

Keyword index Vol. 337, 2009

A

Acoustic – Roux A., 352
Acoustic coupling – Palies P., 395 – Mery Y., 426
Acoustic insulation – Mohammadi N., 198
Acoustic streaming – Dridi W., 238
Acoustics – Gullaud E., 406 – Castagnède B., 693
Adjoint solution – Bellis C., 124
Advection–diffusion problem – Osman T., 107
Aeroacoustics – Da Silva A., 84
Ageing viscoelastic materials – Chazal C.F., 30
Air-blast injectors – Boukra M., 492
Airblast atomizer – Fernandez V.G., 481
Ammonium nitrate – Presles H.-N., 755
Analytical model – Hocine A., 616
Analytical solution – Osman T., 107 – Emami B., 185
Anisotropic hyperelasticity – Peyraut F., 101
Anisotropy – Gnanga H., 15 – Desmouret R., 733
Annular gas turbines – Wolf P., 385
Aromatics – Orain M., 373
Asymmetric 3D waves – Iooss G., 633
Asymptotic behavior – Díaz J.I., 1
Asymptotic expansions – Pruchnicki E., 297 – Nazarov S.A., 585
Atomization – Lhuissier H., 469
Averaged method – Benzid C., 291
Azimuthal modes – Wolf P., 385

B

Bifurcation analysis – El Gallaf A., 716
Bifurcation theory – Iooss G., 633
Biomechanics – Peyraut F., 101 – Nguyen V.-H., 268 – Kaiser J., 768
Boiling – Phan H.T., 251
Born–Kármán model – Challamel N., 591
Boundary homogenization – Nazarov S.A., 585
Boundary layer – Da Silva A., 84
Bounds – Sab K., 603
Braking systems – Hocine A., 616
Buoyant flow – Dridi W., 238 – El Gallaf A., 716

C

Car door cavity – Da Silva A., 84
Cationic exchanges – Kaiser J., 768
Cauchy–Stokes problem – Ben Abda A., 703
Cavitation – Adama Maiga M., 791
CH – Grisch F., 504
Charged porous media – Kaiser J., 768
Chemical kinetics – Albouze G., 318
Colloid – Djehiche A., 682
Combustion – Albouze G., 318 – Vicquelin R., 329 – Sainte-Rose B., 340 – Roux A., 352 – Izard J.-F., 362 – Orain M., 373 – Palies P., 395 – Gullaud E., 406 – Leyko M., 415 – Mery Y., 426 – de Chaisemartin S., 438 – Laurent C., 449 – Senoner J.M., 458 – Grisch F., 504 – Pons L., 517 – Schmitt T., 528 – Zhang J., 539 –

Duchaine F., 550 – Michel B., 562 – Robin V., 596 – Presles H.-N., 755
Combustion instabilities – Wolf P., 385 – Gullaud E., 406
Combustors – Michel B., 562
Comfort – Nejlaoui M., 303
Complex analysis – Abdelmoula R., 53 – Abdelmoula R., 166
Compressible gas phase – Mikelić A., 226
Computational fluid mechanics – Gnanga H., 15 – Hubert F., 95 – Sun H., 141 – Golay F., 233 – Dridi W., 238 – Roux A., 352 – Schmitt T., 528 – Traoré Ph., 667 – Ben Abda A., 703 – El Gallaf A., 716
Computational solid mechanics – Díaz J.I., 1 – Frémond M., 24 – Chazal C.F., 30 – Bellis C., 124 – Boudaïa E., 761
Computer science – Hubert F., 95
Concentrated masses – Nazarov S.A., 585
Confinement – Della N., 282 – Palies P., 395
Conjugate heat transfer – Duchaine F., 550
Contact angle – Phan H.T., 251
Contact interaction – Gouin H., 218
Continuous thermodynamics – Laurent C., 449
Continuum mechanics – Challamel N., 591 – Antoni G., 653 – Le K.C., 709 – Nowamooz H., 781
Control – Hollands M., 179
Core-annular flow – Mehidi N., 112
Coupling work – Zhang J., 539
Crack growth process – Moutou Pitti R., 748
Crack identification – Bellis C., 124

Critical detonation diameter – Presles H.-N., 755
Crystal – Le K.C., 709
Curved duct – Boutabaa M., 40
Cuspidal caustic – Castagnède B., 693
Cyclic compression – Antoni G., 653
Cylindrical cavity – El Gallaf A., 716

