### Vol. 16, 2015

**A**

**Acceleration** – Grenier I.A., 641  
**Acceleration of particles** – Dubus G., 661  
**Accelerator** – Wenninger J., 347  
**Acoustics** – Delannay R., 45  
**Active matter** – Gonnella G., 316  
**Aeolian sand transport** – Valance A., 105  
**Agitations** – van Hecke M., 37  
**Algorithms** – Petit G., 480  
**Alternatives to inflation** – Lilley M., 1038  
**Alveolar structure** – Lajimi N., 708  
**Anomalies** – Bojowald M., 1012  
**Antennas** – Ali K., 789  
**Arching** – Radjai F., 3  
**Artificial magnetic conductor** – Andriamiharivolamena T., 851  
**Astrophysics** – Barré J., 723  
**ATLAS** – Cacciari M., 368 – Nicolaidou R., 379  
**Atomic clock** – Takamoto M., 489 – Peik E., 516 – Bongs K., 553  
**Atomic fountain clocks** – Abgrall M., 461  
**Avalanche** – Gray J.M.N.T., 73  
**Avalanche density** – Sovilla B., 97  
**Avalanche impact pressure** – Sovilla B., 97  
**Avalanche velocity** – Sovilla B., 97

**B**

**Barchan** – Courrech du Pont S., 118  
**Beyond the standard model** – Espinosa J.R., 394  
**BiFeO<sub>3</sub>** – Guennou M., 182 – Yang Y., 193  
**Binaries: general** – Dubus G., 661  
**Blackbody Stark** – Ludlow A.D., 499  
**Body area networks** – Ali K., 789  
**Bouncing cosmology** – Lilley M., 1038  
**Boundary condition** – Jop P., 62  
**Boundary Element Method** – Mitharwal R., 776  
**BSM** – Clerbaux B., 407

**C**

**Calderón preconditioning** – Mitharwal R., 776  
**Calorimeter** – Fournier D., 356  
**Causal structures** – Ellis G.F.R., 928  
**Centrifuge experiments** – Turnbull B., 86  
**CERN** – Cacciari M., 368 – Schutz Y., 448  
**Cherenkov detectors** – de Naurois M., 610  
**Clocks** – Laurent P., 540  
**CMB** – Bouchet F.R., 891  
**CMS** – Cacciari M., 368 – Nicolaidou R., 379  
**Coarsening** – Cugliandolo L.F., 257 – Nepomnyashchy A.A., 267 – Politi P., 280 – Das S.K., 303 – Corberi F., 332  
**Coarsening in athermal systems** – Baldassarri A., 291  
**Cold atoms** – Laurent P., 540 – Bongs K., 553  
**Cold collision** – Ludlow A.D., 499  
**Collective motion** – Courrech du Pont S., 118  
**Compositeness** – Espinosa J.R., 394  
**Computational dosimetry** – Mitharwal R., 776  
**Constancy of fundamental constants** – Takamoto M., 489  
**Contact dynamics** – Radjai F., 3  
**Cosmic microwave background** – Uzan J.-P., 576 – Durrer R., 948  
**Cosmic rays** – Degrange B., 587 – Lemoine M., 628 – Hewitt J.W., 674  
**Cosmology** – Uzan J.-P., 576 – Uzan J.-P., 875 – Bouchet F.R., 891 – Ellis G.F.R., 928 – Durrer R., 948 – Vennin V., 960 – Renaux-Petel S., 969 – Bernardeau F., 986 – Bezrukov F., 994 – Silverstein E., 1003 – Yokoyama J., 1018 – Pereira T., 1027 – Lilley M., 1038  
**Coupling** – Nicolaidou R., 379 – Lajimi N., 708  
**Coupling element** – Cihangir A., 836  
**CP violation** – Gershon T., 435

**Creeping waves** – Ali K., 789  
**Critical velocity** – Castin Y., 241  
**Crystal erosion** – Politi P., 280  
**Crystal growth** – Politi P., 280  
**Curie temperature** – Bouzerar G., 731  
**Cycloidal antiferromagnetic thin films** – Fontcuberta J., 204

