Vol. 338, 2010

3D lung dynamics – Santhanam A.P., 461

A

Acoustic anisotropy – Dikrallah A., 107
Adaptive meshing – Borouchaki H., 127
Adjoint field – Yuan H., 480
Adjoint formulation – Askan A., 364
Algebraic model – Radhia F., 355
Analytical and deterministic models – Belghith S., 48
Analytical mechanics – Béchet F., 327 – Stylianou A., 489 – Tran C., 499
Analytical model – Réthoré J., 121
Anisotropic materials – Auffray N., 260
Anisotropy – Vincens E., 615
Approximate Riemann solver – Helluy P., 493
Array imaging – Borcea L., 390
Asymptotic numerical method – Béchet F., 327
Asymptotic response – Antoni N., 545
Axisymmetric deformation – Zhao B.-s., 255

B

Bayesian estimation – Massard H., 434
Beam – Mahieddine A., 283
Bessel's function – Zhao B.-s., 255
Best rank-*r* approximations – Lim L.-H., 311
Biaxial test – Nougier-Lehon C., 587
Biomechanics – Leiderman R., 412 – Santhanam A.P., 461 – Sinkus R., 474
Blind channel identification – Lim L.-H., 311
Blind source separation – Lim L.-H., 311
Boundary effect – de Buhan P., 132
Boundary obstacle – Stylianou A., 489
Boundary slip – You X.-Y., 181
Buried exchanger – Mnasri T., 220

C

Cancer – Leleyter L., 139

Characteristic state – Vincens E., 615
Chemiluminescence – Orain M., 241
Circular cylinder – Zhao B.-s., 255
Circumferential feeding groove – Naïmi S., 338
Coherence – Lim L.-H., 311
Coherent interferometry – Borcea L., 390
Combustion – Robin V., 40 – Orain M., 241
Complex-shear modulus – Sinkus R., 474
Composite – Ghazouani N., 704
Compressible solid – Cai M.-C., 207
Computational fluid dynamics – Hireche O., 18
Computational fluid mechanics – Chhay M., 97 – Helluy P., 493 – Panasenko G., 675
Computational solid mechanics – Cros J.-M., 176
Computer science – Chaskalovic J., 33 – Assous F., 305
Constitutive models – Göncü F., 570
Contact – Belghith S., 48 – Cros J.-M., 176 – Antoni N., 545
Continuation procedure – Lazarus A., 510
Continuum mechanics – Semblat J.-F., 24 – El Ganaoui M., 85 – Gigliotti M., 164 – Cai M.-C., 207 – Auffray N., 260 – Nguyen Q.-S., 321 – Gutiérrez S., 402
Continuum thermodynamics – Nguyen Q.-S., 321
Convection – Elhajjar B., 350
Crack propagation – Réthoré J., 121
Cross section – Dikrallah A., 107
Crystallization kinetics – Boutaous M., 78
CTAC-NaSal – Hadri F., 152
Cycle – Vincens E., 615
Cyclic loading – Calvetti F., 604
Cyclic test – Nowamooz H., 230

D

Damage – Adelaide L., 158 – Pham K., 191 – Pham K., 199 – Weleman H.,

271 – Mahieddine A., 283 – Stolz C., 663 – Detrez F., 681

Data assimilation – Sau J., 212
Data mining – Assous F., 305
Defect identification – Bonnet M., 377
Defects in solids – Gutiérrez S., 402
Delamination – Mahieddine A., 283
DEM – Vincens E., 615
Diffusion–mechanics couplings – Gigliotti M., 164
Discrete Element Method – Bourrier F., 639
Dispersion – Ali A., 67
Dissipation – Adelaide L., 158
Distinct elements – Calvetti F., 604
Douglas fir – Dikrallah A., 107
Drag reduction – Hadri F., 152
Dynamic load – Cai M.-C., 207
Dynamical systems – Lazarus A., 510 – Billot R., 529
Dynamics of rigid or flexible systems – Gorkavyy V.A., 656

E

Elastic junction – Merabet I., 277
Elastic plates – Morassi A., 450
Elasticity – Cros J.-M., 176
Elasticity imaging – Sinkus R., 474
Elastodynamics – Semblat J.-F., 24 – Bonnet M., 377
Electrical double layer – You X.-Y., 181
Electromagnetics – Borouchaki H., 127
Energy loss – Ali A., 67
Energy-like functional – Bonnet M., 377
Entropy correction – Helluy P., 493
Equilibrium vapour pressure – Ouoba S., 113
Equivalence ratio – Orain M., 241
Erosion – Golay F., 333 – Scholtès L., 627
Error estimates – Borouchaki H., 127
Expansive clay – Nowamooz H., 230

