

## Keyword index Vol. 9, 2008

### A

- Ab initio calculations** – Caturla M.J., 401  
**Acoustic phonon** – Cassabois G., 830  
**Alloy** – Nastar M., 362  
**Antenna** – Kante B., 31  
**Atomic collision cascades** – Vladimirov P., 303  
**Atomic modelling** – Serruys Y., 437  
**Auto-ionization** – Frémont F., 469  
**Automatic and reconfigurable devices** – Morea A., 985

### B

- Band mapping** – Venturini F., 517  
**Behavioral modeling** – Béchou L., 95  
**Bend-insensitive fiber** – de Montmorrillon L.-A., 1045  
**BiFeO** – Murakami H., 169  
**Bulk-heterojunction** – Bouclé J., 110

### C

- Capillaries** – Snigirev A., 507  
**Carbon** – Fu C.C., 335  
**Carbon nanotube** – Demoustier S., 53  
**Cavity quantum electrodynamics** – Badolato A., 850  
**Chromatic dispersion** – Antona J.-C., 963 – Gautheron O., 1031  
**CNTFET** – Cazin d'Honincthun H., 67  
**Coherence** – Sutton M., 657

- Coherent detection** – Charlet G., 1012  
**Coherent radiation** – van der Laan G., 570  
**Colloid** – Guyot-Sionnest P., 777  
**Complex materials** – Martin G., 323  
**Conjugated polymers** – Bouclé J., 110  
**Correlated systems** – Panaccione G., 524  
**Cutoff frequency** – Cazin d'Honincthun H., 67

### D

- Decoherence** – Cassabois G., 830  
**Defects** – Fu C.C., 335 – Caturla M.J., 401  
**Delay time** – Cazin d'Honincthun H., 67  
**Differential phase shift keying** – Gautheron O., 1031  
**Diffusion** – Nastar M., 362 – Debbasch F., 767  
**Digital signal processing** – Charlet G., 1012  
**Dipole antenna** – Demoustier S., 53  
**Dislocation dynamics** – Fivel M.C., 427  
**Dislocations** – Bonnet R., 276 – Bouchaud J.-P., 1067  
**Disordered systems** – Monaco G., 608  
**Dispersion management** – Bononi A., 947 – Antona J.-C., 963  
**Dispersion-slope-matched fiber** – Gautheron O., 1031  
**Displacement damage** – Vladimirov P., 303

- DTS** – Nataf H.-C., 702  
**Dynamo** – Nozières P., 683 – VKS Collaboration, 689 – Nataf H.-C., 702 – Dormy E., 711 – Gailitis A., 721 – Müller U., 729 – Ponty Y., 749 – Rieutord M., 757

### E

- Elastic properties** – Hadjoub Z., 903  
**Electric field induced optical rectification** – Malevich V.L., 130  
**Electro-absorption** – Lampin J.-F., 153  
**Electro-optic sampling** – Lippens D., 184  
**Electron analyser** – Panaccione G., 524  
**Electron correlations** – Lüning J., 537  
**Electron-phonon scattering** – Cazin d'Honincthun H., 67  
**Erbium doped fiber amplifier** – Gautheron O., 1031  
**Exciton** – Govorov A.O., 857

### F

- Failure mechanisms** – Béchou L., 95  
**Fe–Cr alloys** – Nguyen-Manh D., 379  
**Femtosecond optical pulse** – Mangeney J., 142  
**Ferritic steels** – Boutard J.-L., 287  
**Ferritic/Martensitic steels** – Boutard J.-L., 287  
**Fiber To The Home (FFTH)** – Chanclou P., 935  
**Fick's law** – Debbasch F., 767

**Finite element method simulations** – Deibel J.A., 215  
**First principles** – Fu C.C., 335  
**Fluid dynamo** – Léorat J., 741  
**Forward error correction codes** – Gautheron O., 1031  
**Free electron laser** – Couprie M.-E., 487  
**Fresnel zone plates** – Snigirev A., 507  
**FTTH** – de Montmorillon L.-A., 1045  
**Fusion materials** – Möslang A., 457

