

Keyword index Vol. 336, 2008

2D continuous wavelet transform – Mezghani S., 794
3D driven cavity – Ben Cheikh N., 800
3D lid-driven cavity – Ben Beya B., 863
3D orthogonal – Younes R., 704

A

Abrasive finishing – Mezghani S., 794
Abrupt contraction – Mahfoud M., 616
Acoustics – Jiménez-Fernández J., 411
Active control – Doche O., 289
Adaptive stochastic finite elements – Blatman G., 518
Adhesive film – Le K.C., 170
Ad-Hoc control – Doche O., 289
Advancing-front approach – Laug P., 506
Aeroacoustics – Casenave C., 398
Agar-Agar gel – Cherblanc F., 782
Aircraft noise reduction – Casenave C., 398
Algebraic development – Hamed H.B., 656
Analytical and numerical study – Er-Raki M., 304
Analytical Singular Value Decomposition – Bamford M., 440
Anisotropic class – Auffray N., 370 – Auffray N., 458
ANM – Charpentier I., 336 – Charpentier I., 788
Annulus – Srinivasacharya D., 820
Anomalous transport – Leoncini X., 530
Arch-fill interaction – Betti M., 42

Aspect ratio – Ben Cheikh N., 800
Asperities – Komvopoulos K., 149
Asymptotic analysis – Stepanova L., 232 – Marušić S., 493 – Saintlos Brillac S., 536 – Weller T., 572 – Arfaoui M., 737
Asymptotic behaviour – Antoni N., 341
Asymptotic expansion – Amirat Y., 693 – Chacha D.A., 846
Automatic differentiation – Charpentier I., 336
Averaging – Zenkovskaya S.M., 269
Axial transmission – Baron C., 722

B

Bifluid Stokes problem – Bui T.T.C., 524
Bifurcation – Cantin Y.G., 699 – Ben Beya B., 863
BiGlobal stability – Longueteau F., 828
Biomechanics – Lemaire T., 354
Blasius flow – Saintlos Brillac S., 536
Body force – Lubarda V.A., 190
Bone – Baron C., 722
Bone remodelling – Lemaire T., 354
Boundary layers – Fornet B., 454
Boundary value problem – Stolz C., 500
Bubble dynamics – Jiménez-Fernández J., 411

C

Capillary adhesion – Goryacheva I., 118
Carreau law – Millet S., 313

Catheterized artery – Srinivasacharya D., 820
Ceramic composite – Bamford M., 440
Coalescence – Leblond J.-B., 176
Colloidal suspension – Pasol L., 512
Combustion – Savre J., 807
Compatibilizer – Bouchart V., 714
Complementary energy – Lubarda V.A., 190
Composite materials – Younes R., 704
Compressible – Amaziane B., 600
Computational fluid mechanics – Simanovskii I.B., 262 – Brun C., 363 – Fornet B., 454 – Bui T.T.C., 524 – Saintlos Brillac S., 536 – Hérard J.-M., 650 – Hamed H.B., 656 – Delenne C., 766
Computational solid mechanics – Amirkhizi A.V., 24 – Goldstein R., 108 – Gupta A., 126 – Lubarda V.A., 190 – Toulemonde C., 275 – Fernández J.R., 559
Computer science – Charpentier I., 336 – Elmoataz A., 428
Computing Fluid Dynamics: CFD – Hamed H.B., 656
Concrete – Toulemonde C., 275 – François M., 417 – Le T.H., 670
Condensation – d'Almeida A., 612
Configurational force – Lubarda V.A., 190
Conformal field theory – Lazar M., 163
Conjugate Gradient – Tardieu N., 840
Conservation laws – Bui H.D., 12 – Lazar M., 163
Constitutive law – Vallée C., 851

Constriction – Srinivasacharya D., 820
Contact – Tardieu N., 840
Contact interaction – Goryacheva I., 118
Contact problems – Barber J.R., 34
Continuation – Charpentier I., 336 – Charpentier I., 788
Continuously varying properties – Baron C., 722
Continuum mechanics – Barber J.R., 34 – Forest S., 347 – Le T.H., 670
Continuum thermomechanics – Forest S., 347
Control – Hild P., 422
Convection – Zenkovskaya S.M., 269
Convolution operators – Casenave C., 398
Coulomb friction – Barber J.R., 34 – Chacha D.A., 846
Couple stress fluid – Srinivasacharya D., 820
Coupled frequencies – Amaouche M., 329
Crack interactions – Zhu Q.-z., 320
Crack monitoring – Ait Aouit D., 677
Crack speed – Ait Aouit D., 677
Crack tip plasticity – Chaiyat S., 54
Cracked media – Vincent P.-G., 297
Cracking – Lemaire T., 354
Cracks – Zhu Q.-Z., 376
Crustal deformation – Hori M., 132
Cumulative slips – Antoni N., 341
Cyclic loading – Stolz C., 238
Cyclic loads – Antoni N., 341
Cylinder wake – Brun C., 363