Extended Finite Element Method – Réthoré J., 121

F

Failure – Scholtès L., 627
Fast breeder reactors – Daustray R., 649
Fatigue – Desmorat R., 146
Fictitious domain – Golay F., 333
Filtration coefficient – Leiderman R., 412
Fines – Belkhatir M., 290
Finite difference scheme – Chhay M., 97
Finite elasticity – Stolz C., 663
Finite element – Cros J.-M., 176
Finite Element Method – Semblat J.-F., 24
Finite mixture model – Nouy A., 698
Finite strain – Lopez-Pamies O., 3
Finite volume – Golay F., 333
Fireplace – Leleyter L., 139
Flamelet regime – Robin V., 40
Flow stability – You X.-Y., 181
Fluid mechanics – Ali A., 67 – Dobberschütz S., 71 – Hadri F., 152 – Sau J., 212 – Radhia F., 355
Force networks – Bourrier F., 639
Forced convection – Mnasri T., 220
Fourth grade fluid – Hayat T., 518
Fragmentation – Detrez F., 681
Friction – Cros J.-M., 176 – Béchet F., 327
Frictionless granular materials – Göncü F., 570
Fuel type – Orain M., 241

G

Generalized elasticity – Auffray N., 260
Genetic algorithm – Tran C., 499
Geometric integrator – Chhay M., 97
Granular materials – Tordesillas A., 556 – Calvetti F., 604
Granular media – Göncü F., 570 – Nougier-Lehon C., 587 – Krut Niels P., 596 – Vincens E., 615 – Scholtès L., 627 – Bourrier F., 639
Green wood – Dikrallah A., 107
Green's function – Mnasri T., 220

H

Hardening – Vincens E., 615
Harmonic-balance method – Lazarus A., 510
Heat equation – Nguyen Q.-S., 321
Heat flux – Ndoye M., 688
Heat release – Orain M., 241
Heat source mapping – Massard H., 434
Heat transfer – Boutaous M., 78 – Mnasri T., 220 – Elhajjar B., 350 – Massard H., 434 – Hayat T., 518
Heat transfer coefficient – Mnasri T., 220
Hill's method – Lazarus A., 510
Hinged plate – Stylianou A., 489
Homogenisation – Belghith S., 48 – Dobberschütz S., 71 – de Buhan P., 132 – Gutiérrez S., 402

Hot wire anemometry – Ndoye M., 688
Hydrodynamic lubrication – Naïmi S., 338
Hyper-spherical harmonics – Santhanam A.P., 461
Hyperbolic equation – Billot R., 529

I

Identification – Nouy A., 698
Impact – Cros J.-M., 176 – Bourrier F., 639
Imperfect interfaces – Gélébart L., 670
Incremental behaviour – Calvetti F., 604
Induced magnetic field – Hayat T., 518
Inflating – Gorkavvy V.A., 656
Infrared image processing – Massard H., 434
Instability – You X.-Y., 181 – Hirata S.C., 538
Inter-granular void ratio – Belkhatir M., 290
Interface – Golay F., 333
Interfacial exchange – Dobberschütz S., 71
Internal layers – Merabet I., 102 – Merabet I., 277
Internal sliding – Adelaide L., 158
Interphase – Gélébart L., 670
Intrinsic attenuation – Askan A., 364
Invariant scheme – Chhay M., 97
Inverse poroelastic problem – Leiderman R., 412
Inverse problems – Gutiérrez S., 402 – Louf F., 424 – Massard H., 434 – Morassi A., 450 – Santhanam A.P., 461 – Sinkus R., 474
Irradiated materials – Daustray R., 649
Irrigation canals – Sau J., 212
Isotropic compression – Göncü F., 570
Isotropic model – Weleman H., 271

