

KEYWORD INDEX (vol. 330)

2D bluff-body: Iraj Mortazavi, p. 409
 3-D spanwise effects: Matteo Luca Facchinetti, p. 451
k- ϵ model: Stéphane Petitot, p. 749

A

Absolute and convective instabilities: Mahmoud Hamadiche, p. 769
 Acoustics: Yann Marchesse, p. 1; Xavier Gloerfelt, p. 13; Xavier Amandolese, p. 101; Jeremiah Rushchitsky, p. 175; Nicole Turbé, p. 391; Christophe Bogey, p. 527
 Adaptive meshing: Houman Borouchaki, p. 709
 Adjoint: Christophe Airiau, p. 259
 Aeroacoustics: Xavier Amandolese, p. 101
 Analytical calculation: Najib Laraqi, p. 39
 Analytical mechanics: Chi Tran, p. 609; Qi-Chang He, p. 691
 Anisotropic: Djamel Ahmed Chacha, p. 581
 Anisotropy: Michel Grédiac, p. 107; Hantanirina Ranarivelo, p. 273; Charles Ruimy, p. 469
 Annular Hele–Shaw cell: Sepehr Ramezani, p. 633
 Approximate sphere: D. Srinivasa Charya, p. 417
 Artificial diffusion: Caroline Sart, p. 159
 Asymptotic analysis: Djamel Ahmed Chacha, p. 581
 Asymptotic behaviour: Rabha Khatyr, p. 69
 Asymptotic decomposition: Franck Fontvieille, p. 507
 Asymptotic expansions: Kamyar Madani, p. 535
 Asymptotic methods: Hantanirina Ranarivelo, p. 273
 Asymptotic partial decomposition of domain: Grigori Panasenko, p. 735
 Asymptotic theory: Jacques Mauss, p. 697
 Augmented Lagrangian: Pierre Alart, p. 819
 Axisymmetric body: D. Srinivasa Charya, p. 417
 Axisymmetric loading: Charles Ruimy, p. 469

B

Backflow: Thierry Godin, p. 837
 Barchans: Olivier Dauchot, p. 185
 Baroclinic waves: Pierre Maubert, p. 365
 Bearing capacity: Jean Salençon, p. 319; Jean Salençon, p. 521
 Bingham fluid: Rabha Khatyr, p. 69
 Biomechanics: Salah Naili, p. 483; Quentin Grimal, p. 569
 Blasius flow: Sylvie Saintlos, p. 673
 Bond: Arnaud Castel, p. 45
 Bonding: Fouad Zaittouni, p. 359
 Bone: Patrick R. Onck, p. 717
 Boundary layer: Monica De Angelis, p. 21; Mohammed Guedda, p. 279; Jacques Mauss, p. 697
 Boundary layers: Alain Bourgeat, p. 371; Basile Audoly, p. 425
 Bounds: Nicolas Bilger, p. 127
 Bubbly flow: Henda Djéridi, p. 113

C

Calculus of variations: Gilles Francfort, p. 225
 Cavitation: Henda Djéridi, p. 113

