

## Keyword index Vol. 334, 2006

### A

- Abel's equation** – Panayotounakos D.E., 311  
**Accuracy** – Nicolet A., 91  
**Acoustics** – Nicolet A., 91 – Kostin I., 220 – Shuvalov A.L., 243 – Chatellier L., 259 – Maida M., 285 – Brenot D., 425 – Cochelin B., 639 – Lavandier M., 732  
**Active dispersion** – Yra A., 58  
**Adhesion** – Mefti N., 230  
**Aerodynamics** – Lehugeur B., 368  
**Analytical mechanics** – Panayotounakos D.E., 311  
**Anisotropy** – Fritsch A., 151 – Shuvalov A.L., 243 – Sauzay M., 353 – Monchiet V., 431 – Dormieux L., 440 – Desmorat R., 587  
**Annular flow** – Avci M., 164  
**Appell's equations** – Le Vey G., 170  
**Approximation** – Beda T., 628  
**Approximation methods** – Jézéquel F., 362  
**Aquifer** – Dridi L., 611  
**Aspect ratio** – Avci M., 164  
**Asymptotic analysis** – Mauss J., 42  
**Asymptotic methods** – Nicolet A., 91  
**Avalanches** – Étienne J., 545  
**Axissymmetric jets** – Gilard V., 74

### B

- Backward facing step** – Aider J.-L., 447  
**Binary mixtures** – Elhajjar B., 621  
**Biomechanics** – Fritsch A., 151 – DiCarlo A., 651 – Baudriller H., 662  
**Bone tissue** – DiCarlo A., 651

- Boundary formulation** – Pasol L., 105  
**Boundary layer** – Mauss J., 42  
**Brinkman number** – Avci M., 164  
**Brittle material** – Hild F., 8  
**Buckling** – Damil N., 674

### C

- Capillary** – Lucas Y., 196  
**Car** – Lehugeur B., 368  
**Carleman estimate** – Benabdallah A., 582  
**Cavitation** – Díaz J.I., 645  
**Cell** – Mefti N., 230  
**Cellular structure** – Matignon C., 238 – Luche J., 323 – Matignon C., 605 – Guilly V., 679  
**Cement** – Dormieux L., 304  
**CESTAC method** – Jézéquel F., 362  
**Channel flow** – Mauss J., 42  
**Chattering solutions** – Zelikin M.I., 292  
**Chemical kinetics** – Luche J., 323  
**Chemo-mechanical coupling** – Dormieux L., 304  
**Chlorinated solvents** – Pollet I., 143 – Dridi L., 611  
**Clay** – Dormieux L., 304  
**Clusterhead selection** – Delye de Clauzade de Mazieux A., 669  
**CND** – Rossignol J., 719  
**Combustion** – Matignon C., 238 – Luche J., 323 – Nicoli C., 408 – Roekaerts D., 507 – Takeno T., 517 – Vervisch L., 523 – Matignon C., 605  
**Composites** – Rossignol J., 719  
**Compressible flow** – Daru V., 25

- Compressible jets control** – Maida M., 285  
**Computational fluid mechanics** – Daru V., 25 – Wang H., 48 – Avci M., 164 – Lucas Y., 196 – Maida M., 285 – Ahipo Y.M., 380 – Nicoli C., 408 – Aider J.-L., 447 – Laizet S., 454 – Étienne J., 545 – Laguerre R., 593 – Mohammadi B., 634 – Le Maître O., 693  
**Computational solid mechanics** – Boutyour E.H., 68 – El Khalil Hachi B., 83 – Andrieux S., 225 – Zelikin M.I., 292 – Comte F., 317 – Carrière M., 328 – Ladevèze P., 399 – Monchiet V., 431 – Idiart M.I., 575 – Beda T., 628 – Markenscoff X., 701 – Izotova O.V., 707 – Durán M., 725  
**Computer science** – Jézéquel F., 362  
**Concave wall** – Gilard V., 74  
**Cone** – Mangin B., 117  
**Connections** – Mefti N., 230  
**Constitutive relation error** – Ladevèze P., 399  
**Contamination** – Dridi L., 611  
**Continuum mechanics** – Dormieux L., 111 – Millet O., 137 – Damil N., 674 – Rouxel T., 743  
**Contrast of scales** – Taghite M'B., 737  
**Control** – Chatellier L., 259 – Benabdallah A., 582  
**Control of separation** – Favier J., 272  
**Convection** – Oukada B., 205 – Elhajjar B., 621  
**Crack shielding** – Malésys N., 419  
**Cracking** – Dormieux L., 440  
**Cracks** – Andrieux S., 225  
**Creep** – Dormieux L., 304  
**Cross effect** – Panfilov M., 190

