## Thematic issue / Numéro thématique

### 2016 Prizes of the French Academy of Sciences / Prix 2016 de l'Académie des sciences

- Foreword  
**Jacques Villain** ..... 293
- Dynamics of cracks in disordered materials  
**Daniel Bonamy** ..... 297
- Chalcogenide glasses and glass-ceramics: Transparent materials in the infrared for dual applications  
**Laurent Calvez** ..... 314
- Superconducting millimetre-wave cameras  
**Alessandro Monfardini** ..... 323
- Nuclear magnetic resonance in high magnetic field: Application to condensed matter physics  
**Claude Berthier, Mladen Horvatić, Marc-Henri Julien, Hadrien Mayaffre, Steffen Krämer** ..... 331
- Testing the formation of Majorana states using Majorana polarization  
**Cristina Bena** ..... 349
- On the universality (or not) of beautiful penguins  
**Yasmine Amhis** ..... 358
