C. R. Physique 4 (2003) 1194–1197

Keyword index Vol. 4, 2003

¹³C NMR – Rezzouk A., 715
⁴⁵Fe – Blank B., 521
3D – Blau G., 75

A

Accretion – Stern S.A., 803
Actin – Boukellal H., 275
Adhesion – Fery A., 259
All-optical devices – Leclerc O., 163
All-optical networks – Berthelon L., 127
All-optical regeneration – Desurvire E., 11
AMD – Kanada-En'yo Y., 497
Amplification – Bayart D., 65
Anomalous cosmic rays – Strazzulla G., 791
Aperture synthesis – Lannes A., 725
Array waveguide gratings – Bonar J.R., 51

B

β -decay – Sorlin O., 541
BCH code – Ait Sab O., 95
Beam quality – Wenzel H., 649
Block copolymer – Dalhaimer P., 251
Bragg gratings – Riant I., 41
Break-up reactions – Freer M., 475
Brownian particles – Cloitre M., 221

C

Cadherins – Thiery J.P., 289
CAM-Ig – Thiery J.P., 289
Carbon nanotube bundles – Sauvajol J.-L., 1035
Carbon nanotubes – Lambin P., 1009 – Cheng Y., 1021 – Becher M., 1055

Carcinoma – Thiery J.P., 289
Casimir force – Abram I., 187 – Long J.C., 337
Catastrophic degradation – Jiménez J., 663
Cell adhesion – Thiery J.P., 289
Centaur objects – Cruikshank D.P., 783
Centaurs – Fulchignoni M., 767 – Dotto E., 775
Chromatic dispersion – Nouchi P., 29
Clustering – Orr N., 451
Clusters – Van Isacker P., 529
CMB primary anisotropies – Lagache G., 891
Coherency – Blin S., 687
Collisions – Stern S.A., 803
Concatenated codes – Ait Sab O., 95
Control plane – Berthelon L., 127
Core network – Berthelon L., 127
Correlations – Orr N., 451
Cosmic Microwave Background anisotropies – Bouchet F.R., 823 – Bouchet F.R., 833 – Stompor R., 841 – Hamilton J.-C., 853 – Bouchet F.R., 861 – Hamilton J.-C., 871 – Douspis M., 881 – Giard M., 901 – Blanchard A., 909 – Kaplan J., 917 – Delabrouille J., 925 – Parentani R., 935 – Uzan J.-P., 945 – Langlois D., 953
Cosmology – Bouchet F.R., 823 – Bouchet F.R., 833 – Stompor R., 841 – Hamilton J.-C., 853 – Bouchet F.R., 861 – Hamilton J.-C., 871 – Douspis M., 881 – Lagache G., 891 – Giard M., 901 – Blanchard A., 909 – Kaplan J., 917 – Delabrouille J., 925 – Parentani R., 935 – Uzan J.-P., 945 – Langlois D., 953

D

Dark line defects – Jiménez J., 663
Dark spot defects – Jiménez J., 663
Data analysis – Hamilton J.-C., 871
Deformation – Boukellal H., 275
Degradation – Jiménez J., 663
Discovery – Petit J.-M., 743
Dislocation – Bonnet R., 961
Dislocation climb – Jiménez J., 663
Dislocation glide – Jiménez J., 663
Dispersion compensation – Nouchi P., 29
Dispersion-management – Turitsyn S.K., 145
Distributed amplification – Desurvire E., 11
Distributed Raman amplification – Gautheron O., 115
DM – Nouchi P., 29
Driplines – Nunes F.M., 489
Drop rebound – Bergeron V., 211
Droplet – Boukellal H., 275
Duobinary – Ait Sab O., 95
DWDM – Blau G., 75 – Berthelon L., 127
Dynamic tension spectroscopy – Evans E., 265

