Contents lists available at [SciVerse ScienceDirect](http://www.sciencedirect.com)

## Comptes Rendus Physique

[www.sciencedirect.com](http://www.sciencedirect.com)

## Keyword index

Vol. 13, 2012

**21 cm radio interferometry** – Ansari R., 46**3DXRD** – Offerman S.E., 268

## A

**Accident mitigation** – Barré B., 352**Accident prevention** – Barré B., 352**Ageing heat treatment** – Rolph J., 307**Alloys** – Nguyen-Thi H., 237**Aluminium alloys** – Proudhon H., 316**Antennas** – Girard J.N., 33**Arrow of time** – Frère J.-M., 104**ASN** – Pouget-Abadie X., 359**ASTRID** – Gauché F., 365**Astronomical dark matter** – Lavalley J., 740**Atomic contacts** – Bretheau L., 89**Atomic structure** – Georgarakis K., 218**Auxiliary field formalism** – Gralak B., 786**Axion** – Sikivie P., 176

## B

**BaBar** – Bevan A.J., 145**Baryogenesis** – Hambye T., 193**Baryon acoustic oscillations** – Astier P., 521**Belle** – Bevan A.J., 145**B factories** – Bevan A.J., 145**Bolometers** – Armengaud E., 730**Bulk metallic glasses** – Georgarakis K., 218

## C

**Calibration** – Tasse C., 28**Carbon nanotube** – Vincent P., 395**Cavity optomechanical cooling** – Buks E., 454**Charm** – Bigi I.I., 133**Cloud** – Defer E., 54**Clusters** – Astier P., 521**Coherent scattering** – Livet F., 227**Coherent structures** – Ouellette N.T., 866**Computed tomography** – Proudhon H., 316**Configurations** – Girard J.N., 33**Cosmic rays** – Lavalley J., 740**Cosmological constant** – Kunz M., 539**Cosmological constant problem** – Martin J., 566**Cosmological perturbation theory** – Kunz M., 539**Cosmology** – Ansari R., 46 – Kunz M., 539 – Silk J., 724**Counterflow** – Brachet M., 954**CP** – Bečirević D., 121 – Sikivie P., 176**CP symmetry** – Frère J.-M., 104**CP violation** – Jarlskog C., 111 – Gérard J.-M., 127 – Bigi I.I., 133 – Hambye T., 193**Crack closure** – Proudhon H., 316**Cu-based shape memory alloys** – Malard B., 280**Cyclostationarity** – Hellbourg G., 71

## D

**D mixing** – Bigi I.I., 133**Damage** – Maire E., 328**Dark energy** – Ansari R., 46 – Astier P., 521 – Kunz M., 539 – Clarkson C., 682**Dark matter** – Silk J., 724 – Armengaud E., 730**Data analysis methods** – Uson J.M., 14**Decoherence suppression** – Buks E., 454**Deoxyribonucleic acid** – Rau I., 853**Diffraction** – Geandier G., 257**Dislocation density** – Borbély A., 293**DNA** – Chepelianskii A.D., 967**DNA–CTMA complex** – Rau I., 853**Ductile** – Maire E., 328

## E

**Earth observation mission** – Defer E., 54**EDF** – Pouget-Abadie X., 359**Effective theories** – Abada A., 180**Electric dipole moments** – Naviliat-Cuncic O., 168**Energy efficiency of buildings** – Mangematin E., 383**Entanglement** – Didier N., 470**EPR** – Barré B., 352**ESRF** – Offerman S.E., 268**Eulerian and Lagrangian** – Chevillard L., 899**Evanescent waves** – Gralak B., 786 – Argoul F., 800**External natural hazards** – Pouget-Abadie X., 359

## F

**Fatigue** – Proudhon H., 316**Feynman bubble diagrams** – Martin J., 566**Field effect transistor** – Vincent P., 395**Field emission** – Vincent P., 395**Flat lens** – Gralak B., 786**Flavor** – Bečirević D., 121**Flavour physics** – Gérard J.-M., 127 – Bigi I.I., 133 – Sanda A.I., 141 – Bevan A.J., 145 – Lunghi E., 152 – Schune M.-H., 159 – Hernández P., 186 – Hambye T., 193**Flavour physics and CP violation** – Ciuchini M., 115**Flow structure** – Pumir A., 889**Fluctuation dynamics** – Livet F., 227**Fluid mechanics** – Ouellette N.T., 866**Fracture** – Maire E., 328**Fukushima** – Pouget-Abadie X., 359 – Gauché F., 365**Fukushima accident** – Repussard J., 372**Functionalized DNA–CTMA** – Rau I., 853**Fundamental interactions** – Frère J.-M., 104

