

# COMPTES RENDUS PHYSIQUE

Tome 18 (2017) – N° 7-8 – septembre–octobre

Cover illustration: Left: the Sainte-Croix dam and its water reservoir contribute to the supply of water and renewable energy across the PACA region (see E. Branche, this issue, pp. 469–478). Top right: view of the ITER tokamak that will be assembled in this “well” at the centre of the Tokamak Complex building in Saint-Paul-les-Durance, France (see B. Bigot, this issue, pp. 367–371). Bottom right: photovoltaic farm, Néoules (Var, France). Photo: D. Lincot (see D. Lincot, this issue, pp. 381–390).

*Illustration de couverture : À gauche : barrage de Sainte-Croix et son réservoir d'eau, qui contribuent à l'approvisionnement en eau et en énergie renouvelable pour toute la région Provence-Alpes-Côte d'Azur (PACA) (voir E. Branche, ce dossier, pp. 469–478). À droite, en haut : vue du Tokamak ITER qui va être assemblé dans le « puits » au centre de ce bâtiment central du Tokamak, à Saint-Paul-les-Durance, France (see B. Bigot, ce dossier, pp. 367–371). À droite, en bas : ferme photovoltaïque de Néoules (Var, France). Photo : D. Lincot (voir D. Lincot, ce dossier, pp. 381–390).*

## DOSSIER

### *Demain l'énergie*

Coordinators / *Coordinateurs* : Patricia de Rango, Daniel Bellet, Adrien Bidaud, Henri Mariette

- Foreword  
**Patricia De Rango, Daniel Bellet, Adrien Bidaud, Henri Mariette** ..... 365
- ITER: A unique international collaboration to harness the power of the stars  
**Bernard Bigot** ..... 367
- Fundamentals of reactor physics with a view to the (possible) futures of nuclear energy  
**Xavier Doligez, Sandra Bouneau, Sylvain David, Marc Ernoult, Abdoul-Aziz Zakari-Issoufou, Nicolas Thiollière, Adrien Bidaud, Olivier Méplan, Alexis Nuttin, Nicolas Capellan** ..... 372
- The new paradigm of photovoltaics: From powering satellites to powering humanity  
**Daniel Lincot** ..... 381
- Spatial Atomic Layer Deposition (SALD), an emerging tool for energy materials. Application to new-generation photovoltaic devices and transparent conductive materials  
**David Muñoz-Rojas, Viet Huong Nguyen, César Masse de la Huerta, Sara Aghazadehchors, Carmen Jiménez, Daniel Bellet** ..... 391

*Continued on the next page*

Contents (continued)

- Storage of thermal solar energy  
**Benoît Stutz, Nolwenn Le Pierres, Frédéric Kuznik, Kevyn Johannes, Elena Palomo Del Barrio, Jean-Pierre Bédécarrats, Stéphane Gibout, Philippe Marty, Laurent Zalewski, Jerome Soto, Nathalie Mazet, Régis Olives, Jean-Jacques Bezian, Doan Pham Minh** ..... 401
- Buildings: The new energy nexus  
**Daniel Quénard** ..... 415
- “Smart buildings” integrated in “smart grids”: A key challenge for the energy transition by using physical models and optimization with a “human-in-the-loop” approach  
**Frédéric Wurtz, Benoît Delinchant** ..... 428
- Lighter structures for transports: The role of innovation in metallurgy  
**Alexis Deschamps, Guilhem Martin, Rémy Dendievel, Hugo P. Van Landeghem** ..... 445
- LEDs for lighting: Basic physics and prospects for energy savings  
**Bruno Gayral** ..... 453
- Use of vegetal biomass for biofuels and bioenergy. Competition with the production of bioproducts and materials?  
**Christine Chirat** ..... 462
- The multipurpose water uses of hydropower reservoir: The SHARE concept  
**Emmanuel Branche** ..... 469
- Energy transitions after COP21 and 22  
**Sébastien Balibar** ..... 479