E

Early Universe – Bouchet F.R., 823 – Bouchet F.R., 833 – Stompor R., 841 – Hamilton J.-C., 853 – Bouchet F.R., 861 – Hamilton J.-C., 871 – Douspis M., 881 – Lagache G., 891 – Giard M., 901 – Blanchard A., 909 – Kaplan J., 917 – Delabrouille J., 925 – Parentani R.,

935 – Uzan J.-P., 945 – Langlois D., 953
EDFA – Bayart D., 65
Edge energy-line tension – Evans E., 265
Effective area – Nouchi P., 29
Elastic field – Bonnet R., 961
Elasticity – Boukellal H., 275
Electron band structure – Lambin P., 1009
Electron field emission – Cheng Y., 1021
Elongational viscosity – Bergeron V., 211
Entanglement – Abram I., 187
Entanglements – Hervet H., 241
Entropy – Desurvire E., 11
EPR – Rezzouk A., 715
Equivocation – Desurvire E., 11
Erbium – Bayart D., 65
Erbium-doped fiber amplifier – Desurvire E., 11 – Bigo S., 105 – Gautheron O., 115
ESA – Bouchet F.R., 861
Extra dimensions – Long J.C., 337

F

Fabrication – Bonar J.R., 51
Far-infrared – Sirtori C., 639
FEC – Ait Sab O., 95
Few-body structure – Nunes F.M., 489
Fiber communications – Turitsyn S.K., 145
Fiber dispersion – Desurvire E., 11
Fiber nonlinearity – Desurvire E., 11
Fibre design and fabrication – Monro T.M., 175
Fields – Benakli K., 363
Fluid–solid interfaces – Hervet H., 241
Four-wave mixing – Desurvire E., 11
Freespace – Blau G., 75
Frequency locking – Blin S., 687
Friction – Hervet H., 241
Fullerene – Rezzouk A., 715

G

Gain equalization – Gautheron O., 115
Galaxies – Lagache G., 891
GaSb – Joullié A., 621
Gate – Blau G., 75

Generator coordinate method – Bennaceur K., 555
GMPLS – Berthelon L., 127
Gravitational experiments – Long J.C., 337

H

Halo nuclei – Nunes F.M., 489
Hartree–Fock – Bennaceur K., 555
Hartree–Fock–Bogoliubov – Bennaceur K., 555
Heisenberg uncertainty principle – Abram I., 187
Herbicides and pesticides – Bergeron V., 211
High bit rate modulation – Gautheron O., 115
High brightness – Wenzel H., 649
High Frequency Instrument – Bouchet F.R., 861
High power – Wenzel H., 649
High power laser – Reithmaier J.P., 611
Holey optical fibres – Monro T.M., 175
Hybrid integration – Bonar J.R., 51
Hydrogen storage – Becher M., 1055

I

III-V semiconductors – Sagnes I., 675
Inflation – Parentani R., 935
Information theory – Desurvire E., 11
Inhomogeneous broadening – Reithmaier J.P., 611
Integrated optics – Bonar J.R., 51 – Carencio A., 85
Integrated tap detector – Bonar J.R., 51
Integrins – Thierry J.P., 289
Interferometers – Leclerc O., 163
Ion fluxes – Strazzulla G., 791
Ion irradiation – Strazzulla G., 791
Ion populations – Strazzulla G., 791
Isotopic anomalies – Sorlin O., 541

J

Joint density – Lambin P., 1009

K

Kuiper Belt – Davies J.K., 733 – Petit J.-M., 743 – Doressoundiram A.,

755 – Cruikshank D.P., 783 – Stern S.A., 803 – Morbidelli A., 809

L

Laser diodes – Joullié A., 621
Light neutron-rich nuclei – Freer M., 475
Light scattering – Cruikshank D.P., 783
Linewidth – Blin S., 687
Low Frequency Instrument – Bouchet F.R., 861