Cavity noise: Xavier Gloerfelt, p. 13
 Cellular solids: Patrick R. Onck, p. 717
 Centrifugal forces: Sepehr Ramezani, p. 633
 CFD: Stéphane Petitot, p. 749
 Circular footing: Jean Salençon, p. 521
 Clay: Karim Beddiar, p. 893
 Cloudy air: Pierre-Antoine Bois, p. 627
 Cluster of contacts: Najib Laraqi, p. 141
 Cluster of drops: Véronique Quintilla, p. 811
 Cohesion: Jean-Yves Delenne, p. 475
 Combustion: Albert Simeoni, p. 783; Véronique Quintilla, p. 811
 Complex Young's modulus: Ramzi Othman, p. 849
 Composite arche: Kamyar Madani, p. 535
 Composites: Michel Grédiac, p. 107; Czesław Woźniak, p. 267
 Compression tests: Sandrine Bardet, p. 549
 Computational aeroacoustics: Christophe Bogey, p. 527
 Computational AeroAcoustics (CAA): Xavier Gloerfelt, p. 13
 Computational fluid dynamics: Vitaly A. Volpert, p. 353
 Computational fluid mechanics: Omar El Yahyaoui, p. 27; Christophe Hazard, p. 57; Tonino Sophy, p. 193; Yves Pomeau, p. 207; Thierry Gallouët, p. 445; Anthony M.J. Davis, p. 457; Sepehr Ramezani, p. 633; Sylvie Saintlos, p. 673; Stéphane Petitot, p. 749; S.N. Antontsev, p. 797
 Computational solid mechanics: Michel Grédiac, p. 107; Cédric Lelu, p. 133; Hantanirina Ranarivelo, p. 273; Mohand Ameziane Hamadouche, p. 305; El Mostafa Daya, p. 333; Alain Bourgeat, p. 371; Jean-Yves Delenne, p. 475; Franck Fontvieille, p. 507; Serguei A. Nazarov, p. 603; Gregory P. Panasenko, p. 667; Pierre Ladeveze, p. 683; Pierre Alart, p. 819; Rachid El Mokhtari, p. 825; Michel Belieud, p. 843; Jean-Luc Battaglia, p. 857
 Concentrated masses: Yuri Golovaty, p. 777
 Configurational stability: Véronique Lazarus, p. 437
 Confined buckling: Pierre Alart, p. 819
 Confinement: Jean Salençon, p. 319; Jean Salençon, p. 521
 Confinment: Alexandre Delache, p. 885
 Conic propagation: Sébastien Guenneau, p. 491
 Contact: David Ryckelynck, p. 499
 Continuum mechanics: Habib Ammari, p. 199; James Casey, p. 285; Giuseppe Geymonat, p. 403; Charles Ruimy, p. 469; Mongi Mabrouk, p. 543; Patrick R. Onck, p. 717
 Continuum media: Monica De Angelis, p. 21
 Control: Xavier Amandolese, p. 101; Piermarco Cannarsa, p. 397
 Convection: Vitaly A. Volpert, p. 353
 Convective and absolute instability: Ewa Tuliska-Sznitko, p. 91
 Convex difference: Pierre Alart, p. 819
 Coplanar propagation: Véronique Lazarus, p. 437
 Copper: Philippe Viot, p. 653
 Coriolis forces: Sepehr Ramezani, p. 633
 Corrosion: Arnaud Castel, p. 45
 Cosserat theory: Patrick R. Onck, p. 717
 Couette Taylor: Henda Djéridi, p. 113
 Crack: Gilles Francfort, p. 225

Keyword index (vol. 330)

Crack front: Véronique Lazarus, p. 437
Cracking: Arnaud Castel, p. 45
Creeping blood flow: Sunčica Čanić, p. 661
Crushing: Houman Borouchaki, p. 709
Curvature: Quentin Grimal, p. 569
Cylinder: Emmanuel Dériat, p. 35
Cylindrical voids: Yves-Patrick Pellegrini, p. 763