D

Damage – Dang Van K., 91 – Vincent P.-G., 245 – Leguillon D., 283 – Zhu Q.-z., 320 – Zhu Q.-Z., 376 – François M., 417 – Bouchart V., 471 – Fernández J.R., 559 – Ait Aouit D., 677 – Keralavarma S.M., 685 – Nouari M., 772
Debonding – Le K.C., 170
Defect identification – Goldstein R., 108
Degradation modes – Nouari M., 772
Diamant – Charpentier I., 788
Direct numerical simulation – Chicheportiche J., 586
Discontinuity – Réthoré J., 643
Discrete approach – Zhu Q.-Z., 376
Disjoint branch – Cantin Y.G., 699

Dissipative mechanisms – Gupta A., 126
Disturbance – Saintlos Brillac S., 536
DNS – Doche O., 289
Domain penalization method – Fornet B., 454
Drag reduction – Doche O., 289
Dry machining, Ti-6Al-4V – Nouari M., 772
DSC – Lopez J., 578
Dual and primal approach – Stolz C., 500
Dual integrals – Lubarda V.A., 190 – Stolz C., 434
Dual variables – Vallée C., 851
Duality – Bui H.D., 12
Ductile damage – Leblond J.-B., 176
Ductile Fracture – Stolz C., 434
Ductile materials – Leblond J.-B., 813
Ductile metals – Keralavarma S.M., 685
Dugdale approach – Chaiyat S., 54
Dynamic substructuring – Batifol C., 757
Dynamical systems – Hori M., 132 – Leoncini X., 530 – Kaplunov J., 553 – Bécu E., 565
Dynamics of rigid or flexible systems – Racila L., 404

E

Edge singularities – Apel T., 629
Eigenvalue problem – Hamed H.B., 656
Elastic periodic waveguide – Nazarov S.A., 751
Elastical modulus – Pasol L., 512
Elasticity – Leguillon D., 283 – Kaplunov J., 553 – Apel T., 629
Elastoplastic materials – Stolz C., 500
Electromagnetic properties – Amirkhizi A.V., 24
Electro-osmosis – Cherblanc F., 782
Energy momentum tensor – Lubarda V.A., 190
Entropy gradient – Forest S., 347
Error estimates – Fernández J.R., 559
Eshelby stress tensor – Lazar M., 163
Evaporation – d'Almeida A., 612
Exact solution – d'Almeida A., 612
Experimental set up – Dallot J., 487
Experimental study – Bouchart V., 714
Experimental validation – Bouchart V., 471

External approach – Leblond J.-B., 813

F

Falkner–Skan flow – Saintlos Brillac S., 536
Fast reaction – Meier S.A., 481
Fatigue – Hachi B.K., 390 – Desmorat B., 448 – Ait Aouit D., 677
Fatigue cycles – Ait Aouit D., 677
Fatigue elliptical crack growth – Hachi B.K., 390
Feedback control – Doche O., 289
Finite element – Toulemonde C., 275 – Moutou Pitti R., 545
Finite element analysis – Dang Van K., 91
Finite Element Analysis – Nouari M., 772
Finite strain – Vallée C., 851
Finite volumes method – Ben Cheikh N., 800
Flash method – Bamford M., 440
Flexible wall – Amaouche M., 329
Flow stability – Simanovskii I.B., 262
Fluid dynamics – Er-Raki M., 304
Fluid mechanics – Millet S., 313 – Amaouche M., 329 – Chicheportiche J., 586 – d'Almeida A., 612 – Mahfoud M., 616 – Lachouette D., 731 – Ben Cheikh N., 800 – Srinivasacharya D., 820 – Longueteau F., 828 – Ben Beya B., 863
Fluid/solid medium – Baron C., 722
Foundation – Grange S., 856
Fractal surfaces – Komvopoulos K., 149
Fracture mechanics – Stepanova L., 232 – Stolz C., 434 – Stolz C., 500
Free-boundary problem – Meier S.A., 481
Frequency model – Casenave C., 398
Fretting – Dang Van K., 91
Fretting fatigue – Barber J.R., 34
Friction – Komvopoulos K., 149 – Nguyen Q.S., 203 – Le van A., 606 – Chacha D.A., 846
Frictional heating – Komvopoulos K., 149

