

COMPTES RENDUS PHYSIQUE

Tome 6 (2005) – N° 2

© 2004, original artwork Pascal Dusapin, concept Gérard Segard

Published for the World Year of Physics 2005

Publié pour 2005 Année Mondiale de la Physique.

DOSSIER

Strings, gravity, and the quest for unification / *Cordes, gravitation, et la quête d'unification*

Guest editor / *Rédacteur en chef invité* : Ignatios Antoniadis

| | |
|--|-----|
| • Foreword David Gross | 161 |
| • Minimal string theory Nathan Seiberg, David Shih | 165 |
| • Ricci flows and their integrability in two dimensions Ioannis Bakas | 175 |
| • Covariant multiloop superstring amplitudes Nathan Berkovits | 185 |
| • No-scale supergravity from higher dimensions Riccardo D'Auria, Sergio Ferrara, Mario Trigiante | 199 |
| • Modular bootstrap of boundary $N = 2$ Liouville theory Tohru Eguchi | 209 |
| • Super Yang–Mills, matrix models and geometric transitions Frank Ferrari | 219 |
| • Wormholes in AdS Liat Maoz | 231 |

Suite du sommaire page suivante

Sommaire (suite)

- What is inside a black hole?
Samir D. Mathur 243
- Anomalies, Gauss laws, and Page charges in M-theory
Gregory W. Moore 251
- Z-theory: chasing m/f theory
Nikita Nekrasov 261
- Field theory supertubes
Paul K. Townsend 271