D

Damage: Vincent Pensée, p. 147; Kamyar Madani, p. 535; Vincent Deudé, p. 587; Damien Claire, p. 729
Data filter: José-Maria Fullana, p. 647
Debonding: Gilles Francfort, p. 225; Kamyar Madani, p. 535
Deep bed filtration: Ion Iliuta, p. 563
Deformed conduit: Meryem Sijelmassi, p. 153
Design: Cédric Lelu, p. 133
Detailed chemical kinetics: Véronique Quintilla, p. 811
Diagnostic: Arnaud Castel, p. 45
Die Pressing: Philippe Viot, p. 653
Differential equations: Jacques Mauss, p. 697
Diffuse approximation: Tonino Sophy, p. 193
Diffuse approximation techniques: Pierre Villon, p. 313
Diffuse interface: Vitaly A. Volpert, p. 353
Digital image correlation: Giuseppe Geymonat, p. 403
Dimensioning: Cédric Lelu, p. 133
Direct numerical simulation: Ewa Tuliska-Sznitko, p. 91; Pierre Maubert, p. 365; Emerson Barbosa, p. 791
Discontinuities: Caroline Sart, p. 159
Discrete models: Bilel Ben Boubaker, p. 871
Dispersed bubbles: Ion Iliuta, p. 563
Dispersion relation: Ramzi Othman, p. 849
Dissipative materials: Henryk Petryk, p. 121
Domain decomposition: Pierre Ladeveze, p. 683
Double diffusion: Pierre-Antoine Bois, p. 627
Drag: D. Srinivasa Charya, p. 417
Draping simulation: Bilel Ben Boubaker, p. 871
Ductile behavior: Yves-Patrick Pellegrini, p. 763
Ductile damage: Houman Borouchaki, p. 709
Dunes: Olivier Dauchot, p. 185
Dynamic: Ahmed Benallal, p. 339
Dynamical systems: Matteo Luca Facchinetti, p. 451
Dynamics: Ramzi Othman, p. 849

E

Earth-flattening: Quentin Grimal, p. 569
Earthquake dynamics: Sophie Peyrat, p. 235
Eastern Channel: Caroline Sart, p. 159
Effective stress: Dariusz Lydzba, p. 297; Márcio A. Murad, p. 865
Elastic rods: Basile Audoly, p. 831
Elastic shells: Basile Audoly, p. 425
Elasticity: Gilles Francfort, p. 225; Kamyar Madani, p. 535; Mongi Mabrouk, p. 543
Electric arc: Stéphane Sire, p. 83
Electro-filtration: Karim Beddiar, p. 893
Electro-osmosis: Karim Beddiar, p. 893
Electrochemical method: Frédéric Barbeau, p. 433
Energy: Henryk Petryk, p. 121

Energy method: S.N. Antontsev, p. 797
Equilibrium state: Vadim Pavlov, p. 757
Error estimate: Houman Borouchaki, p. 709
Error estimates: Franck Fontvieille, p. 507
Euler equations: Thierry Gallouët, p. 445
Evanescent modes: Smail Naasse, p. 9
Exchanger: Stéphane Petitot, p. 593; Stéphane Petitot, p. 749
Existence and nonuniqueness: Mohammed Guedda, p. 279
Expansive clays: Márcio A. Murad, p. 865
Experimental validation: Jean-Yves Delenne, p. 475

F

Falkner–Skan flow: Sylvie Saintlos, p. 673
Fatigue: Gilles Francfort, p. 225; Sophie Peyrat, p. 235
Feedback dissipative field: S.N. Antontsev, p. 797
Ffowcs Williams–Hawkings analogy: Xavier Gloerfelt, p. 13
Fiber: Michel Bellieud, p. 843
Finite element: Franck Fontvieille, p. 507
Finite elements: Christophe Hazard, p. 57
Finite plastic strain: Houman Borouchaki, p. 709
Finite-differences method: Thierry de Lorenzo, p. 181
Fire spread modelling: Albert Simeoni, p. 783
Fluid flow: Tonino Sophy, p. 193
Fluid mechanics: Yann Marchesse, p. 1; Smail Naasse, p. 9; Omar El Yahyaoui, p. 27; Emmanuel Dériat, p. 35; Anthony Beaudoin, p. 51; Rabha Khatyr, p. 69; Prabu Parthasarathy, p. 77; Ewa Tuliska-Sznitko, p. 91; Henda Djéridi, p. 113; Meryem Sijelmassi, p. 153; Caroline Sart, p. 159; Jean Piquet, p. 167; Christophe Airiau, p. 259; Abdelaziz Boudlal, p. 291; Mahmoud Al Radi, p. 327; Jérôme Métral, p. 347; Vitaly A. Volpert, p. 353; Olivier Séro-Guillaume, p. 383; Iraj Mortazavi, p. 409; D. Srinivasa Charya, p. 417; Frédéric Barbeau, p. 433; Matteo Luca Facchinetti, p. 451; Stéphane Petitot, p. 593; Pierre-Antoine Bois, p. 627; Michèle Siouffi, p. 641; José-Maria Fullana, p. 647; Sunčica Čanić, p. 661; Jacques Mauss, p. 697; Vladimir Kozlov, p. 723; Vadim Pavlov, p. 757; Mahmoud Hamadiche, p. 769; Emerson Barbosa, p. 791; Thierry Godin, p. 837
Fluid structure interaction: Mahmoud Hamadiche, p. 769
Foams: Patrick R. Onck, p. 717
Foundation: Jean Salençon, p. 319
Fractal representation: Najib Laraqi, p. 141
Fracture: Gilles Francfort, p. 225; Sophie Peyrat, p. 235
Freak wave: Didier Clamond, p. 575
Free surface flows: Abdelaziz Boudlal, p. 291
Full-field measurements: Damien Claire, p. 729
Functional cotation: Cédric Lelu, p. 133
Fundamental eigenvalue: Vladimir Kozlov, p. 723
Fuzzy logic: Cédric Lelu, p. 133; Chi Tran, p. 609