D

Damage – Arson C., 68 – Dascalu C., 645 – Desmorat R., 733
Damage laws – Dascalu C., 645
Damping – Gullaude E., 406
Data completion – Ben Abda A., 703
Dean vortices – Boutabaa M., 40
Decentralized control – Lenczner M., 245
Delayed Detached Eddy Simulation – Sainte-Rose B., 340
Density – Della N., 282
Deposit – Djehiche A., 682
Detonation – Presles H.-N., 755
Detonation sensitivity – Presles H.-N., 755
Detonation velocity – Presles H.-N., 755
Dielectric liquid – Traoré Ph., 667
Dirichlet – Ardonceau P., 208
Discrete elements – Mansouri M., 675
Dislocation – Le K.C., 709
Dispersive properties – Challamel N., 591
Double porosity – Choquet C., 659
Doublets – Ardonceau P., 208
Drops – Lhuissier H., 469
Drucker-Prager and Coulomb materials – Thoré Ph., 260
Dry funnel pluviation – Della N., 282
Duct flows – Anselmet F., 573
Dynamical systems – Mahéo L., 722
Dynamic coefficients – Arghir M., 739

E

Eddy viscosity formulation – Absi R., 158
Effective properties – Monchiet V., 192
Effective stress – Desmorat R., 733
Effusion cooling – Michel B., 562
Elasticity – Challamel N., 591
Elastodynamics – Bellis C., 124
Electro-Hydro-Dynamic – Traoré Ph., 150 – Traoré Ph., 667

Electro-thermo-convection – Traoré Ph., 150
Electroconvection – Traoré Ph., 667
Electron – Grisch F., 504
Entrainment – Enjalbert N., 639
Entrance region – Anselmet F., 573
Entropy production – Golay F., 233
Error indicator – Golay F., 233
Eulerian – Senoner J.M., 458
Eulerian methods – de Chaisemartin S., 438
Exact solution – Thoré Ph., 260
Existence of a solution – Mikelić A., 226
Expansive soil – Nowamooz H., 781
Experimentation – Nowamooz H., 781
Explicit and dissipative time integration algorithm – Mahéo L., 722

F

Fatigue – Abdelmoula R., 53 – Abdelmoula R., 166
Feature flow field – Berson A., 61
Filtered flame – Vicquelin R., 329
Finite difference method – Simanovskii I.B., 75
Finite element – Chazal C.F., 30 – Peyraut F., 101 – Nguyen V.-H., 268
Finite volume – Hubert F., 95 – Golay F., 233
Finite volume method – Boutabaa M., 40
Flame describing function – Palies P., 395
Flame structure – Orain M., 373
Flamelet regime – Robin V., 596
Flapping – Lhuissier H., 469
Flattening – Frémond M., 24
Flow – Ardonceau P., 208
Fluid dynamics – Wolf P., 385
Fluid mechanics – Boutabaa M., 40 – Amaouche M., 48 – Berson A., 61 – Da Silva A., 84 – Mehidi N., 112 – Taghizadeh M., 131 – Absi R., 158 – Amaziane B., 173 – Hollands M., 179 – Ardonceau P., 208 – de Chaisemartin S., 438 – Fernandez V.G., 481 – Enjalbert N., 639 – Choquet C., 659 – Bouhoubeiny E., 776 – Adama Maiga M., 791
Focusing coefficient – Castagnède B., 693
Fracture – Moutou Pitti R., 748
Fracture mechanics – Abdelmoula R., 53 – Abdelmoula R., 166

Free surface – El Gallaf A., 716
Friction contact – Boudaia E., 761

G

Gamma-PDF model – Laurent C., 449
Gap-band structure of the spectrum – Nazarov S.A., 119
Gas lubrication – Arghir M., 739
Geomaterial – Arson C., 68
Godunov's scheme – Golay F., 233
Gradient model – Challamel N., 591
Granular media – Mansouri M., 675
Gurson model – Thoré Ph., 260

H

Hardening – Le K.C., 709
Harmonic loading – Nguyen V.-H., 268
Haversian bone – Nguyen V.-H., 268
Heat transfer – Merakeb S., 34 – Osman T., 107 – Traoré Ph., 150 – Phan H.T., 251 – Benzid C., 291 – Hocine A., 616
Heterogeneous material – Challamel N., 591
HGO model – Peyraut F., 101
High frequency instability – Mery Y., 426
High order boundary conditions – Panasenکو G., 8
High order homogenized equation – Panasenکو G., 8
High pressure – Orain M., 373 – Pons L., 517
High pressure testing – Fernandez V.G., 481
Homogenization – Panasenکو G., 8 – Amaziane B., 173 – Monchiet V., 192 – Turgeman S., 277 – Pruchnicki E., 297 – Sab K., 603 – Dascalu C., 645 – Choquet C., 659
Hygroscopic equilibrium – Merakeb S., 34
Hyperbolic shells – Díaz J.I., 1
Hysteresis – Merakeb S., 34

I

Identification – Taghizadeh M., 131
Ignition – Grisch F., 504
Impedance tube – Mohammadi N., 198
Increase of the heat transfer – Traoré Ph., 150