G

Gap in continuous spectrum – Nazarov S.A., 751
Gas of localized vortices – Bécu E., 565

Generalized heat equation – Forest S., 347
Generalized stress intensity factors – Apel T., 629
Geometrical modeling – Laug P., 506
Global instabilities – Chicheportiche J., 586
Global pressure – Amaziane B., 600
GPS (Global Positioning System) – Hori M., 132
Granular media – Laug P., 506 – Rioual F., 664
Graphite – Lopez J., 578
Grashof number – Simanovskii I.B., 262
Gravity-induced convection – Simanovskii I.B., 262
Gurson criterion – Danas K., 79

H

Half-space – d’Almeida A., 612
Hamiltonian chaos – Leoncini X., 530
Hamiltonian description – Bécu E., 565
Heat conduction – Marušić S., 493
Heat transfer – Doche O., 289 – Bamford M., 440 – Ouertatani N., 464 – Marušić S., 493 – Lopez J., 578
Heat transfer reduction – Doche O., 289
Hencky strain tensor – Vallée C., 851
High convection – Marušić S., 493
Hollow ellipsoid – Leblond J.-B., 813
Homogeneous and layered media – Komvopoulos K., 149
Homogenization – Danas K., 79 – Toulemonde C., 275 – Zhu Q.-z., 320 – Meier S.A., 481 – Dallot J., 487 – Meier S., 623 – Le T.H., 670 – Keralavarma S.M., 685 – Younes R., 704
Hybridization – Hachi B.K., 390
Hyperbolic conservation laws – Delenne C., 766
Hyperelasticity – Bouchart V., 471 – Arfaoui M., 737

I

Ideal plasticity – Vincent P.-G., 297
Identification of local constitutive relation – Hori M., 132
Immiscible – Amaziane B., 600
Incompressible elasticity – Lazar M., 163

Incompressible flow – Ben Beya B., 863
Induced anisotropy – Zhu Q.-z., 320
Infrared camera – Bamford M., 440
Interface – Millet S., 313 – Le T.H., 670
Internal erosion – Lachouette D., 731
Invariant integrals – Goldstein R., 108
Inverse analysis – Hori M., 132
Inverse problems – Bui H.D., 12 – Stolz C., 238
Isotropic hyperelasticity – Vallée C., 851

L

Laguerre diagram – Laug P., 506
Laminar boundary layer – Saintlos Brillac S., 536
Large Eddy Simulation – Brun C., 363
Laser Doppler Velocimetry – Mahfoud M., 616
Levin’s theorem – Pichler B., 636
Lid-driven cavity – Chicheportiche J., 586 – Ben Beya B., 863
Limit analysis – Betti M., 42 – Leblond J.-B., 813
Linear fracture mechanics – Hild P., 422
Linear stability – Hamed H.B., 656
Linear theory – El Bach A., 384
Linearized Euler Equations – Longueteau F., 828
Load carrying capacity – Betti M., 42
Logarithmic strain – Vallée C., 851
Love–Kirchhoff plate – Dallot J., 487
Low cycle fatigue – Desmorat B., 448

M

Macro-element – Grange S., 856
Manufacturing signature – Mezghani S., 794
Marangoni number – Simanovskii I.B., 262
Masonry – Dallot J., 487
Masonry arch bridge – Betti M., 42
Material engineering – Mezghani S., 794
Matricant – Baron C., 722
Melan’s theorem – Barber J.R., 34
Micromechanics – Vincent P.-G., 245 – Bouchart V., 471 – Pichler B., 636 – Keralavarma S.M., 685