**D**

**Dark matter** – Clerbaux B., 407  
**Debris avalanches** – Turnbull B., 86  
**Debris flows** – Turnbull B., 86  
**Dense granular flow** – Jop P., 62  
**Dense granular flows** – Kumaran V., 51  
**Desert** – Courrech du Pont S., 118  
**Detectors** – Thompson D.J., 600  
**DFT** – Varignon J., 153  
**Disorder** – Corberi F., 332 – Bouzerar G., 731  
**Domain growth** – Cugliandolo L.F., 257  
**Domain walls** – Matzen S., 227 – Nepomnyashchy A.A., 267  
**Domains** – Matzen S., 227  
**Dune** – Courrech du Pont S., 118

**E**

**Early universe** – Uzan J.-P., 875  
**Effective theory** – Bojowald M., 1012  
**Electronic bridge** – Peik E., 516  
**Electroweak symmetry breaking** – Espinosa J.R., 394  
**EMF exposure** – Roblin C., 802  
**Epitaxy** – Aqua J.-N., 741  
**Equivalence principle** – Guerlin C., 565 – Uzan J.-P., 576  
**Exotics** – Clerbaux B., 407  
**Experimental tests of General Relativity** – Guerlin C., 565  
**Exposimeter** – Roblin C., 802  
**Eyewear device** – Cihangir A., 836

## F

- Fermi bubbles** – Su M., 686  
**Fermi gases** – Castin Y., 241  
**Ferroelectric manganite thin films** – Fontcuberta J., 204  
**Ferroelectricity** – Barone P., 143 – Matzen S., 227  
**Ferroelectrics** – Garcia V., 168  
**Ferromagnetism** – Matzen S., 227  
**Fibre optics** – Lopez O., 531  
**Field sensing** – Roblin C., 802  
**Fingerprinting** – Vin I., 862  
**Fluid dynamics** – Barré J., 723  
**Force chains** – Radjai F., 3  
**Force networks** – Behringer R.P., 10  
**Frequency and time dissemination** – Riehle F., 506  
**Frequency metrology** – Bongs K., 553  
**Frequency stabilized lasers** – Lopez O., 531  
**Frequency standards** – Bauch A., 471 – Petit G., 480 – Riehle F., 506  
**Frequency transfer** – Droste S., 524  
**Full-field measurements** – Desrues J., 26  
**Fundamental constants** – Uzan J.-P., 576  
**Future redefinition of the second** – Riehle F., 506

## G

- Galactic Centre** – Su M., 686  
**Gamma rays** – Thompson D.J., 600 – de Naurois M., 610 – Lemoine M., 628 – Grenier I.A., 641 – Su M., 686  
**Gamma-rays: stars** – Dubus G., 661  
**General relativity** – Uzan J.-P., 576  
**Geometry** – Kallosh R., 914  
**Geomorphology** – Courrech du Pont S., 118  
**GNSS** – Bauch A., 471  
**Granular kinetic theory** – Kumaran V., 51  
**Granular materials** – Behringer R.P., 10 – Desrues J., 26 – Gray J.M.N.T., 73  
**Granular matter** – Radjai F., 3  
**Granular media** – Delannay R., 45  
**Granular systems** – Baldassarri A., 291  
**Gravitation** – Bernardeau F., 986  
**Ground-based detectors** – Degrange B., 587

## H

- Hadrons** – Wenninger J., 347  
**Heavy ions** – Schutz Y., 448  
**Heterostructures** – Garcia V., 168  
**Hexagonal ferroelectric thin films** – Fontcuberta J., 204  
**Higgs boson** – Fournier D., 356 – Nicolaidou R., 379 – Espinosa J.R., 394 – Clerbaux B., 407 – Bezrukov F., 994  
**High-energy astrophysics** – Lemoine M., 628  
**High-energy gamma rays** – Degrange B., 587

- High-impedance surface** – Andriamiharivolamena T., 851  
**Human body** – Andriamiharivolamena T., 851  
**Hydrodynamics** – Das S.K., 303  
**Hyperfine structure** – Peik E., 516

## I

- Imaging atmospheric Cherenkov telescopes** – de Naurois M., 610  
**Immune repertoire** – Walczak A.M., 761  
**Impact** – Behringer R.P., 10  
**Inflation** – Uzan J.-P., 875 – Bouchet F.R., 891 – Kallosh R., 914 – Ellis G.F.R., 928 – Durrer R., 948 – Vennin V., 960 – Renaux-Petel S., 969 – Bezrukov F., 994 – Silverstein E., 1003 – Yokoyama J., 1018 – Pereira T., 1027 – Lilley M., 1038  
**Inhomogeneous stationary state** – Barré J., 723  
**Instability** – Politi P., 280  
**Interfaces** – Garcia V., 168  
**International timescales** – Petit G., 480  
**Ion trap** – Peik E., 516