G

Galerkin method: Michèle Siouffi, p. 641
Gas–liquid reactors: Ion Iliuta, p. 563
Gases: Yves Pomeau, p. 249
Generalized continua: Patrick R. Onck, p. 717
Geostrophic turbulence: Pierre Maubert, p. 365
Geostrophy: Jean Piquet, p. 167
Global model: Alain Bourgeat, p. 371
Godunov schemes: Thierry Gallouët, p. 445

Keyword index (vol. 330)

Granular media: Olivier Dauchot, p. 185; Dariusz Lydzba, p. 297; Dan-Gabriel Calugaru, p. 377; Jean-Yves Delenne, p. 475; Ion Iliuta, p. 563; Philippe Viot, p. 653; Jolanta Lewandowska, p. 879
Great integration interval: Grigori Panasenکو, p. 735
Ground effect: Emmanuel Dériat, p. 35
Growth in biology: Basile Audoly, p. 831
Gurson model: Yves-Patrick Pellegrini, p. 763

H

Half-circular cylinder: Tonino Sophy, p. 193
Heat conduction: Najib Laraqı, p. 39; Najib Laraqı, p. 141
Heat flux: Jean-Luc Battaglia, p. 857
Heat sources: Najib Laraqı, p. 39
Heat transfer: Najib Laraqı, p. 39; Najib Laraqı, p. 141; Thierry de Lorenzo, p. 181; Mostafa Najam, p. 461; Mostafa Najam, p. 461; Vincent Gatto, p. 615
Helmholtz equation: Habib Ammari, p. 199
Heterogeneity: Hantanirina Ranarivelo, p. 273
Heterogeneous fluids: Pierre-Antoine Bois, p. 627
Heterogeneous materials: Sylvain Turgeman, p. 623
High altitude: Véronique Quintilla, p. 811
Homogenization: Sylvain Turgeman, p. 623
Homogenization: Dariusz Lydzba, p. 297; Alain Bourgeat, p. 371; Mongi Mabrouk, p. 543; Pierre Ladeveze, p. 683; Patrick R. Onck, p. 717; Joseph Pastor, p. 741; Yves-Patrick Pellegrini, p. 763; Márcio A. Murad, p. 865
Hopkinson bar: Ramzi Othman, p. 849
Hydrodynamic interactions: Thierry Godin, p. 837

