

COMPTES RENDUS MECANIQUE

Tome 336 (2008) – N° 1–2

Successive stages of the deformation of a polycrystalline solid (after Parry, Evans and Hutchinson, this issue)

Thematic issue / Numéro thématique

Duality, inverse problems and nonlinear problems in solid mechanics /
Dualité, problèmes inverses et problèmes non-linéaires en mécanique des solides

Guest editors / *Rédacteurs en chef invités* :
Jean-Baptiste Leblond, Xanthippi Markenscoff

• Preface Jean-Baptiste Leblond, Xanthippi Markenscoff	3
• Selected works of H.D. Bui	7
• Duality and symmetry lost in solid mechanics Huy Duong Bui	12
• Microstructurally-based homogenization of electromagnetic properties of periodic media Alireza V. Amirkhizi, Sia Nemat-Nasser	24
• Shakedown in frictional contact problems for the continuum James R. Barber, Anders Klarbring, Michele Ciavarella	34
• Two non-linear finite element models developed for the assessment of failure of masonry arches Michele Betti, Georgios A. Drosopoulos, Georgios E. Stavroulakis	42
• Analytical and numerical evaluation of crack-tip plasticity of an axisymmetrically loaded penny-shaped crack Sumitra Chaiyat, Xiaoqing Jin, Leon M. Keer, Kraiwood Kiattikomol	54
• On the reconstruction of residual stresses after matter removal in rods Andrei Constantinescu, Abdelbacet Oueslati	69
• A homogenization-based constitutive model for two-dimensional viscoplastic porous media Kostas Danas, Martin I. Idiart, Pedro Ponte Castañeda	79
• Modelling of damage induced by contacts between solids Ky Dang Van	91

Suite du sommaire page suivante

Sommaire (suite)

• Solitary SH waves in two-layered traction-free plates Irini Djeran-Maigre, Sergey Kuznetsov	102
• Application of invariant integrals to elastostatic inverse problems Robert Goldstein, Efim Shifrin, Pavel Shushpannikov	108
• Adhesion effects in contact interaction of solids Irina Goryacheva, Yulya Makhovskaya	118
• Configurational forces as dissipative mechanisms: a revisit Anurag Gupta, Xanthippi Markenscoff	126
• Stress inversion method and analysis of GPS array data Muneo Hori, Takeshi Iinuma, Teruyuki Kato	132
• Effects of multi-scale roughness and frictional heating on solid body contact deformation Kyriakos Komvopoulos	149
• Is incompressible elasticity a conformal field theory? Markus Lazar, Charalampos Anastassiadis	163
• Periodic debonding of an adhesive film K.C. Le, Lev Truskinovsky	170
• A theoretical approach of strain localization within thin planar bands in porous ductile materials Jean-Baptiste Leblond, Gérard Mottet	176
• Dual integrals in small strain elasticity with body forces Vlado A. Lubarda, Xanthippi Markenscoff	190
• Travelling interface waves in a brake-like system under unilateral contact and Coulomb friction Quoc Son Nguyen, Abdelbacet Oueslati, Alois Steindl, Andreas Teufel, Hans Troger	203
• On temperature in thermoelastoplasticity Wojciech K. Nowacki, Joseph Zarka	210
• Initiation of geometric roughening in polycrystalline metal films Guillaume Parry, Anthony G. Evans, John W. Hutchinson	224
• Eigenspectra and orders of stress singularity at a mode I crack tip for a power-law medium Larisa Stepanova	232
• Optimal control approach in nonlinear mechanics Claude Stolz	238
• Ductile damage of porous materials with two populations of voids Pierre-Guy Vincent, Yann Monerie, Pierre Suquet	245
