Propagation and plasmas: new challenges, new applications / *Propagation et plasmas, nouveaux enjeux, nouvelles applications*

Guest editors / *Rédacteurs en chef invités* : Alain Bourdillon, Philippe Savoini

- Foreword
Alain Bourdillon, Philippe Savoini 111
- Wavenumber spectrum of micro-turbulence in tokamak plasmas
L. Vermare, Ö.D. Gürçan, P. Hennequin, C. Honoré, X. Garbet, J.C. Giacalone, R. Sabot, F. Clairet, Tore Supra Team 115
- Coherent vorticity extraction in resistive drift-wave turbulence: Comparison of orthogonal wavelets versus proper orthogonal decomposition
Shimpei Futatani, Wouter J.T. Bos, Diego del-Castillo-Negrete, Kai Schneider, Sadruddin Benkadda, Marie Farge 123
- Observation and theoretical modeling of electron scale solar wind turbulence
Fouad Sahraoui, Melvyn L. Goldstein, K. Abdul-Kader, Gérard Belmont, Laurence Rezeau, Patrick Robert, Patrick Canu 132
- Ion acceleration in antiparallel collisionless magnetic reconnection: Kinetic and fluid aspects
Nicolas Aunai, Gérard Belmont, Roch Smets 141
- Third-order Elsässer moments in axisymmetric MHD turbulence
Sébastien Galtier 151
- The DEMETER mission, recent investigations on ionospheric effects associated with man-made activities and seismic phenomena
Tatsuo Onishi, Michel Parrot, Jean-Jacques Berthelier 160

Sommaire (suite)

- Lightning and TLE electric fields and their impact on the ionosphere
Thomas Farges, Elisabeth Blanc 171
- Modeling global ionosphere and inhomogeneities
Yannick Béniguel 180
- Ionosphere scintillation effects on navigation systems
Yannick Béniguel, Jean-Pierre Adam, Alain Bourdillon, P. Lassudrie-Duchesne 186
- Earth–ionosphere couplings, magnetic storms, seismic precursors and TLEs: Results and prospects of the [SQUID]² system in the low-noise underground laboratory of Rustrel-Pays d’Apt
G. Waysand, J. Marfaing, E. Pozzo di Borgo, R. Blancon, M. Pyée, M. Yedlin, P. Barroy, M. Auguste, D. Boyer, A. Cavaillou, J. Poupeneu, C. Sudre 192
