

COMPTES RENDUS PHYSIQUE

Tome 10 (2009) – N° 2–3

Simulation of the propagation of a laser pulse, focused at a plasma entrance, showing a snapshot of the electron density across the middle of the simulation window (from Silva et al., this issue, pp. 167–175).

Simulation de la propagation d'une impulsion laser focalisée à l'entrée d'un plasma, montrant un instantané de la densité électronique pris au milieu de la fenêtre de simulation (voir Silva et al., ce numéro, pp. 167–175).

DOSSIER

Laser acceleration of particles in plasmas / *Accélération laser de particules dans les plasmas*

Guest editor / *Rédacteur en chef invité* : Patrick Mora

- Foreword
Patrick Mora 103
- Principles of laser–plasma accelerators
Victor Malka, Patrick Mora 106
- Review of high-energy plasma wakefield experiments
Patric Muggli, Mark J. Hogan 116
- Progress on laser plasma accelerator development using transversely and longitudinally shaped plasmas
Wim P. Leemans, E. Esarey, C.G.R. Geddes, Cs. Toth, C.B. Schroeder, K. Nakamura, A.J. Gonsalves, D. Panassenko, E. Cormier-Michel, G.R. Plateau, C. Lin, D.L. Bruhwiler, J.R. Cary 130
- Laser-driven electron acceleration in plasmas with few-cycle pulses
Laszlo Veisz, Karl Schmid, Franz Tavella, Sofia Benavides, Raphael Tautz, Daniel Herrmann, Alexander Buck, Bernhard Hidding, Andrius Marcinkevicius, Ulrich Schramm, Michael Geissler, Jürgen Meyer-ter-Vehn, Dietrich Habs, Ferenc Krausz 140
- Physics of colliding laser pulses in underdense plasmas
Jérôme Faure, Clément Rechatin, Ahmed Ben-Ismaïl, Jaeku Lim, Xavier Davoine, Erik Lefebvre, Victor Malka 148
- Quasi-monoenergetic electron acceleration in relativistic laser-plasmas
Alexander Pukhov, Sergei Gordienko, Vasili Seredov, Igor Kostyukov 159

Sommaire (suite)

- Laser electron acceleration with 10 PW lasers
Luis O. Silva, F. Fiúza, R.A. Fonseca, J.L. Martins, S.F. Martins, J. Vieira, C. Huang, W. Lu, F. Tsung, M. Tzoufras, W.B. Mori 167
- Laser acceleration of low emittance, high energy ions and applications
Julien Fuchs, Patrick Audebert, Marco Borghesi, Henri Pépin, Oswald Willi 176
- Dynamic control and enhancement of laser-accelerated protons using multiple laser pulses
David C. Carroll, Dimitri Batani, Roger G. Evans, Yannick Glinec, Christian Homann, Rashida Jafer, Satyabrata Kar, Filip Lindau, Olle Lundh, Keith Markey, David Neely, Frank Nürnberg, Anders Persson, Mark N. Quinn, Alex P.L. Robinson, Markus Roth, Claes-Göran Wahlström, Xiaohui Yuan, Matthew Zepf, Paul McKenna 188
- Ion acceleration with high-intensity lasers and application to isochoric heating
Erik Lefebvre, Michaël Carrié, Rachel Nuter 197
- Theory and simulation of ion acceleration with circularly polarized laser pulses
Andrea Macchi, Tatiana V. Liseikina, Sara Tuveri, Silvia Veghini 207
- On the ion acceleration by high power electromagnetic waves in the radiation pressure dominated regime
Sergei V. Bulanov, Timur Zh. Esirkepov, Francesco Pegoraro, Marco Borghesi 216