## J

- Jamming** – Behringer R.P., 10

## L

- Landau criterion** – Castin Y., 241  
**Landau damping** – Barré J., 723  
**Large Hadron Collider** – Wenninger J., 347 – Cacciari M., 368 – Nicolaidou R., 379 – Hawkings R., 424 – Gershon T., 435 – Schutz Y., 448 – Bezrukov F., 994  
**Large-scale structure** – Bernardeau F., 986  
**Laser cooling** – Bongs K., 553  
**Lasers** – Droste S., 524  
**Localization** – Vin I., 862  
**Lorentz invariance** – Guerlin C., 565  
**LTE** – Cihangir A., 836

## M

- Magnetic field** – Yokoyama J., 1018  
**Magnetic induction link budget** – Grzeskowiak M., 819  
**Magnetic semiconductors** – Bouzerar G., 731  
**Magnetism** – Varignon J., 153  
**Magneto-optical trap** – Bongs K., 553  
**Magnetolectric coupling** – Garcia V., 168 – Matzen S., 227  
**Magnetosphere** – Grenier I.A., 641  
**Mass** – Nicolaidou R., 379  
**Metal-insulator transition** – Bouzerar G., 731  
**Microscopic mechanisms** – Barone P., 143

- Misfit strain** – Yang Y., 193  
**Mixed avalanches** – Sovilla B., 97  
**Model comparison** – Vennin V., 960  
**Molecular dynamics** – Radjai F., 3 – Das S.K., 303  
**Monolayer and multilayer stacked coil** – Grzeskowiak M., 819  
**Morphological instability** – Aqua J.-N., 741  
**Mössbauer spectroscopy** – Peik E., 516  
**Multi-zone buildings** – Lajimi N., 708  
**Multiferroic** – Guennou M., 182  
**Multiferroic perovskite films** – Fontcuberta J., 204  
**Multiferroics** – Barone P., 143 – Varignon J., 153 – Garcia V., 168 – Yang Y., 193 – Matzen S., 227  
**Multipath component distance** – Vin I., 862  
**Mutual inductance** – Grzeskowiak M., 819

## N

- Neutron star** – Grenier I.A., 641  
**New physics** – Clerbaux B., 407  
**Non-cooperative mode** – Vin I., 862  
**Non-equilibrium statistical mechanics** – Baldassarri A., 291  
**Non-Gaussianities** – Renaux-Petel S., 969  
**Non-line-of-sight** – Vin I., 862  
**Non-linear couplings** – Bernardeau F., 986  
**Non-local effects** – Jop P., 62  
**Non-thermal radiation** – Degrange B., 587  
**Nonlocal models** – van Hecke M., 37  
**Nucleosynthesis** – Uzan J.-P., 576

## O

- Observations** – Su M., 686  
**On-body spiral coil** – Grzeskowiak M., 819  
**Optical atomic clock** – Riehle F., 506 – Droste S., 524  
**Optical clock** – Ludlow A.D., 499  
**Optical fiber link** – Droste S., 524  
**Optical frequency combs** – Abgrall M., 461  
**Optical lattice** – Ludlow A.D., 499 – Bongs K., 553  
**Optical lattice clock** – Abgrall M., 461 – Takamoto M., 489  
**Optical links** – Lopez O., 531  
**Optimization in biology** – Walczak A.M., 761

## P

- Particle acceleration** – Lemoine M., 628  
**Particle mixing** – Gray J.M.N.T., 73  
**Particle-laden fluid flows** – Valance A., 105  
**Particle size-segregation** – Gray J.M.N.T., 73  
**Pattern formation** – Nepomnyashchy A.A., 267 – Gonnella G., 316