## G

**Gallium arsenide** – Kužel P., 197  
**GaN/AlN** – Lefebvre P., 816  
**Gas phase pollutants** – Hindle F., 262

## H

**Hartree–Fock atom** – Als-Nielsen J., 479  
**Helical channel flow** – Müller U., 729  
**Helium** – Fu C.C., 335 – Schäublin R., 389 – Caturla M.J., 401  
**Helium embrittlement** – Möslang A., 457  
**High bit rate modulation** – Gautheron O., 1031  
**High resolution photoemission** – Panaccione G., 524  
**High speed optical transmission** – Veith G., 1002  
**Holey fiber** – de Montmorillon L.-A., 1045  
**Hybrid** – Bouclé J., 110  
**Hybrid devices** – Vuillaume D., 78  
**Hyperfine interaction** – Ruffer R., 595 – Krebs O., 874

## I

**IFMIF** – Möslang A., 457  
**Impurity** – Govorov A.O., 857  
**Inelastic X-ray scattering** – Monaco G., 608  
**Infra-red** – Lippens D., 184  
**Infrared metamaterial** – Kante B., 31  
**Integral equation** – Tanaka K., 16  
**Integrated optics** – Lourtioz J.-M., 4

**Inter- and intra-molecular multiple-quantum coherences** – Cai C., 119  
**Interferences** – Frémont F., 469  
**Interstitial** – Nastar M., 362  
**Interstitial defect** – Dudarev S.L., 409  
**Intersublevel transitions** – Boucaud P., 840  
**Ionic irradiation** – Mangeney J., 142  
**Iron** – Fu C.C., 335 – Caturla M.J., 401  
**Irradiation** – Nastar M., 362 – Rodney D., 418  
**Irradiation damage** – Möslang A., 457

## J

**JANNUS** – Serruys Y., 437  
**Jules Horowitz Reactor** – Iracane D., 445

## K

**Kerr effect** – Bononi A., 947  
**Kinematic code** – Léorat J., 741  
**Kinetic evolution** – Barbu A., 353  
**Kinetic Monte Carlo calculations** – Caturla M.J., 401  
**Kinetics** – Nguyen-Manh D., 379  
**Kirkpatrick–Baez mirrors** – Snigirev A., 507  
**Kohonen maps** – Sinyukov A., 248

## L

**Left-handed material** – Kante B., 31  
**Lifetime** – Béchou L., 95  
**LINAC** – Couprie M.-E., 487  
**Linear accelerator** – Couprie M.-E., 487  
**Liquid sodium** – Gailitis A., 721  
**Loading effect** – Hadjoub Z., 903  
**Low temperature grown gallium arsenide** – Lampin J.-F., 153  
**LSI** – Murakami H., 169

## M

**Magnetic boundary conditions** – Léorat J., 741  
**Magnetic dichroism** – van der Laan G., 570

**Magnetic domains** – van der Laan G., 570  
**Magnetic field** – Gailitis A., 721  
**Magnetic impurities** – Besombes L., 885  
**Magnetic polaron** – Govorov A.O., 857  
**Magnetic resonance imaging** – Cai C., 119  
**Magnetism** – Acremann Y., 585  
**Magneto hydrodynamics** – Nozières P., 683 – VKS Collaboration, 689 – Dormy E., 711 – Müller U., 729 – Ponty Y., 749  
**Material testing** – Iracane D., 445  
**Metamaterials** – Lourtioz J.-M., 4 – Kante B., 31 – Lippens D., 184  
**Microstructure** – Schäublin R., 389  
**Microwave** – Demoustier S., 53  
**Mid-infrared** – Boucaud P., 840  
**Molecular beam epitaxy** – Atkinson P., 788  
**Molecular dynamics** – Rodney D., 418  
**Molecular electronics** – Boudenot J.-C., 41 – Vuillaume D., 78  
**Monte Carlo simulation** – Cazin d'Honincthun H., 67  
**Motional narrowing** – Cassabois G., 830  
**Multi-scale modelling** – Barbu A., 353  
**Multimode fiber** – de Montmorillon L.-A., 1045  
**Multiscale modelling** – Fivel M.C., 427