I

Identification: Michel Grédiac, p. 107; Giuseppe Geymonat, p. 403; Damien Claire, p. 729
Ignition: Véronique Quintilla, p. 811
Image treatment: Frédéric Barbeau, p. 433
Impact: Quentin Grimal, p. 569
Inertia: Alexandre Delache, p. 885
Inhomogeneities: Qi-Chang He, p. 691
Injury: Quentin Grimal, p. 569
Instabilities: Vadim Pavlov, p. 757
Instability: Xavier Amandolese, p. 101; Mahmoud Al Radi, p. 327; Didier Subrin, p. 513; Bile Ben Boubaker, p. 871
Instability and transition in rotating flows: Ewa Tuliska-Sznitko, p. 91
Integral operator: Vladimir Kozlov, p. 723
Integral radiative transfer equation: Grigori Panasenکو, p. 735
Interaction: Didier Clamond, p. 575
Interface: Najib Laraqı, p. 39; Najib Laraqı, p. 141; Mahmoud Al Radi, p. 327; Dan-Gabriel Calugaru, p. 377; Quentin Grimal, p. 569
Interfaces: Qi-Chang He, p. 691
Interfacial tension: Vitaly A. Volpert, p. 353
Inverse method: Jean-Luc Battaglia, p. 857
Inverse problem: Michel Grédiac, p. 107; Dan-Gabriel Calugaru, p. 377; Giuseppe Geymonat, p. 403; Damien Claire, p. 729

J

Jet noise: Christophe Bogey, p. 527

K

Karhunen–Loève expansion: David Ryckelynck, p. 499
Kinematical approach: Didier Subrin, p. 513
Kinetic retardation: Yves Pomeau, p. 207
Koiter’s model: Hantanirina Ranarivelo, p. 273
Krylov subspace: David Ryckelynck, p. 499

L

Laminar boundary layer: Sylvie Saintlos, p. 673
Laminar flow in ducts: Salah Naili, p. 483
Laminar forced convection: Rabha Khatyr, p. 69
Large Eddy Simulation: Christophe Bogey, p. 527
Large eddy simulation: François Beaubert, p. 803
Laser Doppler velocimetry: Stéphane Petitot, p. 593
Layered media: Quentin Grimal, p. 569
Limit analysis: Joseph Pastor, p. 741
Limit cycle: M. Habibou Maitournam, p. 703
Linear stability: Sepehr Ramezani, p. 633; Michèle Siouffi, p. 641
Linear stability analysis: Ewa Tuliska-Sznitko, p. 91
Linearized Euler equations: Jérôme Métral, p. 347
Loading criteria: James Casey, p. 285
Local minimization: Pierre Alart, p. 819
Localization: Ahmed Benallal, p. 339
Localization effect: S.N. Antontsev, p. 797
Low frequencies: Yuri Golovaty, p. 777

M

Mass transfer: Mahmoud Al Radi, p. 327
Material engineering: Stéphane Sire, p. 83
Maxwell’s equations: Christophe Hazard, p. 57
Mechanical behaviour: Jean-Yves Delenne, p. 475; Bile Ben Boubaker, p. 871
Mechanics: Véronique Quintilla, p. 811
Mechanics of solids and structures: Rachid El Mokhtari, p. 825
Medium frequencies: Yuri Golovaty, p. 777
Mesocracking: Vincent Pensée, p. 147; Vincent Deudé, p. 587
Metallic powder: Philippe Viot, p. 653
Microgravity: Vitaly A. Volpert, p. 353
Micromechanics: Vincent Pensée, p. 147; Vincent Deudé, p. 587; Patrick R. Onck, p. 717
Milling tool: Jean-Luc Battaglia, p. 857
Miscible fluid: Vitaly A. Volpert, p. 353
Mixed convection: Mostafa Najam, p. 461; Alexandre Delache, p. 885
Mixed mode: Véronique Lazarus, p. 437
Modal logic: Chi Tran, p. 609
Model: Arnaud Castel, p. 45
Model reduction: David Ryckelynck, p. 499
Modelling: Czesław Woźniak, p. 267; Sandrine Bardet, p. 549
Module: Hantanirina Ranarivelo, p. 273
Moist air: Pierre-Antoine Bois, p. 627
Moving contact line: Yves Pomeau, p. 207
Moving mesh: Houman Borouchaki, p. 709
Multi-layer: Charles Ruimy, p. 469
Multi-objective optimization: Chi Tran, p. 609
Multi-valued logic: Chi Tran, p. 609
Multiphase model: Albert Simeoni, p. 783
Multiple solutions: Mostafa Najam, p. 461
Multiscale: Pierre Ladeveze, p. 683