## G

**Galactic antimatter** – Lavalley J., 740

**Galileon scalar fields** – de Rham C., 666  
**Gamma-rays** – Lavalley J., 740  
**General relativity** – Kunz M., 539  
**Geometrical statistics** – Li Y., 878  
**Gold nanoparticles** – Shen H., 830  
**GPU** – Ait-Allal D., 80  
**Gravity theory** – Clarkson C., 682

## H

**Heat capacity** – Mangematin E., 383  
**Heat loss coefficient** – Mangematin E., 383  
**Heterodyne interferometry** – Argoul F., 800  
**High energy X-rays** – Geandier G., 257  
**Hybrid organic–inorganic** – Ummartyotin S., 994  
**Hydrogen** – Billot P., 340

## I

**Icosahedral quasicrystals** – de Boissieu M., 207  
**Image processing techniques** – Uson J.M., 14  
**Imaging** – Tasse C., 28  
**In situ multiscale analysis** – Malard B., 280  
**Instrument** – Defer E., 54  
**Interferometer** – Girard J.N., 33  
**Interferometric techniques** – Uson J.M., 14  
**Interferometry** – Tasse C., 28  
**Intermittency** – Chevillard L., 899  
**Invariants** – Jarlskog C., 111  
**ISM: abundances** – Pagani L., 5  
**ISM: molecules** – Pagani L., 5

## K

**Kinetic inductance** – Boudou N., 62

## L

**Laminography** – Maire E., 328  
**Lattice** – Bečirević D., 121  
**Leptogenesis** – Hambye T., 193  
**Lepton flavour violation** – Abada A., 180  
**LHCb** – Sanda A.I., 141 – Lunghi E., 152 – Schune M.-H., 159  
**Light polarization** – Shen H., 830  
**Line profile analysis** – Borbély A., 293  
**Line: profiles** – Pagani L., 5  
**LOFAR** – Griebmeier J.-M., 23 – Tasse C., 28 – Girard J.N., 33  
**Long range order** – de Boissieu M., 207  
**Lovelock invariant** – de Rham C., 666  
**LQCD** – Bigi I.I., 133  
**Lundgren–Monin–Novikov hierarchy** – Friedrich R., 929

## M

**Macroscopic Maxwell's equations** – Gralak B., 786

**Massive Gravity** – de Rham C., 666  
**Matter–antimatter asymmetry** – Hernández P., 186  
**Mechanical resonator** – Armour A.D., 440 – Buks E., 454  
**Mesoscopic physics** – Chepelienskii A.D., 967  
**Metals and alloys** – Borbély A., 293  
**Microscopic irreversibility** – Frère J.-M., 104  
**Microstructure** – Nguyen-Thi H., 237 – Geandier G., 257 – Offerman S.E., 268  
**Microwave cavity** – Didier N., 470  
**Millimeter astronomy** – Boudou N., 62  
**Mixing matrix** – Jarlskog C., 111  
**Modeling** – Li Y., 878 – Pumir A., 889  
**Modern cosmology** – Astier P., 521  
**Molecular electronics** – Chepelienskii A.D., 967  
**Multilevel algorithm** – Letrou C., 38  
**Multiplexed electronics** – Boudou N., 62  
**Multireflector antenna** – Letrou C., 38

## N

**Nano-electromechanical systems** – Rastelli G., 410 – Shekhter R.I., 426 – Didier N., 470  
**Nanoradio** – Vincent P., 395  
**Negative index materials** – Gralak B., 786  
**Neutrino physics** – Abada A., 180 – Hernández P., 186  
**Neutrinos** – Lavalley J., 740  
**Neutron diffraction** – Malard B., 280 – Rolph J., 307  
**New mechanisms of CP violation** – Naviliat-Cuncic O., 168  
**New physics** – Abada A., 180  
**Nickel-base superalloy** – Rolph J., 307  
**NLO properties** – Rau I., 853  
**Noble liquid detectors** – Armengaud E., 730  
**NPP life extension** – Repussard J., 372  
**Nuclear energy and nuclear fuel cycle** – Dautray R., 480  
**Nuclear plants** – Barré B., 352  
**Nuclear reactor** – Billot P., 340  
**Nuclear safety** – Pouget-Abadie X., 359 – Repussard J., 372

## O

**Optomechanical systems** – Armour A.D., 440  
**Organic light emitting diodes (OLEDs)** – Ummartyotin S., 994

## P

**Particle dark matter** – Tait T.M.P., 719  
**PEEM** – Douillard L., 815  
**Periodic safety review** – Repussard J., 372  
**Phase transformations** – Geandier G., 257

**Phased array** – Girard J.N., 33  
**Phased array antenna** – Hellbourg G., 71  
**Photoluminescence** – Ummartyotin S., 994  
**Physical Optics** – Letrou C., 38  
**Planar faults** – Borbély A., 293  
**Plutonium** – Dautray R., 480  
**Polarization** – Ossikovski R., 837  
**Polaron** – Rastelli G., 410  
**Pools, cooling, radioactivity, proliferation** – Dautray R., 480  
**Power plants, decommissioning, wastes** – Dautray R., 480  
**Precipitation** – De Geuser F., 246  
**Precision measurements at low energies** – Naviliat-Cuncic O., 168  
**Probability density functions** – Friedrich R., 929  
**Prototype** – Gauché F., 365  
**Pulsar** – Ait-Allal D., 80

