

COMPTES RENDUS MECANIQUE

Tome 334 (2006) – N° 8–9

Thematic issue / Numéro thématique

Observation, analysis and modelling in complex fluid media

Special issue for the 60th birthday of Professor Roland Borghi

Guest editors / Rédacteurs en chef invités :

Fabien Anselmet, Christian Kharif

• Foreword Fabien Anselmet, Christian Kharif	463
• Foreword Roland Borghi	465
• Scalar dissipation and flame surface density in premixed turbulent combustion Kenneth N.C. Bray, Nedunchezian Swaminathan	466
• Raison d'être and general formulation of two-point statistical description of turbulent premixed combustion Alexey A. Burluka	474
• Iso-scalar surfaces, mixing and reaction in turbulent flows César Dopazo, Jesús Martín, Juan Hierro	483
• Dissipation element analysis of scalar fields in turbulence Norbert Peters, Lipo Wang	493
• Comparison of transported scalar PDF and velocity-scalar PDF approaches to 'Delft flame III' Dirk Roekaerts, Bart Merci, Bertrand Naud	507
• Significance of DNS in combustion science Tadao Takeno, Yasuhiro Mizobuchi	517
• Two recent developments in numerical simulation of premixed and partially premixed turbulent flames Luc Vervisch, Pascale Domingo	523

Suite du sommaire page suivante

Sommaire (suite)

- Turbulent channel flow concentration profile and wall deposition of a large Schmidt number passive scalar
Pedro L. Garcia-Ybarra, Alfredo Pinelli 531
- Sedimentation of small particles: how can such a simple problem be so difficult?
Élisabeth Guazzelli 539
- Modelling and simulation of powder-snow avalanches
Jocelyn Étienne, Marie Rastello, Emil J. Hopfinger 545
- On the modelling of piping erosion
Stéphane Bonelli, Olivier Brivois, Roland Borghi, Nadia Benahmed 555
- Settling classes for fine suspended particles
Christophe Brach-Papa, Patrick Boyer, Fabien Ternat, Muriel Amielh, Fabien Anselmet 560
- On the role of the Jeffreys' sheltering mechanism in sustaining extreme water waves
Jean-Paul Giovanangeli, Christian Kharif, Julien Touboul 568