Keyword index (vol. 330)

N

Natural convection: Sepehr Ramezani, p. 633
Navier–Stokes with memory: Olivier Séro-Guillaume, p. 383
Neutral inclusions: Qi-Chang He, p. 691
Noise reduction: Yann Marchesse, p. 1
Non-incremental approach: David Ryckelynck, p. 499
Non-integer derivation: Jean-Luc Battaglia, p. 857
Non-linear higher order equation: S.N. Antontsev, p. 797
Non-linear models: Omar El Yahyaoui, p. 27
Nonlinear mechanics: Pierre Alart, p. 819
Nonlinearity: Vincent Deudé, p. 587
Null controllability: Piermarco Cannarsa, p. 397
Numerical analysis: Jérôme Métrol, p. 347
Numerical convergence: Iraj Mortazavi, p. 409
Numerical method: M. Habibou Maitournam, p. 703
Numerical study: Mostafa Najam, p. 461; Vadim Pavlov, p. 757

O

Onsager: Karim Beddiar, p. 893
Open channel flows: Abdelaziz Boudlal, p. 291
Optimization: Mohand Ameziane Hamadouche, p. 305; José-Maria Fullana, p. 647; Joseph Pastor, p. 741
Orthogonal cutting: Houman Borouchaki, p. 709
Ostwald's coefficient: Dan-Gabriel Calugaru, p. 377

P

Parabolic equations: Piermarco Cannarsa, p. 397
Partial asymptotic decomposition of domain: Gregory P. Panasenko, p. 667
Partial differential equations: Monica De Angelis, p. 21
Partial homogenization: Gregory P. Panasenko, p. 667
Partial measurements: Habib Ammari, p. 199
Particle method: Anthony Beaudoin, p. 51
Path-dependence: Henryk Petryk, p. 121
Perfect plasticity: Nicolas Bilger, p. 127; Yves-Patrick Pellegrini, p. 763
Periodic array: Sébastien Guenneau, p. 491
Periodical heat flux: Thierry de Lorenzo, p. 181
Perturbation: Ahmed Benallal, p. 339
Perturbations: Meryem Sijelmassi, p. 153
Phase field: Yves Pomeau, p. 207
Phenomenological model: Albert Simeoni, p. 783
Physics of cellular: Salah Naili, p. 483
Piston Stokes flow: Anthony M.J. Davis, p. 457
Plane turbulent impinging jet: François Beaubert, p. 803
Plasmas: Yves Pomeau, p. 249
Plasticity: James Casey, p. 285; Ahmed Benallal, p. 339
Plate: Fouad Zaittouni, p. 359; Djamel Ahmed Chacha, p. 581
Platelet activation: Mohan Anand, p. 557
Plugging: Ion Iliuta, p. 563
Poisson–Boltzmann: Márcio A. Murad, p. 865
Poroelasticity: Vincent Pensée, p. 147
Poroplasticity: Dariusz Lydzba, p. 297
Porous media: Nicolas Bilger, p. 127; Vincent Pensée, p. 147; Mohammed Guedda, p. 279; Dariusz Lydzba, p. 297; Ahmed Benallal, p. 339; Olivier Séro-Guillaume, p. 383; Joseph Pastor, p. 741; Yves-Patrick Pellegrini, p. 763; Márcio A. Murad, p. 865; Jolanta Lewandowska, p. 879; Alexandre Delache, p. 885

Porous medium: D. Srinivasa Charya, p. 417
Potential flow: Emmanuel Dériat, p. 35
Pressure-strain: Jean Piquet, p. 167
Propagation: Quentin Grimal, p. 569