## N

**Nano-electronics** – Vuillaume D., 78  
**Nanocavity** – Cluzel B., 24  
**Nanocrystal** – Guyot-Sionnest P., 777  
**Nanoelectronics** – Boudenot J.-C., 41  
**Nanostructures** – van der Laan G., 570  
**Nanotechnologies** – Demoustier S., 53 – Béchou L., 95  
**Nanowire** – Zwiller V., 804  
**Natural Optical Activity** – Rogalev A., 642  
**Near field** – Adam A.J.L., 161  
**Negative index** – Kante B., 31  
**Negative refraction** – Lourtioz J.-M., 4  
**Negative refractive index materials** – Lippens D., 184

**NEMS** – Demoustier S., 53  
**Neutron irradiation** – Vladimirov P., 303 – Nordlund K., 343 – Dudarev S.L., 409 – Serruys Y., 437  
**Neutron source** – Möslang A., 457  
**Neutron spectra** – Möslang A., 457  
**NLSE** – Bononi A., 947  
**Non-linear optics** – Antona J.-C., 963  
**Non-reciprocal dichroism** – Rogalev A., 642  
**Nonmetallic materials** – Limoge Y., 370  
**Nuclear magnetic resonance** – Cai C., 119  
**Nuclear resonance scattering** – Ruffer R., 595

## O

**Optical Access network** – Chanclou P., 935  
**Optical communications** – Bononi A., 947 – Charlet G., 1012  
**Optical fiber** – Joindot M., 914 – Antona J.-C., 963 – Veith G., 1002 – de Montmorillon L.-A., 1045  
**Optical modulation** – Charlet G., 1012  
**Optical orientation** – Krebs O., 874  
**Optical properties** – Govorov A.O., 857 – Besombes L., 885  
**Optical transport networks** – Veith G., 1002

## P

**P3HT** – Bouclé J., 110  
**Periodically loaded transmission line** – Lippens D., 184  
**Permutation cycles** – Bouchaud J.-P., 1067  
**Phase shift keying** – Charlet G., 1012  
**Photo-Dember effect** – Malevich V.L., 130  
**Photoconductive antenna** – Mangeney J., 142 – Deibel J.A., 215  
**Photoemission spectroscopy** – Venturini F., 517  
**Photonic crystals** – Lourtioz J.-M., 4 – Cluzel B., 24 – Lippens D., 184 – Kužel P., 197 – Badolato A., 850  
**Photonic integrated circuit** – Debrégeas-Sillard H., 1055  
**Planetary core** – Nataf H.-C., 702

**Planning and routing tools** – Morea A., 985  
**Plasmonics** – Lourtioz J.-M., 4 – Kante B., 31  
**Plasticity** – Schäublin R., 389 – Rodney D., 418 – Fivel M.C., 427  
**Polarization analysis** – van der Laan G., 570  
**Polarization dependent X-ray spectroscopy** – Rogalev A., 642  
**Polarization multiplexing** – Charlet G., 1012  
**Polaron** – Boucaud P., 840  
**Product operator matrix** – Cai C., 119  
**Propagation constant** – Tanaka K., 16

## Q

**Quality of transmission estimator** – Morea A., 985  
**Quantum capacitance** – Cazin d'Honinethun H., 67  
**Quantum dot** – Guyot-Sionnest P., 777 – Atkinson P., 788 – Lefebvre P., 816 – Badolato A., 850 – Boucaud P., 840 – Govorov A.O., 857 – Krebs O., 874 – Besombes L., 885  
**Quantum emitter** – Zwiller V., 804  
**Quantum information** – Badolato A., 850  
**Quantum optics** – Badolato A., 850

## R

**Radiation aging** – Limoge Y., 370  
**Radiation damage** – Martin G., 323 – Fu C.C., 335 – Nordlund K., 343 – Schäublin R., 389 – Caturla M.J., 401  
**Radiation effects** – Boutard J.-L., 287  
**Rate theory** – Caturla M.J., 401  
**Recoil energy spectra** – Möslang A., 457  
**Refractive lenses** – Snigirev A., 507  
**Reliability** – Béchou L., 95  
**RIXS** – Lüning J., 537  
**Road map** – Boudenot J.-C., 41

