

COMPTES RENDUS PHYSIQUE

Tome 7 (2006) – N° 5

Induced currents in an object with a cavity.

Représentation des courants induits sur un objet avec cavité.

DOSSIER

Electromagnetic modelling / *Modélisation électromagnétique*

Guest editors / *Rédacteurs en chef invités* : Vincent Gobin, Patrick Joly

- Foreword
Vincent Gobin, Patrick Joly 471
- Some applications of substructuring and domain decomposition techniques to radiation and scattering of time-harmonic electromagnetic waves
Nolwenn Balin, Abderrahmane Bendali, M'Barek Fares, Florence Millot, Nicolas Zerbib 474
- Sub-domain methods for collaborative electromagnetic computations
Paul Soudais, André Barka 486
- Discontinuous Galerkin methods for Maxwell's equations in the time domain
Gary Cohen, Xavier Ferrieres, Sébastien Pernet 494
- Realistic numerical modelling of human head tissue exposure to electromagnetic waves from cellular phones
Gilles Scarella, Olivier Clatz, Stéphane Lanteri, Grégory Beaume, Steve Oudot, Jean-Philippe Pons, Sergo Piperno, Patrick Joly, Joe Wiart 501
- A numerical strategy for a high frequency electromagnetic scattering problem in a mixed formulation
Katherine Mer-Nkonga, Michel Mandallena, David Goudin, Bruno Stupfel, Francis Collino 509
- Stable integral equations for the iterative solution of electromagnetic scattering problems
David P. Levadoux 518

Suite du sommaire page suivante

Sommaire (suite)

- Higher order generalized impedance boundary conditions in electromagnetic scattering problems
Marc Duruflé, Housseem Haddar, Patrick Joly 533
- Probabilistic modelling of stochastic interactions between electromagnetic fields and systems
Bastiaan L. Michielsen 543