**Perovskite** – Guennou M., 182  
**Perturbative calculations** – Cacciari M., 368  
**Phase ordering kinetics** – Cugliandolo L.F., 257  
**Phase separation** – Gonnella G., 316  
**Phase transition** – Das S.K., 303  
**Planar monopole** – Andriamiharivolamena T., 851  
**Planck** – Bouchet F.R., 891  
**Plasma physics** – Barré J., 723  
**Polarization diversity** – Vin I., 862  
**Powder snow avalanches** – Sovilla B., 97  
**Precision measurements** – Laurent P., 540  
**Precursor of avalanches** – Delannay R., 45  
**Precursors of localisation** – Desrues J., 26  
**Pulsar** – Grenier I.A., 641  
**Pulsar wind nebulae** – Hewitt J.W., 674

## Q

**QCD** – Schutz Y., 448  
**QGP** – Schutz Y., 448  
**Quantum cosmology** – Bojowald M., 1012  
**Quantum metrology** – Ludlow A.D., 499  
**Quark flavour physics** – Gershon T., 435

## R

**Radiation mechanisms: non-thermal** – Dubus G., 661  
**Rare decays** – Gershon T., 435  
**Relativistic geodesy** – Takamoto M., 489  
**Relativity** – Laurent P., 540  
**Rheology** – van Hecke M., 37 – Jop P., 62  
**Run-out** – Gray J.M.N.T., 73

## S

**Saltation** – Valance A., 105  
**Sand transport** – Courrech du Pont S., 118

**SAR** – Cihangir A., 836  
**SAR assessments** – Mitharwal R., 776  
**Scaling** – Corberi F., 332  
**Schwinger effect** – Yokoyama J., 1018  
**Self-propelled particles** – Gonnella G., 316  
**Shear jamming** – Behringer R.P., 10  
**Sheared granular flows** – Kumaran V., 51  
**Slow granular flows** – van Hecke M., 37  
**Snow entrainment** – Sovilla B., 97  
**Solenoid** – Fournier D., 356  
**Space** – Thompson D.J., 600  
**Space-borne detectors** – Degrange B., 587  
**Space-time** – Bojowald M., 1012  
**Spatial anisotropy** – Pereira T., 1027  
**Specific Absorption Rate** – Andriamiharivolamena T., 851  
**Spectrometer** – Fournier D., 356  
**Spectroscopy** – Gershon T., 435  
**Spin excitations** – Bouzerar G., 731  
**Spin-parity** – Nicolaidou R., 379  
**Spintronics** – Garcia V., 168  
**Stability of natural constants** – Abgrall M., 461  
**Standard Model** – Cacciari M., 368  
**Stochastic gene regulation** – Walczak A.M., 761  
**Strain localisation** – Desrues J., 26  
**Strained film** – Aqua J.-N., 741  
**String theory** – Silverstein E., 1003  
**Strontium** – Ludlow A.D., 499  
**Superfluidity** – Castin Y., 241  
**Supergravity** – Kallosh R., 914  
**Supernova remnants** – Hewitt J.W., 674  
**SUSY** – Clerbaux B., 407

## T

**Th-229 isomer** – Peik E., 516  
**Thermal fluctuations** – Bouzerar G., 731  
**Thermal insulation** – Lajimi N., 708  
**Thermoelectricity** – Lajimi N., 708  
**Thin film** – Yang Y., 193  
**Tiling solutions** – Walczak A.M., 761

**Time and frequency metrology** – Bauch A., 471 – Takamoto M., 489 – Lopez O., 531 – Guerlin C., 565  
**Time links** – Petit G., 480  
**Time-frequency transfer** – Laurent P., 540  
**Timekeeping** – Abgrall M., 461  
**Top mass** – Hawkings R., 424  
**Top quark** – Fournier D., 356 – Hawkings R., 424  
**Toroid** – Fournier D., 356  
**Transition-metal oxides** – Barone P., 143  
**Triaxial and biaxial tests** – Desrues J., 26  
**TWSTFT** – Bauch A., 471

## U

**Ultracold atoms** – Castin Y., 241

## V

**Vacuum stability** – Espinosa J.R., 394  
**Variation of the fundamental constants** – Laurent P., 540  
**Vlasov equation** – Barré J., 723

## W

**Wearable antenna** – Andriamiharivolamena T., 851  
**Width** – Nicolaidou R., 379  
**Wireless ingestible capsule** – Grzeskowiak M., 819  
**Worn dosimeter** – Roblin C., 802

## X

**X-ray tomography** – Desrues J., 26

## Y

**Ytterbium** – Ludlow A.D., 499