K

k-rank – Lim L.-H., 311
Kinematic hardening – Desmorat R., 146

L

Lack-of-knowledge – Louf F., 424
Lateral strains – Mahieddine A., 283
Lattice Boltzmann – El Ganaoui M., 85
Level set – Golay F., 333
Lie symmetry – Chhay M., 97
Linear inclusions – de Buhan P., 132
Linear stability – Billot R., 529
Liquefaction – Belkhatir M., 290
Lock-in – Amandolèse X., 12
Low Mach – Hireche O., 18
Lubrication – Naïmi S., 338

M

Material engineering – Gélébart L., 670 – Detrez F., 681

Material sensitivities – Yuan H., 480
Mechanical insufflating ventilation – Leleyter L., 139
Medical imaging – Sinkus R., 474
Mesh optimization – Borouchaki H., 127
Method of asymptotic partial domain decomposition – Panasenko G., 675
Metropolis-Hastings – Massard H., 434
Microchannels – You X.-Y., 181
Microcracks – Weleman H., 271
Micromechanics – Krut Niels P., 596 – Scholtès L., 627
Micromechanics modeling – Gélébart L., 670
Microscopic and macroscopic scale – Belghith S., 48
Migration – Borcea L., 390
Min-max problem – Egorov Y.V., 266
Mixed convection – Hirata S.C., 538
Mixing – Ndoye M., 688
Modelling – Antoni N., 545
Models of hybrid dimension – Panasenko G., 675
Moving frame – Chhay M., 97
MR elastography – Yuan H., 480
Multi-layer material – Gélébart L., 670
Multi-modal density – Nouy A., 698
Multi-scale models – Panasenko G., 675
Multiarrays – Lim L.-H., 311
Multiphase model – de Buhan P., 132
Multiple overheat – Ndoye M., 688
Multisensors – Lim L.-H., 311
Mylar balloon – Gorkavvy V.A., 656

N

Nanofluid – Elhajjar B., 350
Navier-Stokes equations – Panasenko G., 675
Non-equilibrium turbulence – Radhia F., 355
Non-Gaussian elasticity – Lopez-Pamies O., 3
Nonlinear functional – Egorov Y.V., 266
Nonlinearities – Desmorat R., 146
Nuclear power plants – Daustray R., 649
Numerical approximation and analysis – Borouchaki H., 127
Numerical scheme – Billot R., 529
Numerical simulation – Hireche O., 18

O

Open channel flow – Sau J., 212
Optimization – Yuan H., 480
Osmotic oedometer – Nowamooz H., 230

P

Parallelization – Panasenko G., 675
Partially premixed combustion – Robin V., 40
Particle shape – Nougier-Lehon C., 587
Penalization – Golay F., 333

Perturbation technique – Béchet F., 327
Piezoelectricity – Mahieddine A., 283
PIV – Hadri F., 152
Plane mixing layer – Ndoye M., 688
Plasticity – Kruyt Niels P., 596 – Detrez F., 681
Plates – Stylianou A., 489
Poisson's effect – Ghazouani N., 704
Polyadic tensor decompositions – Lim L.-H., 311
Polybutene – Detrez F., 681
Polyconvexity – Lopez-Pamies O., 3
Polycrystal – Gélébart L., 670
Polydisperse, frictionless granular materials – Göncü F., 570
Polymers – Boutaous M., 78
Polynomial chaos – Nouy A., 698
Porous media – Dobberschütz S., 71 – Ouoba S., 113 – Hirata S.C., 538
Positivity – Adelaide L., 158
Premixed flames – Orain M., 241
Pressure profile – Naïmi S., 338
Private home – Leleyter L., 139

Q

Quadrant decomposition – Ndoye M., 688
Quasi-crack – Stolz C., 663

R

Radon – Leleyter L., 139
Random media – Borcea L., 390
Randomness – Chaskalovic J., 33
Ratcheting – Desmorat R., 146 – Calvetti F., 604
Rattlers – Göncü F., 570
Rayleigh-Bénard – Elhajjar B., 350
Real contact area – Belghith S., 48
Refined theory – Zhao B.-s., 255
Reinforced soils – de Buhan P., 132
Relaxation model – Radhia F., 355
Residual shear strength – Belkhatir M., 290
Rheology – Tordesillas A., 556
Riemannian metric – Borouchaki H., 127
Rigid junction – Merabet I., 102
Rotations – Nougouier-Lehon C., 587
Rough surface – Belghith S., 48
Rupture – Réthoré J., 121 – Stolz C., 663