R

Radon: Dan-Gabriel Calugaru, p. 377
Random contacts: Najib Laraqi, p. 39
Random walk: Iraj Mortazavi, p. 409
Realisability: Jean Piquet, p. 167
Receptivity: Christophe Airiau, p. 259
Reconstruction problem: Habib Ammari, p. 199
Reflection coefficient: Smail Naasse, p. 9
Regularization theory: José-Maria Fullana, p. 647
Reinforced concrete: Arnaud Castel, p. 45
Remeshing in large deformation: Houman Borouchaki, p. 709
Resonator: Xavier Amandolese, p. 101
Reversal: Vincent Gatto, p. 615
Rheology: Sandrine Bardet, p. 549; Mohan Anand, p. 557; Sylvain Turgeman, p. 623; Pierre-Antoine Bois, p. 627
Robin's condition: Dan-Gabriel Calugaru, p. 377
Roll waves stability: Abdelaziz Boudlal, p. 291
Rotating flow: Emerson Barbosa, p. 791
Rotating systems: Pierre Maubert, p. 365
Rupture: Yves Pomeau, p. 249; Jean-Yves Delenne, p. 475

S

Scale change: Najib Laraqi, p. 141
Secondary flow: Stéphane Petitot, p. 593; Stéphane Petitot, p. 749
Self-consistent model: Sylvain Turgeman, p. 623
Self-switching of waves: Jeremiah Rushchitsky, p. 175
Sensitivity: Christophe Airiau, p. 259
Shakedown: Mohand Ameziane Hamadouche, p. 305
Shallow shell: Djamel Ahmed Chacha, p. 581
Shallow water flows: Abdelaziz Boudlal, p. 291
Shear flow: Emmanuel Dériat, p. 35
Shear layer: Xavier Amandolese, p. 101
Shear thinning: Mohan Anand, p. 557
Signal processing: Ramzi Othman, p. 849
Silica: Stéphane Sire, p. 83
Simplified flow: Albert Simeoni, p. 783
Simulation: Stéphane Petitot, p. 593
Singular perturbation: Franck Fontvieille, p. 507; Sylvie Saintlos, p. 673
Singular perturbations: Jacques Mauss, p. 697
Singularities of solutions: Christophe Hazard, p. 57
Sloshing problem: Vladimir Kozlov, p. 723
Small dielectric inhomogeneities: Habib Ammari, p. 199
Soils: Jean Salençon, p. 319; Jean Salençon, p. 521; Jolanta Lewandowska, p. 879; Karim Beddiar, p. 893
Solids and structures: Arnaud Castel, p. 45; Henryk Petryk, p. 121; Nicolas Bilger, p. 127; Czesław Woźniak, p. 267; Pierre Villon, p. 313; El Mostafa Daya, p. 333; Fouad Zaittouni, p. 359; Basile Audoly, p. 425; David Ryckelynck, p. 499; Djamel Ahmed Chacha, p. 581; M. Habibou Maitournam, p. 703; Houman Borouchaki, p. 709; Basile Audoly, p. 831; Bilel Ben Boubaker, p. 871
Soliton envelope: Didier Clamond, p. 575
Solvability condition: Anthony M.J. Davis, p. 457

Keyword index (vol. 330)

Spark: Véronique Quintilla, p. 811
Spectral analysis: Yuri Golovaty, p. 777
Stability: Henryk Petryk, p. 121; Christophe Airiau, p. 259
Static: Ahmed Benallal, p. 339
Statistical physics: Yves Pomeau, p. 249
Steady shear flow: Salah Naili, p. 483
Stokes flow: Thierry Godin, p. 837
Stokes system: S.N. Antontsev, p. 797
Superconductivity: Monica De Angelis, p. 21
Supersonic jets: Yann Marchesse, p. 1
Surface energy: Gilles Francfort, p. 225
Suspension: Thierry Godin, p. 837
Swell: Smail Naasse, p. 9
Swelling (disjoining) pressure: Márcio A. Murad, p. 865
Symmetry-breaking: Emerson Barbosa, p. 791
System identification: Jean-Luc Battaglia, p. 857

