

Keyword index

Vol. 12, 2011

2 dimensionality – Gariglio S., 591

A

Ab initio calculations – Blase X., 584
Absorption lines – Petitjean P., 288
Adiabatic transport – Douçot B., 323
Afterglow – Godet O., 276
Antiferromagnetism – Bourbonnais C., 532
Atom – Perrin H., 417
Atomic Force Microscopy – Chevrier J., 898
Axion-like forces – Antoniadis I., 755

B

Bayesian network – Wiesner M.R., 659
Black holes – Zhang B., 206 – Atteia J.-L., 255
Bose–Einstein condensate – Hunger D., 871
Bosonic molecule – Carbonell J., 47
Bound states – Orso G., 39
Bulk Lorentz factor – Piron F., 267
Bursts – Zhang B., 206

C

Carbon nanotubes – Lin H., 909
Casimir force – Chevrier J., 898
Cavity optomechanics – Anetsberger G., 800 – Hunger D., 871
Cavity-mediated coupling – Heinrich G., 837
CeCoIn₅ – Knebel G., 542
Čerenkov telescopes – Piron F., 267
CeRhIn₅ – Knebel G., 542
Chern–Simons action – Bieri S., 332
Chiral anomaly – Bieri S., 332
Cluster – Sahraoui F., 132
Coherent structures – Futatani S., 123
Cold atom physics – Carbonell J., 47
Cold neutrons – Nesvizhevsky V.V., 791

Complex oxides – Gariglio S., 591
Cooling – Perrin H., 417
Copper oxides – Gariglio S., 591
Cosmology – Petitjean P., 288 – Paul J., 298
Coupled dynamics – Heinrich G., 837
CP violation – Robbe P., 921

D

Diagnostic – Boisseau P., 620
Dissipation – Sahraoui F., 132
Domain wall – Grollier J., 309
Doped insulators – Blase X., 584
Drug delivery – Boisseau P., 620
Dynamical backaction – Anetsberger G., 800

E

Earth satellite navigation – Béniguel Y., 180
Earth–ionosphere couplings – Waysand G., 192
EELS – Lin H., 909
Effective theory – Tölle S., 59
Efimov effect – Gross N., 4 – Naidon P., 13 – Mora C., 27 – Mora C., 71
Electric field effect – Gariglio S., 591
Electrical metrology – Poirier W., 347
Electron microscopy – Bayle-Guillemaud P., 614
Electronic Raman scattering – Sacuto A., 480
Elve – Farges T., 171
Environmental toxicity – Gaffet E., 648
Equivalence principle – Nesvizhevsky V.V., 791
Erbium-doped fibre amplifier – Desurvire E., 387
Experimental methods – Bourdel Th., 779
External confinement – Tölle S., 59

Extra short-range interactions – Baessler S., 707 – Antoniadis I., 755 – Nesvizhevsky V.V., 791
Extragalactic Background Light – Piron F., 267

F

Faddeev–Yakubovsky equations – Carbonell J., 47
Fano–Feshbach resonance – Naidon P., 13
Fermi – Piron F., 267
Fermi gas – Blume D., 86
Fermi surface – Vignolle B., 446
Ferromagnetism – Mineev V.P., 567 – Aoki D., 573
Feshbach resonance – Gross N., 4 – Mora C., 71
Few-body problem – Mora C., 27 – Mora C., 71
Fine structure constant – Cadoret M., 379
Fluid and kinetic physics – Aunai N., 141
Fundamental constants of physics – Poirier W., 347
Fundamental metrology – Poirier W., 347

G

Gamma-ray bursts – Zhang B., 206 – Greiner J., 226 – Lemoine M., 234 – Novak J., 246 – Atteia J.-L., 255 – Piron F., 267 – Godet O., 276 – Paul J., 298
Gap structure – Carrington A., 502
Graphene – Poirier W., 347 – Goerbig M.O., 369
Gravitation – Baessler S., 707 – Baessler S., 729
Gravitational field – Bourdel Th., 779
Gravitational waves – Novak J., 246 – Chaibi W., 888
Gravitational-wave interferometers – Verlot P., 826
GRBs – Petitjean P., 288