Incremental formulation – Chazal C.F., 30
Indirect combustion noise – Leyko M., 415
Injection – Mery Y., 426
Instability – Mehidi N., 112 – Lenczner M., 245 – El Gallaf A., 716
Interactions – Adama Maiga M., 791
Interfacial convection – Simanovskii I.B., 75
Internal length – Dascalu C., 645
Inverse problem – Ben Abda A., 703
Ionic strength – Djehiche A., 682
Isotropic loading – Thoré Ph., 260

J

Jet – Emami B., 185
Jets in cross flow – Michel B., 562

K

Kelvin decomposition – Desmorat R., 733
Kerosene–air combustion – Orain M., 373
Kutta – Ardonceau P., 208

L

Lagrangian – Senoner J.M., 458
Lagrangian modelling – Izard J.-F., 362
Laplace – Ardonceau P., 208
Laplace operator – Hubert F., 95
Large deformations – Frémond M., 24
Large eddy simulation – Vicquelin R., 329 – Senoner J.M., 458 – Schmitt T., 528 – Duchaine F., 550
Large scale flow structures – Bouhoubeiny E., 776
Laser diagnostic – Grisch F., 504
Lattice Boltzmann – Mansouri M., 675
LES – Wolf P., 385 – Zhang J., 539
LES combustion model – Albouze G., 318
Limit analysis – Thoré Ph., 260
Liquefaction – Della N., 282
Liquid atomization – Boukra M., 492
Liquid films – Lhuissier H., 469
Localized solutions – Nazarov S.A., 610
Low frequency propagation onto an half-cylindrical reflector – Castagnède B., 693

Low-Mach number flows – Sun H., 141
Lubrication – Arghir M., 739

M

Machining simulation – Boudaia E., 761
Magneto-hydrodynamics – Benzid C., 291
Masonry – Sab K., 603
Mechanotransduction – Nguyen V.-H., 268
Mesh refinement – Hubert F., 95 – Golay F., 233
Meshless method – Boudaia E., 761
Micro-cantilever array – Lenczner M., 245
Micro-crack propagation – Dascalu C., 645
Micro-mechanics – Arson C., 68
Mixed modes – Moutou Pitti R., 748
Mixing – Michel B., 562
Modeling – Taghizadeh M., 131 – Nejlaoui M., 303 – Nowamooz H., 781 – Adama Maiga M., 791
Mohr–Coulomb – Sab K., 603
Moisture content – Merakeb S., 34
Moment method – de Chaisemartin S., 438
Monte Carlo – Zhang J., 539
Moving heat sources – Osman T., 107 – Hocine A., 616
Multi-bubbles – Adama Maiga M., 791
Multi-component droplet – Laurent C., 449
Multilayer acoustic panels – Mohammadi N., 198
Multilayer system – Simanovskii I.B., 75
Multiperforated plates – Gullaud E., 406
Multiscale model – Lenczner M., 245
Multiscale modelling – Kaiser J., 768

N

Nanocoating – Phan H.T., 251
Nanosecond discharge – Grisch F., 504
Nernst–Planck – Kaiser J., 768
Net stress – Arson C., 68
Nodes – Ardonceau P., 208
Noise of cavity – Da Silva A., 84
Non-linear models – Gnanga H., 15

Non-standard growth – Choquet C., 659
Nonlinear acoustic parametric array – Castagnède B., 693
Nonlinear elasticity – Pruchnicki E., 297
Nonlinear variational problem – Amaziane B., 173
Nonlinear water waves – Iooss G., 633
Nonlocal model – Challamel N., 591
Nonstandard growth – Amaziane B., 173
Numerical methods – Roux A., 352
Numerical simulation – Traoré Ph., 150 – de Chaisemartin S., 438 – Traoré Ph., 667
Numerical simulations – Leyko M., 415
Nusselt number – Traoré Ph., 150

O

OH – Grisch F., 504
Optimal distributed control – Lenczner M., 245
Osteon – Nguyen V.-H., 268

P

Partially premixed combustion – Robin V., 596
Particle image velocimetry – Bouhoubeiny E., 776
Path-independent integrals – Moutou Pitti R., 748
Periodic – Nguyen V.-H., 268
Periodic elastic waveguide – Nazarov S.A., 119
Permeability – Arson C., 68 – Monchiet V., 192
Pin-on-disc – Hocine A., 616
Pipe flows – Anselmet F., 573
PIV – Berson A., 61
Planar laser-induced fluorescence – Orain M., 373
Plates – Pruchnicki E., 297
Poro-elasticity – Arson C., 68
Poroelasticity – Nguyen V.-H., 268
Porous media – Monchiet V., 192 – Mikelić A., 226 – Thoré Ph., 260 – Djehiche A., 682
Potential – Ardonceau P., 208
Potential perfect fluid flow – Iooss G., 633