**Cubic elasticity** – Sauzay M., 353  
**Curvature** – Dopazo C., 483  
**Cyclic loading** – Mayoraz F., 1  
**Cylinder** – Lemaitre C., 158  
**Cytoskeleton** – Baudriller H., 662

## D

***d*-dominating set** – Delye de Clauzade de Mazieux A., 669  
**Damage** – Sauzay M., 353 – Challamel N., 414 – Dormieux L., 440 – Desmorat R., 587 – Rossignol J., 719  
**Damped Duffing nonlinear oscillator** – Panayotounakos D.E., 311  
**Darcy** – Panfilov M., 190  
**Deep convection** – Bois P.-A., 686  
**Defect motion** – Markenscoff X., 701  
**Deferred correction** – Ahipo Y.M., 380  
**Deformation** – Panfilov M., 190  
**Detonability** – Matignon C., 238 – Matignon C., 605  
**Detonation** – Matignon C., 238 – Luche J., 323 – Matignon C., 605 – Guilly V., 679  
**Differentially heated cavity** – Wang H., 48  
**Diffusion flame** – Nicoli C., 408  
**Diffusive flux** – Ahipo Y.M., 380  
**Direct Numerical Simulation** – Dopazo C., 483  
**Discrete Stochastic Arithmetic** – Jézéquel F., 362  
**Dispersion** – Zhang X., 13 – Mohammedi B., 634  
**Dispersion spectrum** – Shuvalov A.L., 243  
**Dissipation** – Charkaluk E., 373  
**Dissipation element** – Peters N., 493  
**DNS** – Takeno T., 517  
**Double porosity** – Panfilov M., 190  
**Drag** – Lehugeur B., 368  
**Drucker–Prager** – Dormieux L., 111  
**Drucker–Prager criterion** – Trillat M., 599  
**Duality-penalization algorithm** – Rodríguez-Arós Á., 279  
**Ductile porous metals** – Monchiet V., 431  
**Dynamic absorber** – Cochelin B., 639  
**Dynamic integrals** – Markenscoff X., 701  
**Dynamics of rigid or flexible systems** – Le Vey G., 170

## E

**Elastic junction** – Izotova O.V., 707  
**Elastic moduli** – Rouxel T., 743  
**Elastic plate** – Shuvalov A.L., 243  
**Elastic prestrained material** – Carrive M., 328  
**Elastic singularities** – Markenscoff X., 701  
**Elrod–Adams model** – Díaz J.I., 645  
**Embedded elliptical crack** – El Khalil Hachi B., 83  
**Error estimates** – Rodríguez-Arós Á., 279  
**Eshelby tensor** – Dormieux L., 440  
**Experimental** – Chatellier L., 259  
**Extreme water waves** – Giovanangeli J.-P., 568