## S

**Sampling** – Lampin J.-F., 153

**Scanning laser imaging** – Murakami H., 169  
**Scanning Near-Field Optical Microscopy** – Cluzel B., 24  
**Semiconductor** – Guyot-Sionnest P., 777 – Badolato A., 850  
**SiC<sub>f</sub>/SiC composites** – Boutard J.-L., 287  
**Silver surface** – Venturini F., 517  
**Simulation software** – Cai C., 119  
**Single electron** – Frémont F., 469  
**Solar cells** – Bouclé J., 110  
**Solid He<sup>4</sup>** – Bouchaud J.-P., 1067  
**Speckle** – Sutton M., 657  
**Speckle pattern** – van der Laan G., 570  
**Spectral diffusion** – Cassabois G., 830  
**Spherical Couette** – Nataf H.-C., 702  
**Spin relaxation** – Krebs O., 874  
**Split ring resonators** – Lippens D., 184  
**Steel** – Schäublin R., 389  
**Stochastic processes** – Debbasch F., 767  
**Storage ring** – Couprie M.-E., 487  
**Strontium titanate** – Kužel P., 197  
**Structural dynamics** – Ruffer R., 595  
**Structural materials** – Boutard J.-L., 287  
**Submarine cables** – Joindot M., 914  
**Sun** – Rieutord M., 757  
**Superconductors** – Murakami H., 169  
**Supersolidity** – Bouchaud J.-P., 1067  
**Surface acoustic waves** – Hadjoub Z., 903  
**Surface plasmon polaritons** – Deibel J.A., 215  
**Surface plasmons** – Tanaka K., 16 – Nazarov M., 232  
**Switch** – Demoustier S., 53  
**Synchrotron radiation** – Couprie M.-E., 487 – Acremann Y., 585 – Baruchel J., 624  
**Synthetic aperture** – Sinyukov A., 248  
**System design** – Antona J.-C., 963

## T

**Taylor–Green** – Ponty Y., 749  
**Telecommunication networks** – Antona J.-C., 963  
**Telecommunication wavelength** – Mangeney J., 142

**Terahertz** – Mangeney J., 142 – Adam A.J.L., 161 – Deibel J.A., 215 – Nazarov M., 232 – Sinyukov A., 248 – Hindle F., 262  
**Terahertz electric field** – Adam A.J.L., 161  
**Terahertz emission** – Malevich V.L., 130 – Murakami H., 169  
**Terahertz pulses** – Lampin J.-F., 153  
**Terahertz radiation** – Kužel P., 197  
**Terahertz technology** – Lippens D., 184  
**Thermodynamics** – Nguyen-Manh D., 379  
**Thin films** – Bonnet R., 276 – Hadjoub Z., 903  
**Time-domain dynamics** – Grübel G., 668  
**Transistor** – Boudenot J.-C., 41  
**Transition metal** – Dudarev S.L., 409  
**Transmission electron microscopy** – Bonnet R., 276  
**Transparent optical network** – Morea A., 985  
**Transport networks** – Joindot M., 914  
**Tunable devices** – Kužel P., 197  
**Tunable, automatic and reconfigurable devices** – Morea A., 985

**Turbulence** – Nozières P., 683 – VKS Collaboration, 689 – Dormy E., 711 – Ponty Y., 749 – Rieutord M., 757

## U

**Ultrafast Microscopy** – Acremann Y., 585

## V

**Vacancy** – Nastar M., 362  
**Vacuum Rabi splitting** – Badolato A., 850  
**Varactor** – Kante B., 31  
**Velocity dispersion** – Hadjoub Z., 903

## W

**Waveguide** – Tanaka K., 16  
**Waveguides** – Deibel J.A., 215 – Snigirev A., 507  
**Wavelength Division Multiplexing** – Joindot M., 914

**Wavelength division multiplexing** – Gautheron O., 1031  
**WDM** – Bononi A., 947  
**Wurtzite phase** – Lefebvre P., 816

## X

**X-ray diffraction** – Sutton M., 657  
**X-ray Free Electron Laser (XFEL)** – Grübel G., 668  
**X-ray imaging** – Baruchel J., 624  
**X-ray inelastic scattering** – Lüning J., 537  
**X-ray micro-optics** – Snigirev A., 507  
**X-ray Photon Correlation Spectroscopy (XPCS)** – Grübel G., 668  
**X-ray scattering** – van der Laan G., 570  
**X-ray speckles** – Grübel G., 668  
**X-rays and matter** – Als-Nielsen J., 479

## Y

**Young** – Frémont F., 469
