

Physics/Solids, fluids: magnetic and electrical properties

## Erratum to the Note “A spatial interpretation of emerging superconductivity in lightly doped cuprates” [C. R. Physique 8 (2007) 937–941]

Guy Deutscher<sup>a,\*</sup>, Pierre-Gilles de Gennes<sup>b</sup>

<sup>a</sup> *School of Physics and Astronomy, Tel Aviv University, Ramat Aviv, Tel Aviv 69978, Israel*

<sup>b</sup> *Institut Curie Recherche, 26, rue d’Ulm, 75005 Paris, France*

Available online 29 August 2008

Several unfortunate errors appeared in the Note:

1. The original submission date should be 12 March 2007, and not 21 June 2008 as printed in the publication. This correction is important because from the current printed version it would appear that the paper was submitted after the death of de Gennes, whereas it was submitted before.
2. “Nozières” has been misspelled in the name of the Presenter, Philippe Nozières.
3. In Eqs. (1), (2) and (3),  $t_{\text{OCu}}$  should be replaced by  $t$ , the transfer integral between Cu atoms.