Microstructure – Toulemonde C., 275
Mixed convection – Hamed H.B., 656
Mixed mode – Moutou Pitti R., 744
Mixed mode loading – Arfaoui M., 737
Mixed modes – Moutou Pitti R., 545
Modal synthesis – Batifol C., 757
Modeling – Younes R., 704
Molecular adhesion – Goryacheva I., 118
Mori–Tanaka scheme – Pichler B., 636
Mortar – Le T.H., 670
Moving loads – Dang Van K., 91
Multi-axial fatigue – Dang Van K., 91
Multigrid – Ben Cheikh N., 800
Multilayer – Simanovskii I.B., 262
Multilayer films – Millet S., 313
Multiple scale – Kaplunov J., 553
Multiscale approach – Meier S., 623
Multiscale characterization – Mezghani S., 794
Multi-scale contact deformation – Komvopoulos K., 149

N

Nanostructures – Laug P., 506
Nonlinear composites – Danas K., 79
Nonlinear eigenvalue problem – Stepanova L., 232
Nonlinear homogenization – Bouchart V., 471
Nonlinearity – Le T.H., 670
Nonlocal discrete regularization – Elmoataz A., 428
Non local effects – Weller T., 572
Non-local damage – Zhu Q.-z., 320
Non-spherical voids – Keralavarma S.M., 685
Notch vertex – Arfaoui M., 737
Nuclear waste – Amaziane B., 600
Numerical simulations – Fernández J.R., 559
Numerical verification – Bouchart V., 471

O

Optimal control – Stolz C., 238
Optimization – Younes R., 704
Oscillating boundary – Amirat Y., 693
Osteon – Lemaire T., 354
Out-of-plane loads – Dallot J., 487

P

p-Laplacian – Elmoataz A., 428

Paris law – Hachi B.K., 390
Particles-matrix adherence – Bouchart V., 714
Passive scalar – Doche O., 289
Passive-scalar mixing – Brun C., 363
Path independent integrals – Moutou Pitti R., 545 – Moutou Pitti R., 744
PCM – Lopez J., 578
Penny-shaped crack – Chaïyat S., 54
Periodic media – Amirkhizi A.V., 24
Perturbed matrices – Hamed H.B., 656
Photomechanics – Réthoré J., 643
Piezoelectric rods – Weller T., 572
Piezoelectricity – Fernández J.R., 559
Piping flow erosion – Lachouette D., 731
Planar contraction – Mahfoud M., 616
Plasticity – Parry G., 224 – Vincent P.-G., 245 – Zhu Q.-Z., 376 – Grange S., 856
Polycrystals – Parry G., 224
Ponte Castañeda-Willis scheme – Pichler B., 636
Poroelastic materials – Batifol C., 757
Poroelastic modelling – Lemaire T., 354
Porous materials – Bouchart V., 471
Porous media – Danas K., 79 – Vincent P.-G., 297 – Er-Raki M., 304 – Casenave C., 398 – Meier S.A., 481 – Amaziane B., 600 – Meier S., 623 – Pichler B., 636 – Hérard J.-M., 650 – Keralavarma S.M., 685 – Cherblanc F., 782
Positive and negative “temperatures” – Bécu E., 565
Potential energy – Lubarda V.A., 190
Preconditioner – Tardieu N., 840
Premixed flames – Savre J., 807
Pulsatile blood flow – Srinivasacharya D., 820

R

Rapid rotation – El Bach A., 384
Rayleigh-Bénard convection – Ouertatani N., 464
Reaction-diffusion – Meier S., 623
Rectangular Bricard mechanism – Racila L., 404
Reduced chemistry – Savre J., 807
Regression – Blatman G., 518
Reinforced elastomers – Bouchart V., 714

Residual stresses – Constantinescu A., 69
Rheology – Pasol L., 512 – Rioual F., 664 – Benallal A., 835
Rigid body theory – Rioual F., 664
Rod theory – Constantinescu A., 69
Rupture – Le K.C., 170 – Stepanova L., 232 – Stolz C., 434 – Stolz C., 500 – Moutou Pitti R., 545 – Réthoré J., 643 – Younes R., 704 – Moutou Pitti R., 744
RVE – Toulemonde C., 275