## F

**Failure** – Mefti N., 230  
**Fatigue** – Monchiet V., 129 – Sauzay M., 353 – Charkaluk E., 373 – Malésys N., 419  
**Fick’s law** – Dridi L., 611  
**Fine particles** – Brach-Papa C., 560  
**Finite depth** – Aider R., 387  
**Finite element method** – Rodríguez-Arós Á., 279  
**Finite elements** – Nicolet A., 91 – Lavèze P., 399  
**Finite Least Squares** – Beda T., 628  
**Finite volume** – Ahipo Y.M., 380  
**Fitting hyperelastic models** – Beda T., 628  
**Flame anchoring** – Nicoli C., 408  
**Flames** – Vervisch L., 523  
**Floquet transform** – Chebli H., 347  
**Flow** – Corfdir A., 183  
**Fluid mechanics** – Piquet J., 34 – Mauss J., 42 – Gilard V., 74 – Castelain T., 98 – Pasol L., 105 – Mangin B., 117 – Poncet S., 123 – Oukada B., 205 – Henon F., 252 – Chatellier L., 259 – Favier J., 272 – Wei G., 298 – Fakhfakh W., 332 – Guyenne Ph., 341 – Lehugeur B., 368 – Aider R., 387 – Guazzelli É., 539 – Brach-Papa C., 560 – Giovanangeli J.-P., 568 – Bois P.-A., 686  
**Free boundary** – Corfdir A., 176 – Corfdir A., 183  
**Friction** – Rodríguez-Arós Á., 279  
**Fully discrete scheme** – Rodríguez-Arós Á., 279

## G

**Gauss principle** – Le Vey G., 170  
**Gauss–Legendre method** – Jézéquel F., 362  
**Ginzburg–Landau equation** – Damil N., 674  
**Glass** – Rouxel T., 743  
**Grain size distribution** – Mayoraz F., 1  
**Granular media** – Mayoraz F., 1 – Zhang X., 13 – Millet O., 137  
**Graph theory** – Delye de Clauzade de Mazieux A., 669  
**Gravitational instability** – Henon F., 252  
**Gravity effects** – Étienne J., 545  
**Green kernel** – Brenot D., 425  
**Growth and remodelling** – DiCarlo A., 651  
**Gurson material** – Pastor F., 213

## H

**Hamiltonian systems** – Guyenne Ph., 341  
**Heat transfer** – Luche J., 323 – Elhajar B., 621  
**Helicoidal coordinates** – Nicolet A., 91  
**Hessian** – Challamel N., 414  
**Heterogeneities** – Yra A., 58  
**Heterogeneous air** – Bois P.-A., 686  
**Heuristic** – Delye de Clauzade de Mazieux A., 669  
**High heterogeneity** – Panfilov M., 190  
**High Schmidt number asymptotics** – Garcia-Ybarra P.L., 531  
**Hill criterion** – Monchiet V., 431  
**Hill tensor** – Fritsch A., 151  
**Homogenization** – Dormieux L., 111 – Panfilov M., 190 – Kostin I., 220 – Dormieux L., 440 – Idiart M.I., 575 – Taghite M’B., 737  
**Hybridization** – El Khalil Hachi B., 83  
**Hydrogen** – Matignon C., 238 – Luche J., 323 – Matignon C., 605  
**Hydrogen jet lifted flame** – Takeno T., 517  
**Hypersonic** – Mangin B., 117

## I

**Ideal plasticity** – Idiart M.I., 575  
**Image analysis techniques** – Mayoraz F., 1

**Impinging jet** – Gilard V., 74  
**Instability** – Chatellier L., 259 – Laizet S., 454 – Laguerre R., 593  
**Integral formulation** – Brenot D., 425  
**Integral timescales** – Wei G., 298  
**Interior Helmholtz problem** – Brenot D., 425  
**Interior point optimization** – Pastor F., 213  
**Internal erosion** – Bonelli S., 555  
**Internal waves** – Guyenne Ph., 341  
**Inverse modelling** – Pollet I., 143  
**Inverse problem** – Benabdallah A., 582  
**Irreversible energy transfer** – Cocheulin B., 639