T

T.P.I.E.: Olivier Séro-Guillaume, p. 383
Temperature: Sandrine Bardet, p. 549; Philippe Viot, p. 653; Jean-Luc Battaglia, p. 857
Temperature effects: Yann Marchesse, p. 1
Terzagli: Jean Salençon, p. 319
Thermal boundary layer: Thierry de Lorenzo, p. 181
Thermal constriction: Najib Laraqi, p. 39; Najib Laraqi, p. 141; Vincent Gatto, p. 615
Thermal contact resistance: Najib Laraqi, p. 39; Najib Laraqi, p. 141
Thermodynamics: Yves Pomeau, p. 249
Thermomechanics: M. Habibou Maitournam, p. 703
Thin anisotropic plate: Serguei A. Nazarov, p. 603
Thorax: Quentin Grimal, p. 569
Three-dimensional elasticity: Qi-Chang He, p. 691
Three-dimensional mechanism: Didier Subrin, p. 513
Three-segment probe: Frédéric Barbeau, p. 433
TIG welding: Stéphane Sire, p. 83
Transient laminar free convection: Thierry de Lorenzo, p. 181
Transition: Emerson Barbosa, p. 791
Trickling: Ion Iliuta, p. 563
Tunnel: Didier Subrin, p. 513
Tunnel face: Didier Subrin, p. 513
Tunnel-crack: Véronique Lazarus, p. 437
Turbulence: Omar El Yahyaoui, p. 27; Jean Piquet, p. 167; Pierre Maubert, p. 365; Stéphane Petitot, p. 593; François Beaubert, p. 803
TVD: Caroline Sart, p. 159
Two waves interaction: Jeremiah Rushchitsky, p. 175
Two-dimensional problem: Serguei A. Nazarov, p. 603
Two-phase flow: Véronique Quintilla, p. 811
Two-scale convergence: Mongi Mabrouk, p. 543

U

Uncertainties: Cédric Lelu, p. 133
Underground waste repository: Alain Bourgeat, p. 371
Unilateral conditions: Fouad Zaittouni, p. 359
Unilateral effects: Vincent Deudé, p. 587
Unsteady flow: Michèle Siouffi, p. 641

V

Van der Pol oscillator: Matteo Luca Facchinetti, p. 451
Variable wall heat flux: Rabha Khatyr, p. 69
Variational principle: Vladimir Kozlov, p. 723
Velocity measurements: Henda Djéridi, p. 113
Velocity profile: Meryem Sijelmassi, p. 153
Vertical jet: Mostafa Najam, p. 461
Vibrations: Yann Marchesse, p. 1; Xavier Gloerfelt, p. 13; Nicole Turbé, p. 391; Yuri Golovaty, p. 777
Viscoelasticity: Monica De Angelis, p. 21; Sandrine Bardet, p. 549; Mohan Anand, p. 557; Sunčica Čanić, p. 661
Viscoplasticity: Mohand Ameziane Hamadouche, p. 305; Philippe Viot, p. 653
Viscous dissipation: Rabha Khatyr, p. 69
Visualisation: Henda Djéridi, p. 113
Vortex: Stéphane Petitot, p. 593; Stéphane Petitot, p. 749
Vortex flow: Anthony Beaudoin, p. 51
Vortex method: Iraj Mortazavi, p. 409
Vortex shedding: Matteo Luca Facchinetti, p. 451

W

Wall shear stress: Frédéric Barbeau, p. 433
Water injection: Yann Marchesse, p. 1
Wave extrapolation method: Xavier Gloerfelt, p. 13
Waves: Yann Marchesse, p. 1; Xavier Gloerfelt, p. 13; Jeremiah Rushchitsky, p. 175; Nicole Turbé, p. 391; Sébastien Guenneau, p. 491; Quentin Grimal, p. 569; Didier Clamond, p. 575; Grigori Panasenko, p. 735; Ramzi Othman, p. 849
Weld penetration: Stéphane Sire, p. 83
Wood: Sandrine Bardet, p. 549
Woven structures: Bilel Ben Boubaker, p. 871

Y

Yield design: Jean Salençon, p. 319; Jean Salençon, p. 521; Sylvain Turgeman, p. 623
Yield design theory: Didier Subrin, p. 513
