

COMPTES RENDUS PHYSIQUE

Tome 13 (2012) – N° 8

Cover illustration: Atelier Isatis, Dijon

DOSSIER

Nanophotonics and near field / *Nanophotonique et champ proche*

Guest editors / *Rédacteurs en chef invités* : **Frédérique de Fornel, Joseph Zyss**

- Foreword
Frédérique de Fornel, Joseph Zyss 783
- Negative index materials and time-harmonic electromagnetic field
Boris Gralak, Daniel Maystre 786
- Uncovering phase maps from surface plasmon resonance images: Towards a sub-wavelength resolution
Françoise Argoul, Thibault Roland, Audrey Fahys, Lotfi Berguiga, Juan Elezgaray 800
- High-resolution microscopy of plasmon field distributions by scanning tunneling luminescence and photoemission electron microscopies
Ludovic Douillard, Fabrice Charra 815
- Light polarization properties of three fold symmetry gold nanoparticles: Model and experiments
Hong Shen, Jérémy Rouxel, Nicolas Guillot, Marc Lamy de la Chapelle, Timothée Toury 830

Suite du sommaire page suivante

Sommaire (suite)

- Raman spectroscopy and polarization: Selected case studies
Razvigor Ossikovski, Gennaro Picardi, Gérald Ndong, Marc Chaigneau 837
- DNA – novel nanomaterial for applications in photonics and in electronics
Ileana Rau, James G. Grote, Francois Kajzar, Agnieszka Pawlicka 853