M

Magnetism – Rezzouk A., 715
Many-body correlations – Van Isacker P., 529
MAXIMA – Stompor R., 841
Mean field – Bennaceur K., 555
Mechanical oscillators – Long J.C., 337
Membrane rupture and permeation – Evans E., 265
Membranes – Fery A., 259
MEMS – Blau G., 75
Metro network – Berthelon L., 127
Micro-electronics – Carencio A., 85
Micro-opto-electro-mechanical systems – Sagnes I., 675
Micro-structured optical fibres – Monro T.M., 175
Mid-infrared – Joullié A., 621 – Sirtori C., 639
Modal phase matching – Berger V., 701
Modelling – Wenzel H., 649
Modulation formats – Ait Sab O., 95
Motility – Boukellal H., 275
Multi-wavelength amplification – Reithmaier J.P., 611

N

Nanoelectronics – Lambin P., 1009
Nanostructured graphite – Becher M., 1055
Narrow linewidth – Reithmaier J.P., 611
Near-infrared spectroscopy – Dotto E., 775
Neptune – Kourganoff V., 305
Neutron dripline – Orr N., 451

Neutron halos – Orr N., 451
Neutron rich nuclei – von Oertzen W., 465
Noiseless amplification – Abram I., 187
Noiseless branching – Abram I., 187
Nonlinear fibre devices – Monro T.M., 175
Nonlinear optics – Bigo S., 105 – Leclerc O., 163 – Abram I., 187
Nonlinear Schrödinger equation – Desurvire E., 11
Nuclear clusters and molecules – von Oertzen W., 465
Nuclear molecules – Freer M., 475
Nuclear physics – Van Isacker P., 529
Nuclear structure – Kanada-En'yo Y., 497 – Sorlin O., 541
Nuclear transformation – Blank B., 521

O

OADM – Berthelon L., 127
Opaque networks – Berthelon L., 127
Optic – Bayart D., 65
Optical – Blau G., 75
Optical communication systems – Gautheron O., 115
Optical communications – Desurvire E., 11 – Leclerc O., 163
Optical fiber – Desurvire E., 11 – Nouchi P., 29 – Riant I., 41 – Bigo S., 105
Optical fiber transmission systems – Ait Sab O., 95
Optical gates – Leclerc O., 163
Optical injection – Blin S., 687
Optical network management – Berthelon L., 127
Optical network planning – Berthelon L., 127
Optical networking – Berthelon L., 127
Optical regeneration – Leclerc O., 163
Optical signal processing – Leclerc O., 163
Optical soliton – Turitsyn S.K., 145 – Leclerc O., 163
Optical switching – Berthelon L., 127
Optical system design – Berthelon L., 127

Optical telecommunications – Riant I., 41 – Carencu A., 85
Optical transmission – Nouchi P., 29
Opto-electronics – Carencu A., 85
Orbital structure – Morbidelli A., 809
OXC – Blau G., 75 – Berthelon L., 127

P

Pairing – Van Isacker P., 529
Parametric emission – Abram I., 187
Parametric fluorescence – Berger V., 701
Particles – Fery A., 259 – Benakli K., 363
Pastes – Cloitre M., 221
Phase closure imaging – Lannes A., 725
Phase locking – Blin S., 687
Phase modulation – Ait Sab O., 95
Photometry – Doressoundiram A., 755
Photonic – Blau G., 75
Photonic bandgaps – Abram I., 187
Photonic crystal fibres – Monro T.M., 175
Planck – Bouchet F.R., 861
Plutinos – Davies J.K., 733
Pluto – Kourganoff V., 305
Polyelectrolyte microgels – Cloitre M., 221
Polyelectrolytes – Fery A., 259
Polymerisation – Boukellal H., 275
Polymers – Hervet H., 241
Polymersome – Dalhaimer P., 251
Progression – Thierry J.P., 289
Purcell effect – Berger V., 701