S

Saint Venant – Ghazouani N., 704
Saturation – Desmorat R., 146
Scalar dissipation – Robin V., 40
Scale effect – de Buhan P., 132
Semi-crystalline polymer – Detrez F., 681
Semi-explicit scheme – Cros J.-M., 176
Sequential Monte Carlo – Sau J., 212

Shear – Ghazouani N., 704
Shear force – Ghazouani N., 704
Shell – Gorkavyy V.A., 656
Short bearing theory – Naïmi S., 338
Short transformation – Gorkavyy V.A., 656
Shrinkage – Nowamooz H., 230
Signal processing – Lim L.-H., 311 – Borcea L., 390
Silty sand – Belkhatir M., 290
Slope stability – Tran C., 499
Soils – Leleyter L., 139 – Nowamooz H., 230 – Belkhatir M., 290 – Golay F., 333
Solids – Chaskalovic J., 33
Solids and structures – Lopez-Pamies O., 3 – Merabet I., 102 – Dikrallah A., 107 – de Buhan P., 132 – Zhao B.-s., 255 – Egorov Y.V., 266 – Merabet I., 277 – Antoni N., 545 – Ghazouani N., 704
Sorption/desorption isotherm – Ouoba S., 113
Spark – Lim L.-H., 311
Sparse representations – Lim L.-H., 311
Spectral stochastic methods – Nouy A., 698
Square cylinder – Amandolèse X., 12
Stability – Pham K., 191 – Pham K., 199 – Lazarus A., 510
Stabilization – Antoni N., 545
State variable – Nguyen Q.-S., 321
Statistics – Nouy A., 698
Steady state analysis – Naïmi S., 338
Stop-and-go wave – Billot R., 529
Stream computing – Tran C., 499
Stress – Cai M.-C., 207 – Ghazouani N., 704
Stress waves – Dikrallah A., 107
Structure complexity – Chaskalovic J., 33
Supported plate – Stylianou A., 489
Surfactant – Hadri F., 152
Swelling – Nowamooz H., 230
Symmetry breaking – El Ganaoui M., 85

T

Tallest column – Egorov Y.V., 266
Temperature gradient – Nguyen Q.-S., 321
Tensor rank – Lim L.-H., 311
Tensors – Auffray N., 260 – Lim L.-H., 311
Thermal diffusivity mapping – Massard H., 434
Thermo-oxidation – Gigliotti M., 164
Thermoacoustics – Hireche O., 18
Thermodynamics – Adelaide L., 158
Thermodynamics of irreversible processes – Gigliotti M., 164
Thermophysical properties – Boutaous M., 78
Thin shallow shells – Merabet I., 102 – Merabet I., 277
Thin structures – Panasenکو G., 675

Topological sensitivity – Bonnet M., 377
Torsion – Ghazouani N., 704
Traffic model – Billot R., 529
Transmission conditions – Merabet I., 102 – Merabet I., 277
Treated oil – Nowamooz H., 230
Turbulence – Ndoye M., 688
Turbulent combustion modeling – Robin V., 40

U

Uncertainties – Louf F., 424
Uncertainty quantification – Nouy A., 698
Undular bore – Ali A., 67
Unilateral boundary conditions – Stylianou A., 489
Unilateral effect – Weleman H., 271
Unknown boundaries – Morassi A., 450
Uranium – Daustray R., 649

V

Validation – Louf F., 424
Variational calculus – Tran C., 499
Variational inequality – Stylianou A., 489
Variational methods – Pham K., 191 – Pham K., 199
Vibration control – Mahieddine A., 283
Vibrations – Amandolèse X., 12
Visco-elasticity – Detrez F., 681
Viscoelastic fluid – Hirata S.C., 538
Viscoelastic tissue characterization – Yuan H., 480
Vlasov equation – Billot R., 529
Vlasov-Maxwell equations – Assous F., 305
Void – Cai M.-C., 207
Volume – Gorkavyy V.A., 656
Vortex shedding – Amandolèse X., 12
Vortex-induced vibration – Amandolèse X., 12

W

Wall slip – Hadri F., 152
Warping – Ghazouani N., 704
Water activity – Ouoba S., 113
Wave amplification – Hireche O., 18
Waveform inversion – Askan A., 364
Waves – Semblat J.-F., 24 – Borouchaki H., 127 – Askan A., 364
Wear – Antoni N., 545

Y

Yield – Cai M.-C., 207
Yield design – de Buhan P., 132
