

COMPTES RENDUS PHYSIQUE

Tome 15 (2014) – N° 1

i-CdRE (RE = Gd, HO, Tm) monoquasicrystals (Photo : A.P. Tsai and coworkers, Tohoku University, Japan).
Insert: Laue XRD diagram of i-AlPdMn around a quinary direction, recorded by the team of W. Steurer (Zurich, Switzerland).

DOSSIER

Quasicristaux / *Quasicrystals*

Guest editors / Rédacteurs en chef invités : Denis Gratias, Marc de Boissieu

• Foreword Denis Gratias, Marc de Boissieu	1
• Prolegomena of quasicrystals Jacques Friedel	3
• Quasicrystals, model sets, and automatic sequences Jean-Paul Allouche, Yves Meyer	6
• Quasicrystals and atomic clusters Pierre Guyot, Marc Audier	12
• About the atomic structures of icosahedral quasicrystals Marianne Quiquandon, Denis Gratias	18
• Crystal chemistry and chemical order in ternary quasicrystals and approximants Cesar Pay Gómez, An Pang Tsai	30
• Decagonal quasicrystals – What has been achieved? Walter Steurer, Sofia Deloudi	40
• Surfaces of quasicrystals Julian Ledieu, Vincent Fournée	48
• Dynamics of quasicrystals Ted Janssen, Marc de Boissieu	58

Continued on the next page

Contents (continued)

- Anomalous electronic transport in quasicrystals and related complex metallic alloys
Guy Trambly de Laissardière, Didier Mayou 70
- Dislocations and mechanical properties of icosahedral quasicrystals
Frédéric Momprou, Daniel Caillard 82
- Frustration and defects in non-periodic solids
Rémy Mosseri, Jean-François Sadoc 90
