issue No. 1, 2015, pp. 1–138) and *Comptes rendus Mécanique* (volume 343, issue No. 2, 2015, pp. 75–178), respectively devoted to “Granular Physics” and to “Mechanics of granular and polycrystalline solids”. In particular, the issue of snow avalanches, which is of interest to the

community of geoscientists, is widely discussed in these two dossiers.
