

COMPTES RENDUS PHYSIQUE

Tome 17 (2016) – N° 10 – décembre

Scanning electron microscope image of a suspended nanostructure taken by O. Bourgeois (as shown in Fig. 5 of the article by O. Bourgeois et al., this issue, pp. 1154–1160), with false colours added to indicate the temperature due to Joule heating.

Image au microscope électronique à balayage d'une nanostructure suspendue (comme le montre la Fig. 5 de l'article d'O. Bourgeois et al., ce numéro, pp. 1154–1160), avec de fausses couleurs ajoutées pour indiquer la température due au chauffage Joule. Cliché : O. Bourgeois.

DOSSIER

Mesoscopic thermoelectric phenomena / *Phénomènes thermoélectriques mésoscopiques*

Coordinators / *Coordinateurs* : Jean-Louis Pichard, Robert Whitney

- Foreword
Jean-Louis Pichard, Robert S. Whitney 1039
- Linear and nonlinear mesoscopic thermoelectric transport with coupling with heat baths
Jian-Hua Jiang, Yoseph Imry 1047
- Nonlinear phenomena in quantum thermoelectrics and heat
David Sánchez, Rosa López 1060
- The thermoelectric working fluid: Thermodynamics and transport
Giuliano Benenti, Henni Ouerdane, Christophe Goupil 1072
- Quantum-interference-enhanced thermoelectricity in single molecules and molecular films
Colin J. Lambert, Hatef Sadeghi, Qusiy H. Al-Galiby 1084
- Experiments on the thermoelectric properties of quantum dots
Artis Svilans, Martin Leijnse, Heiner Linke 1096
- Thermoelectrics with Coulomb-coupled quantum dots
Holger Thierschmann, Rafael Sánchez, Björn Sothmann, Hartmut Buhmann, Laurens W. Molenkamp 1109

Contents (continued)

- Thermoelectric and electrical transport in mesoscopic two-dimensional electron gases
Vijay Narayan, Michael Pepper, David A. Ritchie 1123
- Maxwell's demons realized in electronic circuits
Jonne V. Koski, Jukka P. Pekola 1130
- High-performance electronic cooling with superconducting tunnel junctions
Hervé Courtois, Hung Q. Nguyen, Clemens B. Winkelmann, Jukka P. Pekola 1139
- Nanostructuring for thermoelectricity: The path to an unlimited reduction of phonon transport
Shiyun Xiong, Sebastian Volz 1146
- Reduction of phonon mean free path: From low-temperature physics to room temperature applications in thermoelectricity
Olivier Bourgeois, Dimitri Tainoff, Adib Tavakoli, Yanqing Liu, Christophe Blanc, Mustapha Boukhari, André Barski, Emmanuel Hadji 1154
- Thermoelectric transport and Peltier cooling of cold atomic gases
Charles Grenier, Corinna Kollath, Antoine Georges 1161
