

# COMPTES RENDUS PHYSIQUE

Tome 14 (2013) – N° 7

AFM image of the solid-state dewetting of a monocrystalline silicon film on a silica surface (Si/SiO<sub>2</sub>).

*Image AFM de démouillage en phase solide d'un film monocristallin de silicium sur un substrat de silice (Si/SiO<sub>2</sub>).*

## DOSSIER

Trends and perspectives in solid-state wetting / *Mouillage solide–solide : tendances et perspectives*

Guest editor / *Rédacteur en chef invité* : **Olivier Pierre-Louis**

- Trends and perspectives in solid-state wetting  
**Olivier Pierre-Louis** ..... 529
- Wetting by solid helium, a model system  
**Sébastien Balibar** ..... 531
- One-dimensional Ge nanostructures on Si(001) and Si(1 1 10): Dominant role of surface energy  
**Francesco Montalenti, Daniele Scopece, Leo Miglio** ..... 542
- Modeling dewetting of ultra-thin solid films  
**Anna Chame, Olivier Pierre-Louis** ..... 553
- A model for solid-state dewetting of a fully-faceted thin film  
**Rachel V. Zucker, Gye Hyun Kim, W. Craig Carter, Carl V. Thompson** ..... 564
- Dynamics and instability of solid-state dewetting  
**Fabien Cheynis, Frédéric Leroy, Pierre Müller** ..... 578
- Time-dependent analysis of agglomerating Pt thin films on YSZ single crystals  
**Henning Galinski, Thomas Ryll, Lukas Schlagenhauf, Iwan Schenker, Ralph Spolenak, Ludwig J. Gauckler** .. 590
- Interfacial reaction during dewetting of ultrathin silicon on insulator  
**Koichi Sudoh, Muneyuki Naito** ..... 601