S

Safety coefficient for slip-shakedown – Antoni N., 341
Salt – Lopez J., 578
Self-consistent scheme – Pichler B., 636
Sensitivity – Delenne C., 766
Sensitivity analysis – Charpentier I., 788
SH wave – Djeran-Maigre I., 102
Shakedown – Barber J.R., 34 – Dang Van K., 91
Shear bands – Leblond J.-B., 176 – Nowacki W.K., 210
Shear wave – Djeran-Maigre I., 102
Shocks – Delenne C., 766
Sieve curves – Toulemonde C., 275
Signorini problem – Chacha D.A., 846
Singularities – Leguillon D., 283
Singularity – Arfaoui M., 737
Sliding – Zhu Q.-Z., 376
Slip-shakedown theorem – Antoni N., 341
Soil-structure interaction – Grange S., 856
Soils – Grange S., 856
Solid-liquid-vapor phase change – Bouneder M., 592
Solids – Parry G., 224
Solids and structures – Betti M., 42 – Constantinescu A., 69 – Antoni N., 341 – Hild P., 422 – Dallot J., 487 – Blatman G., 518 – Weller T., 572 – Cantin Y.G., 699 – Bouchart V., 714
Solitary wave – Djeran-Maigre I., 102
Soliton – Djeran-Maigre I., 102
Soret effect – Er-Raki M., 304
Sparse polynomial chaos – Blatman G., 518
Spectral collocation – Longuetau F., 828

Spectral problem – Amirat Y., 693
Spherical inclusion – Goldstein R., 108
Stability – Millet S., 313 – Cantin Y.G., 699
Stability of waves – Nguyen Q.S., 203
Static and kinematic approaches – Antoni N., 341
Stick-slip-separation-slip wave – Nguyen Q.S., 203
Stochastic collocation – Blatman G., 518
Stored energy – Nowacki W.K., 210
Streamwise vortices – Brun C., 363
Strength domain – Dallot J., 487
Stress – Arfaoui M., 737
Stroh formalism – Baron C., 722
Structural reliability – Blatman G., 518
Surface roughness – Parry G., 224
Surface wave – Djeran-Maigre I., 102
Symmetry loss – Bui H.D., 12

T

Tabulation – Savre J., 807
Temperature gradient – Forest S., 347
Tensor algebra – Auffray N., 370 – Auffray N., 458
Thermal contact resistance – Bouneder M., 592
Thermal energy storage at high temperature – Lopez J., 578
Thermal fields – Moutou Pitti R., 545
Thermocapillarity convection – Simanovskii I.B., 262
Thermodynamic approach – Zhu Q.-Z., 376
Thermoelastoplasticity – Nowacki W.K., 210
Thermogram – Ait Aouit D., 677
Thermomechanical surface tractions – Komvopoulos K., 149
Thermosolutal convection – Er-Raki M., 304
Thin films – Parry G., 224
Three-dimensional lid-driven cavity – Ben Beya B., 863
Ti-6Al-4V – Nouari M., 772
Topology optimization – Desmorat B., 448
Transverse diffusivity distribution – Bamford M., 440
Trapped mode – Kaplunov J., 553
Tresca criterion – Chaïyat S., 54

Tribological parameters – Nouari M., 772
Truss arch – Cantin Y.G., 699
Turbulence – Doche O., 289 – Brun C., 363 – El Bach A., 384
Two degrees of freedom method – Hachi B.K., 390
Two-fluid models – Hérard J.-M., 650
Two layer particles – Bouneder M., 592
Two-phase flow – Lachouette D., 731
Two-scale model – Meier S.A., 481

U

Ultrasound – Jiménez-Fernández J., 411
Unilateral contact – Betti M., 42 – Le van A., 606 – Chacha D.A., 846
Unilateral effect – Zhu Q.-z., 320
Unyielded regions – Benallal A., 835

Uplift – Grange S., 856
Uzawa's method – Bui T.T.C., 524

V

Variational integral – Gupta A., 126
Variational method – Toulemonde C., 275
Vibrations – Zenkovskaya S.M., 269
Viscoelastic fluids – Jiménez-Fernández J., 411
Viscoelasticity – Moutou Pitti R., 545
Viscoplastic Bingham fluid – Benallal A., 835
Void growth – Keralavarma S.M., 685
Void shape effects – Leblond J.-B., 813
von Kármán plate – Chacha D.A., 846
Von Mises criterion – Chaiyat S., 54

W

Wall-bounded flows – Doche O., 289
Warping – Constantinescu A., 69
Water-Gas – Amaziane B., 600
Wave equation – Fornet B., 454
Waveguide – Baron C., 722
Waves – Djeran-Maigre I., 102 – Baron C., 722
Wax crystal – Benallal A., 835
Weak non-linearity – Kaplunov J., 553
Weight function – Hachi B.K., 390
Weighted graph – Elmoataz A., 428
Wooden specimen – Moutou Pitti R., 744

Y

Yield criterion – Vincent P.-G., 297
Yield function – François M., 417