## J

**Janssen theory** – Millet O., 137  
**Jeffreys' mechanism** – Giovanangeli J.-P., 568  
**Jet** – Castelain T., 98  
**Junction** – Mefti N., 230

## K

**Kinematic dynamo** – Laguerre R., 593  
**Korn's inequality** – Izotova O.V., 707  
**KZK equation** – Kostin I., 220

## L

**Lagrangian correlation** – Wei G., 298  
**Lagrangian method** – Le Maître O., 693  
**Large eddy simulation** – Aider J.-L., 447  
**Large increment** – Comte F., 317  
**Length scales** – Peters N., 493  
**LES** – Wei G., 298  
**Lift-to-drag ratio** – Mangin B., 117  
**Limit analysis** – Dormieux L., 111 – Corfdir A., 176 – Corfdir A., 183 – Pastor F., 213 – Trillat M., 599  
**Liquid gas injector instabilities** – Nicoli C., 408  
**Liquid-vapor** – Daru V., 25  
**Local instability** – Damil N., 674  
**Local-global coupling** – Damil N., 674  
**Longitudinal vortex** – Lehugeur B., 368

**Loudspeaker** – Lavandier M., 732  
**Low Reynolds number** – Guazzelli É., 539  
**Lubrication** – Díaz J.I., 645

## M

**Magneto hydrodynamics** – Fakhfakh W., 332  
**Mass exchange** – Yra A., 58  
**Measurement** – Lavandier M., 732  
**Meniscus** – Lucas Y., 196  
**Methane** – Matignon C., 238  
**Microjet** – Castelain T., 98  
**Micromechanics** – Monchiet V., 129 – Fritsch A., 151 – Dormieux L., 304 – Charkaluk E., 373 – Dormieux L., 440  
**Micromixing** – Bray K.N.C., 466 – Roekaerts D., 507  
**Microwave detection** – Rossignol J., 719  
**Mixing layer** – Laizet S., 454  
**Modelling** – Étienne J., 545  
**Modes interactions** – Henon F., 252  
**Mohr–Coulomb criterion** – Millet O., 137  
**Molecular diffusion** – Bois P.-A., 686  
**Molecular transport effects** – Burluka A.A., 474  
**Morphology of gravels** – Mayoraz F., 1  
**Moving load** – Chebli H., 347  
**Multibody hydrodynamic interactions** – Guazzelli É., 539  
**Multiperiodicity** – Taghite M'B., 737  
**Multiple scale** – Damil N., 674  
**Multiscale approach** – Rouxel T., 743

## N

**Natural convection** – Wang H., 48  
**Newton–Cotes method** – Jézéquel F., 362  
**Newton–Euler** – Le Vey G., 170  
**Nitrogen dioxide** – Luche J., 323  
**Noise reduction** – Castelain T., 98  
**Non-associated plasticity** – Dormieux L., 111  
**Non-conservative system** – Challamel N., 414  
**Non-equilibrium** – Yra A., 58

**Non-ideal detonation** – Luche J., 323  
**Non-linear elasticity** – Challamel N., 414  
**Non-smooth coefficients** – Benabdallah A., 582  
**Nonlinear** – Cochelin B., 639  
**Nonlinear acoustics** – Kostin I., 220 – Henon F., 252  
**Nonlinear behavior** – Idiart M.I., 575  
**Nonlinear homogenization** – Dormieux L., 19  
**Nonlinear mechanics** – Ladevèze P., 399  
**Nonregular shape** – Baudriller H., 662  
**Nonsymmetric water waves** – Aider R., 387  
**Numerical algorithms** – Peigney M., 266  
**Numerical simulations** – Rodríguez-Arós Á., 279 – Vervisch L., 523 – Étienne J., 545 – Giovanangeli J.-P., 568  
**Numerical validation** – Jézéquel F., 362

## O

**Operational researches** – Delye de Clauzade de Mazieux A., 669  
**Optimal control** – Le Vey G., 170  
**Optimization** – Trillat M., 599  
**Orientation distribution** – Fritsch A., 151  
**Output of interest** – Ladevèze P., 399