H

Heating – Sahraoui F., 132
Heavy fermions – Knebel G., 542 – Aoki D., 573
High temperature superconductors – Vignolle B., 446
High-energy astrophysics – Atteia J.-L., 255
High-resolution spectroscopy – Baessler S., 707 – Baessler S., 729
High- T_c – Kirtley J.R., 436
High- T_c superconductors – Bourges P., 461 – Sacuto A., 480
Hole doped cuprates – Sacuto A., 480
Host-galaxy – Petitjean P., 288
Human implant devices – Aubert H., 675
Human toxicity – Gaffet E., 648
Hybrid quantum systems – Hunger D., 871
Hybrid systems – Heinrich G., 837
Hydrodynamics – Godet O., 276

I

Instrumentation – Greiner J., 226
Integer quantum Hall effect – Douçot B., 323
Internet – Mitton N., 669
Interstellar medium – Petitjean P., 288
Ion acceleration – Aunai N., 141
Ionogram – Farges T., 171
Ionosphere – Onishi T., 160 – Béniguel Y., 180
Iron-based superconductors – Carrington A., 502
Iron-pnictide superconductors – Carrington A., 502 – Ishida K., 515

K

k-Filtering – Sahraoui F., 132

L

Laser – Perrin H., 417
Legal system – Lacour S., 693
LHC – Robbe P., 921
Life cycle – Wiesner M.R., 659
Lightning – Farges T., 171
Lithium – Naidon P., 13
Lorentz invariance – Piron F., 267
Loss of lock – Béniguel Y., 186
Low-energy effective theory – Bieri S., 332

M

Magnetic fields – Zhang B., 206
Magnetic penetration depth – Carrington A., 502
Magnetic reconnection – Aunai N., 141
Magnetic storms – Waysand G., 192
Magnetism – Grollier J., 309

Mechanical oscillator – Vitali D., 848 – Restrepo J., 860
Mechanically driven coherent photon dynamics – Heinrich G., 837
MEMS – Etaki S., 817
Metal-insulator transition – Blase X., 584
Metaphysical risk – Senjen R., 637
Metrology – Perrin H., 417
MHD – Galtier S., 151
Micro- and nanomechanical oscillators – Hunger D., 871
Micro-turbulence – Vermare L., 115
Microelectronics – Pautrat J.-L., 605
Microresonator – Anetsberger G., 800
Microsystems – Chevrier J., 898
Miniaturization – Pautrat J.-L., 605
Modulation format – Desurvire E., 387
Molecule – Perrin H., 417
Multi-messenger astrophysics – Atteia J.-L., 255
Multimode optomechanics – Heinrich G., 837
Multiwavelength observations – Godet O., 276

N

Nano-Panopticon – Ganascia J.-G., 684
Nanomaterials – Pautrat J.-L., 605 – Senjen R., 637 – Gaffet E., 648 – Wiesner M.R., 659
Nanomechanical oscillator – Anetsberger G., 800
Nanomedicine – Pautrat J.-L., 605 – Boisseau P., 620
Nanoparticles – Baessler S., 729
Nanosciences – Pautrat J.-L., 605 – Bayle-Guillemaud P., 614
Nanotechnology – Bayle-Guillemaud P., 614 – Boisseau P., 620 – Senjen R., 637 – Gaffet E., 648 – Aubert H., 675 – Ganascia J.-G., 684 – Lacour S., 693
Nanowire – Bayle-Guillemaud P., 614
Natural and man-made electromagnetic emissions – Onishi T., 160
Navigation systems – Béniguel Y., 186
Near Field Heat Transfer – Chevrier J., 898
NEMS – Etaki S., 817
Neutron detectors – Baessler S., 729
Neutron diffraction – Bourges P., 461
Neutron physics – Antoniadis I., 755
Neutron stars – Zhang B., 206
Nuclear magnetic resonance – Ishida K., 515
Nuclear spin – Gross N., 4
Numerical methods – Novak J., 246

O

Optical cavities – Chaibi W., 888
Optical cooling – Restrepo J., 860
Optical spring – Chaibi W., 888
Optical telecommunications – Desurvire E., 387

Optomechanical cavity – Vitali D., 848
Optomechanics – Restrepo J., 860
Order parameter symmetry – Ishida K., 515
Organic conductors – Bourbonnais C., 532

