

# COMPTES RENDUS PHYSIQUE

Tome 14 (2013) – N° 4

---

Aerial view of the Virgo detector for gravitational waves, located within the site of EGO (European Gravitational Observatory), based at Cascina, near Pisa on the Arno River plain, Italy. Image credit: EGO.

## DOSSIER

Gravitational waves / *Ondes gravitationnelles*

**Guest editor / Rédacteur en chef invité : Patrice Hello**

- Foreword  
**Patrice Hello** ..... 269
- Gravitational waves and astrophysical sources  
**B.S. Sathyaprakash** ..... 272
- Gravitational wave detection: Principles and practice  
**Peter R. Saulson** ..... 288
- Numerical simulations of black-hole binaries and gravitational wave emission  
**Ulrich Sperhake, Emanuele Berti, Vitor Cardoso** ..... 306
- Multiple physical elements to determine the gravitational-wave signatures of core-collapse supernovae  
**Kei Kotake** ..... 318
- Searching for gravitational waves with the LIGO and Virgo interferometers  
**Marie-Anne Bizouard, Maria Alessandra Papa** ..... 352
- Some basic principles of a “LISA”  
**Jean-Yves Vinet** ..... 366