Q

Quantum cascade laser – Joullié A., 621 – Sirtori C., 639
Quantum dot – Berger V., 701
Quantum dot laser – Reithmaier J.P., 611
Quantum engineering – Sirtori C., 639
Quantum field theory – Parentani R., 935
Quantum information – Berger V., 701
Quantum key distribution – Abram I., 187

Quantum noise – Desurvire E., 11 – Abram I., 187
Quantum non-demolition measurements – Abram I., 187
Quantum optics – Abram I., 187
Quantum superposition – Abram I., 187
Quantum teleportation – Abram I., 187

R

Raman – Bayart D., 65
Raman amplifiers – Bigo S., 105
Raman spectroscopy – Sauvajol J.-L., 1035
Recombination enhanced defect reaction – Jiménez J., 663
Relaxation time – Sirtori C., 639
Remote amplification – Gautheron O., 115
Resonant tunneling – Sirtori C., 639
RS codes – Ait Sab O., 95

S

Scalability – Blau G., 75
Scalar fields – Long J.C., 337
Scanning microscopy – Long J.C., 337
Scattered disk objects – Davies J.K., 733
Secondary anisotropies – Lagache G., 891
Self-assembled dots – Reithmaier J.P., 611
Self-calibration – Lannes A., 725
Semiconductor components – Leclerc O., 163
Semiconductor laser – Sirtori C., 639 – Wenzel H., 649 – Blin S., 687
Semiconductor optical amplifier – Bonar J.R., 51
Shannon–Hartley theorem – Desurvire E., 11
Shot noise – Abram I., 187
Single photon source – Berger V., 701
Small bodies – Fulchignoni M., 767
Solar system – Doressoundiram A., 755 – Fulchignoni M., 767
Spectral gain – Reithmaier J.P., 611
Spectral transfer – Blin S., 687
Spectroscopy – Cruikshank D.P., 783
Splash – Bergeron V., 211
Spontaneous emission – Abram I., 187

Spray drift – Bergeron V., 211
Squeezed quantum noise – Abram I., 187
Structure – Rezzouk A., 715
Submarine cable systems – Gautheron O., 115
Supernovae – Sorlin O., 541
Switch – Blau G., 75

T

Tapered lasers – Wenzel H., 649
Telecommunication – Bayart D., 65
Telecommunication networks – Bigo S., 105
Thin foil – Bonnet R., 961
TNO – Dotto E., 775
TNO chemistry – Strazzulla G., 791
TNO colors – Strazzulla G., 791
Topology – Uzan J.-P., 945
Torsion pendulum – Long J.C., 337
Trans-Neptunian objects – Davies J.K., 733 – Petit J.-M., 743 – Doresoundiram A., 755 – Strazzulla G., 791

Trans-Neptunians – Fulchignoni M., 767
Transmission – Bigo S., 105
Transparent networks – Berthelon L., 127
Tunable lasers – Sagnes I., 675
Turbo codes – Ait Sab O., 95
Twin photons source – Berger V., 701
Two-proton radioactivity – Blank B., 521
Type-I lasers – Joullié A., 621
Type-II lasers – Joullié A., 621

U

Unstable nuclei – Kanada-En'yo Y., 497

V

Vacuum fluctuations – Abram I., 187
Variable optical attenuator – Bonar J.R., 51

Vertical surface emitting lasers – Sagnes I., 675
Very/ultra-long haul – Berthelon L., 127
Vesicles – Dalhaimer P., 251
Visible spectroscopy – Dotto E., 775

W

'W' lasers – Joullié A., 621
Wall slip – Hervet H., 241
Waveguide – Blau G., 75
Wavelength division multiplexing – Bonar J.R., 51
Wavelength stabilisation – Reithmaier J.P., 611
Wavelength-division multiplexing (WDM) – Desurvire E., 11 – Bayart D., 65 – Gautheron O., 115
Weathering – Strazzulla G., 791
Wetting – Fery A., 259
Worm micelles – Dalhaimer P., 251