## P

**Parabolic equations** – Benabdallah A., 582  
**Parallel walls** – Pasol L., 105  
**Parametric model** – Carrive M., 328  
**Passive scalar deposition** – Garcia-Ybarra P.L., 531  
**Passive scalar mixing** – Peters N., 493  
**Periodic structure** – Chebli H., 347  
**Peristaltic** – Panfilov M., 190  
**Phase transformation** – Peigney M., 266  
**Phase-change** – Daru V., 25  
**Photomechanics** – Hild F., 8  
**Piping** – Bonelli S., 555  
**PIV** – Chatellier L., 259 – Favier J., 272  
**Plumes** – Mohammadi B., 634  
**POD** – Favier J., 272

**Poisson equation** – Ahipo Y.M., 380  
**Poisson point process** – Malésys N., 419  
**Pollution** – Pollet I., 143  
**Polycrystal** – Sauzay M., 353  
**Polydisperse suspension** – Brach-Papa C., 560  
**Polynomial chaos** – Le Maître O., 693  
**Porous aquifer** – Pollet I., 143  
**Porous media** – Dormieux L., 19 – Yra A., 58 – Pollet I., 143 – Corfdir A., 176 – Corfdir A., 183 – Panfilov M., 190 – Pastor F., 213 – Dormieux L., 304 – Salager S., 393 – Trillat M., 599 – Dridi L., 611 – Taghite M'B., 737  
**Porous polycrystal** – Fritsch A., 151  
**Pressure-strain** – Piquet J., 34  
**Principle of virtual power** – DiCarlo A., 651  
**Probability density functions** – Roekaerts D., 507  
**Prolate and oblate voids** – Monchiet V., 431  
**PSB** – Monchiet V., 129  
**Pumping** – Cochelin B., 639

## Q

**Quadrature methods** – Jézéquel F., 362

## R

**Rain** – Lemaitre C., 158  
**Reactive media** – Luche J., 323 – Guilly V., 679  
**Realisability** – Piquet J., 34  
**Reciprocity gap** – Andrieux S., 225  
**Reduced order models** – Mohammadi B., 634  
**Reynolds equation** – Díaz J.I., 645  
**Rheology** – Sauzay M., 353  
**Rivulet** – Lemaitre C., 158  
**Rolling** – Mefti N., 230  
**Rotor-stator cavity** – Poncet S., 123  
**Rubber behavior** – Beda T., 628  
**Rupture** – Hild F., 8 – Sauzay M., 353

## S

**Saltation** – Zhang X., 13  
**Saturation curve** – Daru V., 25  
**Scalar dissipation rate** – Bray K.N.C., 466  
**Scalar mixing** – Bray K.N.C., 466 – Dopazo C., 483

**Scatter** – Sauzay M., 353  
**Schmid factor** – Sauzay M., 353  
**Sedimentation** – Pasol L., 105 – Guaz-zelli É., 539  
**Seismology** – Durán M., 725  
**Self-consistent scheme** – Charkaluk E., 373  
**Separation** – Elhajjar B., 621  
**Settling velocity** – Brach-Papa C., 560  
**Shallow convection** – Bois P.-A., 686  
**Shape-memory alloys** – Peigney M., 266  
**Shock** – Luche J., 323  
**Similarity** – Mohammadi B., 634  
**Singular perturbation** – Mauss J., 42  
**Singular regimes** – Zelikin M.I., 292  
**Small-disturbances** – Mangin B., 117  
**Small-scale mixing** – Burluka A.A., 474  
**Soils** – Salager S., 393 – Bonelli S., 555  
**Solid particles** – Zhang X., 13  
**Solids and structures** – Boutyour E.H., 68 – Peigney M., 266 – Comte F., 317 – Chebli H., 347 – Amosov A., 713  
**Solitary waves** – Guyenne Ph., 341  
**Soret effect** – Elhajjar B., 621  
**Source zone** – Pollet I., 143  
**Spectral Green's function** – Durán M., 725  
**Stability** – Poncet S., 123 – Oukada B., 205 – Fakhfakh W., 332  
**Stage approach** – Beda T., 628  
**Stationary phase** – Brenot D., 425  
**Stereoscopic PIV** – Gilard V., 74  
**Stochastic model** – Wei G., 298  
**Stochastic phenomena** – Mefti N., 230  
**Stochastic problem** – Le Maître O., 693  
**Strength** – Dormieux L., 19  
**Stress intensity factor** – El Khalil Hachi B., 83  
**Strong skewness** – Ahipo Y.M., 380  
**Surface conditions** – Lucas Y., 196  
**Surface radiation** – Wang H., 48  
**Synchronus solutions** – Oukada B., 205

