

COMPTES RENDUS PHYSIQUE

Tome 17 (2016) – N° 3–4 – mars–avril

Left: Friedel oscillations in graphene visualised by scanning tunnel microscopy (cf. Pierre Mallet and Jean Yves Veuillen, this issue). Right: spiral dislocation in a liquid crystal (cf. Pawel Pieranski, this issue). Inset: Jacques Friedel (1921–2014). Courtesy of Jacques Friedel's family.
À gauche : oscillations de Friedel dans le graphène visualisées par microscopie à effet tunnel (cf. Pierre Mallet et Jean Yves Veuillen, ce dossier). À droite : dislocation vis dans un cristal liquide (cf. Pawel Pieranski, this issue). En médaillon : Jacques Friedel (1921–2014). Famille de Jacques Friedel.

DOSSIER

Condensed matter physics in the 21st century: The legacy of Jacques Friedel / *Physique de la matière condensée au XXI^e siècle : l'héritage de Jacques Friedel*

Coordinators / *Coordinateurs* : Hélène Bouchiat, Jacques Villain

Contents (continued)

• One-dimensional physics in the 21st century Thierry Giamarchi	322
• The Peierls instability and charge density wave in one-dimensional electronic conductors Jean-Paul Pouget	332
• Novel superconducting phenomena in quasi-one-dimensional Bechgaard salts Denis Jerome, Shingo Yonezawa	357
• Rapid magnetic oscillations and magnetic breakdown in quasi-1D conductors Gilles Montambaux, Denis Jérôme	376
• Structure of covalently bonded materials: From the Peierls distortion to Phase-Change Materials Jean-Pierre Gaspard	389
• An efficient magnetic tight-binding method for transition metals and alloys Cyrille Barreteau, Daniel Spanjaard, Marie-Catherine Desjonquères	406
• The beauty of impurities: Two revivals of Friedel's virtual bound-state concept Antoine Georges	430
• The longevity of Jacques Friedel's model of the virtual bound state Peter M. Levy, Albert Fert	447
• Quantum kagome frustrated antiferromagnets: One route to quantum spin liquids Philippe Mendels, Fabrice Bert	455
• Insulating oxide surfaces and nanostructures Jacek Goniakowski, Claudine Noguera	471
• Silver and oxygen: Transition from clusters to nanoparticles Martin Schmidt, Catherine Bréchnignac	481
• A versatile lab-on-chip test platform to characterize elementary deformation mechanisms and electromechanical couplings in nanoscopic objects Thomas Pardoën, Marie-Stéphane Colla, Hosni Idrissi, Behnam Amin-Ahmadi, Binjie Wang, Dominique Schryvers, Umesh K. Bhaskar, Jean-Pierre Raskin	485