Primary break-up – Fernandez V.G., 481
Proper orthogonal decomposition – Bouhoubeiny E., 776
PWM – Taghizadeh M., 131

Q

Quadrature Method of Moments – Laurent C., 449

R

Radiative transfer – Zhang J., 539
Rail vehicles – Nejlaoui M., 303
Ramjet – Roux A., 352
Random biphasic material – Turge- man S., 277
Random microstructure – Sab K., 603
Ray tracing algorithm – Castagnède B., 693
Rayleigh–Bénard instability – Traoré Ph., 150
Rayleigh–Taylor instability – Lhuis- sier H., 469
Residual strength – Della N., 282
Resistance curve – Dascalu C., 645
Rupture – Turgeman S., 277 – Moutou Pitti R., 748

S

Safety – Nejlaoui M., 303
Sand boiling – Mansouri M., 675
Scalar dissipation – Robin V., 596
Servo-pneumatic – Taghizadeh M., 131
Shear instability – Lhuissier H., 469
Shkadov's model – Amaouche M., 48
Short radius curves – Nejlaoui M., 303
Silty sand – Arab A., 621
Simulation – Taghizadeh M., 131
Single crystals – Desmorat R., 733
Slender thin shells – Díaz J.I., 1
Sliding contacts – Hocine A., 616
Soils – Della N., 282 – Arab A., 621 – Mansouri M., 675
Solenoid valve – Taghizadeh M., 131
Solid–liquid contact – Gouin H., 218
Solids and structures – Sab K., 603
Sorption isotherm – Merakeb S., 34
Spectral analysis – Nazarov S.A., 585

Square duct flow – Gnanga H., 15
Stability – Dridi W., 238 – Benzid C., 291 – El Gallaf A., 716
Stability criteria – Traoré Ph., 667
Steklov–Poincaré operator – Ben Abda A., 703
Strain gradient theories – Panasenko G., 8
Strained flame – Pons L., 517
Streaks – Hollands M., 179
Strength domain – Sab K., 603
Structural dynamics – Mahéo L., 722
Sub-critical crack growth – Dascalu C., 645
Suction – Arson C., 68
Suction cycles – Nowamooz H., 781
Supercritical – Schmitt T., 528
Supersonic – Emami B., 185
Supersonic combustion – Izard J.-F., 362
Surface energy – Gouin H., 218
Surface roughness – Gouin H., 218
Surface stresses – Gouin H., 218
Surface water-waves – Nazarov S.A., 610
Swirl – Palies P., 395

T

Tabulated chemistry – Vicquelin R., 329
Tchamwa–Wielgosz scheme – Mahéo L., 722
Temperature – Grisch F., 504
Thermo-mechanical modelling – An- toni G., 653
Thermoacoustic – Leyko M., 415
Thermodynamics – Arson C., 68
Thermosolutal convection – Sun H., 141
Thin film flow – Amaouche M., 48
Topological sensitivity – Bellis C., 124
Transcritical combustion – Pons L., 517
Transformation Induced Plasticity (TRIP) – Antoni G., 653
Transmission loss – Mohammadi N., 198
Trapped modes – Nazarov S.A., 610
Travelling gravity waves – Iooss G., 633
Tribological Transformations of Sur- face (TTS) – Antoni G., 653
Turbine blade – Duchaine F., 550

Turbulence – Gnanga H., 15 – Ansel- met F., 573
Turbulent combustion – Zhang J., 539
Turbulent combustion modeling – Robin V., 596
Turbulent jets – Enjalbert N., 639
Turbulent premixed combustion – Vicquelin R., 329
Twist boundary – Le K.C., 709
Two-phase flow – Mikelić A., 226 – de Chaisemartin S., 438
Two-phase flows – Senoner J.M., 458

U

Ultrasonic atomization – Boukra M., 492
Underexpanded jets – Izard J.-F., 362
Undrained sand – Della N., 282
Unsteady flow – Berson A., 61

V

V-shaped structures – Díaz J.I., 1
Vaporization – Laurent C., 449
Variational approach – Abdelmoula R., 53 – Abdelmoula R., 166
Variational methods – Pruchnicki E., 297
Vibrations – Benzid C., 291
Viscoelastic fluid – Boutabaa M., 40
Viscous effects – Izard J.-F., 362
Viscous fluid – Monchiet V., 192
Viscous fluids – Mehidi N., 112
Vortex tracking – Berson A., 61

W

Wall flame interaction – Duchaine F., 550
Wave equation – Challamel N., 591
Waves – Nazarov S.A., 610 – Iooss G., 633
Weighted residual method – Mehidi N., 112
Wet deposition – Della N., 282
Wettability – Phan H.T., 251

Y

Yield design – Turgeman S., 277
Yielding – Le K.C., 709