## T

**Temperature modulation** – Oukada B., 205  
**Tensegrity** – Baudriller H., 662  
**Tensorial damage** – Challamel N., 414

**Thermo-hydric model** – Salager S., 393  
**Thermodiffusion** – Elhajjar B., 621  
**Thermogravitation** – Elhajjar B., 621  
**Thermomechanical coupling** – Peigney M., 266  
**Thin plates** – Izotova O.V., 707  
**Timoshenko beam** – Zelikin M.I., 292  
**Toughness** – Hild F., 8  
**Traditional PIV** – Gilard V., 74  
**Transfer** – Panfilov M., 190  
**Transport** – Mohammadi B., 634  
**Trees** – Delye de Clauzade de Mazieue A., 669  
**Triple point** – Lucas Y., 196  
**Turbulence** – Zhang X., 13 – Piquet J., 34 – Maidi M., 285 – Aider J.-L., 447 – Laizet S., 454 – Bray K.N.C., 466 – Burluka A.A., 474 – Dopazo C., 483 – Peters N., 493 – Roekaerts D., 507 – Vervisch L., 523 – Garcia-Ybarra P.L., 531  
**Turbulent channel flow** – Garcia-Ybarra P.L., 531  
**Turbulent combustion modeling** – Roekaerts D., 507  
**Turbulent concentration profile** – Garcia-Ybarra P.L., 531  
**Turbulent premixed combustion** – Burluka A.A., 474  
**Turbulent premixed flames** – Bray K.N.C., 466  
**Turbulent reacting flows** – Dopazo C., 483  
**Twisted fibres** – Nicolet A., 91  
**Two-particle cluster** – Pasol L., 105  
**Two-phase flow** – Lucas Y., 196 – Bonelli S., 555  
**Two-point probability density functions** – Burluka A.A., 474

## U

**Unilateral effect** – Challamel N., 414 – Desmorat R., 587  
**Unlimited endurance** – Monchiet V., 129  
**Unsaturated** – Dormieux L., 19  
**Upper bound** – Corfdir A., 176 – Corfdir A., 183  
**Upper bound method** – Pastor F., 213

## V

**Vapor flux** – Dridi L., 611  
**Verification** – Ladevèze P., 399

**Vibrations** – Nicolet A., 91 – Lemaitre C., 158  
**Vibro-acoustic** – Cochelin B., 639  
**Viscoelastic** – Oukada B., 205  
**Viscoelastic frictional contact** – Rodríguez-Arós Á., 279  
**Viscous dissipation** – Avci M., 164  
**Visualization** – Poncet S., 123  
**Vortex breakdown** – Lehugeur B., 368

## W

**Water retention curve** – Salager S., 393  
**Wavelets** – Comte F., 317  
**Waveriders** – Mangin B., 117  
**Waves** – Nicolet A., 91 – Shuvalov A.L., 243  
**Weibull model** – Malésys N., 419

**Weight function** – El Khalil Hachi B., 83  
**Wind** – Lemaitre C., 158

## Y