P

Pairing mechanism – Ishida K., 515
Pairing symmetry – Kirtley J.R., 436
Panopticon – Ganascia J.-G., 684
Particle acceleration – Lemoine M., 234
Particle physics – Robbe P., 921
Patent law – Lacour S., 693
Phase diagram – Gariglio S., 591
Phase transitions – Mineev V.P., 567
Photonics – Desurvire E., 387
Photothermal – Restrepo J., 860
Plasma – Béniguel Y., 180
Plasma turbulence – Futatani S., 123
Positioning errors – Béniguel Y., 186
Precision measurement – Anetsberger G., 800
Principle of precaution – Lacour S., 693
Privacy – Ganascia J.-G., 684
Proper orthogonal decomposition – Futatani S., 123
Pseudogap phase – Bourges P., 461

Q

QEMS – Etaki S., 817
Quadrature squeezing – Vitali D., 848
Quantum critical point – Knebel G., 542
Quantum fluctuations – Chevrier J., 898
Quantum ground-state – Restrepo J., 860
Quantum Hall effect – Bieri S., 332 – Poirier W., 347 – Cadoret M., 379
Quantum Hall effects – Goerbig M.O., 369
Quantum limit – Restrepo J., 860
Quantum mechanics – Baessler S., 707 – Baessler S., 729 – Nesvizhevsky V.V., 791
Quantum noise – Verlot P., 826
Quantum oscillations – Vignolle B., 446
Quantum phenomena – Bourdel Th., 779

R

Radiation mechanism – Zhang B., 206
Radiation pressure – Verlot P., 826 – Vitali D., 848
Radiation pressure cooling and amplification – Anetsberger G., 800
Radiation pressure noise – Chaibi W., 888
Radiative processes – Godet O., 276
Radio frequency identification – Mitton N., 669
Regenerative medicine – Boisseau P., 620
Regulations – Gaffet E., 648 – Lacour S., 693

RFID technology – Aubert H., 675
Risk appraisal framework – Senjen R., 637
Risk assessment – Wiesner M.R., 659

S

Safety – Bayle-Guillemaud P., 614
Scaling theory – Bourbonnais C., 532
Scintillations – Béniguel Y., 186
Seismic activity – Onishi T., 160
Semiconductors – Poirier W., 347
Shannon limit – Desurvire E., 387
Shock waves – Lemoine M., 234
Shocks – Zhang B., 206
Short-range two-body model – Blume D., 86
Solar wind – Sahraoui F., 132 – Galtier S., 151
Sousveillance – Ganascia J.-G., 684
Space instrumentation: SVOM – Atteia J.-L., 255
Spin transfer – Grollier J., 309
Spintronics – Grollier J., 309
Sprites – Farges T., 171 – Waysand G., 192

Squeezing spectrum – Vitali D., 848
SQUID – Waysand G., 192 – Etaki S., 817
SQUID microscopy – Kirtley J.R., 436
Stars – Zhang B., 206
STM/STS – Lin H., 909
Strong magnetic fields – Goerbig M.O., 369
Superconductivity – Bourbonnais C., 532 – Blase X., 584 – Gariglio S., 591
Surveillance – Ganascia J.-G., 684
SVOM – Paul J., 298

T

Theranostic – Boisseau P., 620
Thermal noise – Verlot P., 826
Three-body recombination – Mora C., 27
Tokamak plasma – Vermare L., 115
Topological arguments – Douçot B., 323
Trimers – Naidon P., 13 – Orso G., 39
Turbulence – Sahraoui F., 132 – Galtier S., 151
Types of knowledge – Senjen R., 637
Types of risk – Senjen R., 637

U

UCoGe – Aoki D., 573

UGe₂ – Aoki D., 573
Ultra-cold – Perrin H., 417
Ultracold atoms – Orso G., 39 – Hunger D., 871
Ultracold ions – Hunger D., 871
Ultra cold neutrons – Baessler S., 707 – Baessler S., 729
Unconventional superconductivity – Knebel G., 542 – Aoki D., 573
Unconventional superconductors – Kirtley J.R., 436
Universality – Naidon P., 13 – Tölle S., 59
URhGe – Aoki D., 573

W

Wavelength-division multiplexing – Desurvire E., 387
Wavelets – Futatani S., 123

Z

Zero-range potential – Naidon P., 13
