Available online 11 January 2007

Following the publication of this article, it has been observed that two corrections were not integrated into the final version.

Eq. (7) should read

$$F = \int_A \left\{ \frac{\gamma}{2} (\nabla \xi)^2 + U(\xi) \right\} ds - \int_B S ds \quad (7)$$

The second term on the r.h.s. of Eq. (11) should be multiplied by $\gamma/2$:

$$F = \frac{\gamma}{2} (\kappa^2 e^2 - \theta^2) \mu \{B\} + \frac{\gamma}{2} e \theta \mu \{\partial A\} \quad (11)$$