## Q

**QCD** – Bečirević D., 121 – Sikivie P., 176  
**Quantum bit** – Didier N., 470  
**Quantum dot** – Rastelli G., 410  
**Quantum dynamics** – Armour A.D., 440  
**Quantum master equation** – Didier N., 470  
**Quantum transport** – Bretheau L., 89  
**Quasicrystals** – de Boissieu M., 207

## R

**Radiation protection** – Repussard J., 372  
**Radioastronomy** – Griebmeier J.-M., 23  
**Radiography** – Nguyen-Thi H., 237  
**Radiotelescope** – Griebmeier J.-M., 23 – Letrou C., 38  
**Rain** – Defer E., 54  
**Raman spectroscopy** – Ossikovski R., 837  
**Rapid thermodynamic measurements** – Mangematin E., 383  
**Rare K decays** – Gérard J.-M., 127  
**Restricted Euler approximation** – Li Y., 878  
**RFI mitigation** – Hellbourg G., 71 – Ait-Allal D., 80  
**Risk assessment** – Repussard J., 372

## S

**Safety** – Billot P., 340 – Barré B., 352 – Gauché F., 365  
**Safety, security, radiation protection** – Dautray R., 480  
**SANS** – De Geuser F., 246  
**SAXS** – De Geuser F., 246  
**Scale dependence** – Pumir A., 889  
**Scanning surface plasmon microscopy** – Argoul F., 800  
**Seism** – Billot P., 340  
**Severe accident** – Billot P., 340 – Pouget-Abadie X., 359  
**SFR** – Gauché F., 365

**Small-angle scattering** – De Geuser F., 246  
**Sodium** – Gauché F., 365  
**Solid electrochromic cells** – Rau I., 853  
**Solidification** – Nguyen-Thi H., 237  
**Source term** – Billot P., 340  
**Spatial inhomogeneity** – Clarkson C., 682  
**Speckles** – Livet F., 227  
**SPR phase imaging** – Argoul F., 800  
**Standard Model** – Tait T.M.P., 719  
**Stars: early-type** – Pagani L., 5  
**Stars: formation** – Pagani L., 5  
**Steels** – Geandier G., 257  
**STM** – Douillard L., 815  
**Stress induced martensitic transformation** – Malard B., 280  
**Stress measurement** – Ossikovski R., 837  
**Sub-millimetre wave radiometry** – Defer E., 54  
**Subnanometer spatial resolution** – Douillard L., 815  
**Super-B factories** – Sanda A.I., 141 – Lunghi E., 152 – Schune M.-H., 159  
**Super-symmetry** – Martin J., 566  
**Superconducting detectors** – Boudou N., 62  
**Superconducting nanocircuits** – Didier N., 470  
**Superconducting weak links** – Shekhter R.I., 426

**Superconductivity** – Bretheau L., 89 – Chepelianskii A.D., 967  
**Supercooled liquid** – Georgarakis K., 218  
**Superfluidity** – Brachet M., 954  
**Surface plasmon resonance** – Argoul F., 800  
**SUSY** – Armengaud E., 730  
**Symmetry point group** – Shen H., 830  
**Synchrotron** – Nguyen-Thi H., 237  
**Synchrotron light** – Georgarakis K., 218  
**Synchrotron radiation** – Proudhon H., 316

## T

**Telescopes** – Pagani L., 5  
**TERS** – Ossikovski R., 837  
**Third harmonic generation** – Rau I., 853  
**Titanium alloys** – Geandier G., 257  
**Tomography** – Nguyen-Thi H., 237 – Maire E., 328  
**Topography** – Nguyen-Thi H., 237  
**TPC** – Armengaud E., 730  
**Transient detection** – Ait-Allal D., 80  
**Transient states** – Mangematin E., 383  
**Turbulence** – Ouellette N.T., 866 – Li Y., 878 – Pumir A., 889 – Chevillard L., 899 – Friedrich R., 929 – Brachet M., 954  
**Type Ia supernovae** – Astier P., 521

## U

**Underground laboratory, storage, disposal** – Dautray R., 480

## V

**Vacuum energy** – Martin J., 566

## W

**Weak lensing** – Astier P., 521  
**WIMPs** – Armengaud E., 730

## X

**X-ray** – Maire E., 328  
**X-ray diffraction** – Borbély A., 293  
**X-ray photon correlation spectroscopy** – Livet F., 227  
**X-ray synchrotron** – Malard B., 280

## Z

**ZnS embedded PVP** – Ummartyotin S., 994
